

**The first online BIST and VIOP algorithmic trading platform of Turkey is updated****PRO edition and new design for ALGOLAB**

**DenizBank Investment Services Group has launched the PRO edition of ALGOLAB, Turkey's first online algorithmic trading platform, with a new interface and new features.**

**Thanks to ALGOLAB, investors can now communicate robotised trading orders on Borsa Istanbul Equity Market and Derivatives Market, enjoying convenience and saving time in investment decision processes. The PRO edition of ALGOLAB can be accessed through <https://beta.algolab.com.tr/> and mobile application.**

With ALGOLAB PRO edition, Deniz Yatırım customers can sign up/ log in through the platform without having to be directed via their AçıkDeniz online banking information. Non-customer investors can register by opening a demo account with their e-mail address.

With the DropCopy Integration feature besides 'Quick Strategies', Drag and Drop' or 'Coding Editor', the PRO edition allows configuration of algorithms based on the size and status of orders realised at the stock exchange. The new edition also makes it possible to monitor the markets instantaneously, view detailed information such as depth, buyer-seller and balance sheet data as well as add specialised orders like Take Profit/ Stop Loss when entering an order.

Offering a distinctive and comfortable working environment to users with dashboards that can be customised, the platform ensures that Deniz Yatırım customers view their current portfolio, select the accounts they wish to trade on and receive instant SMS/e-mail notifications for the transactions carried out.

The platform is open to everyone from experienced investors to those without any experience in investment. With new indicators added, users will be able to make use of the technical library and create algorithms in C# programming language without any restrictions, fit to their risk and income.

**Bespoke risk and return advice with 'Captain of My Money'**

The 'Captain of My Money' integration, which is launched with the Pro edition, a bespoke risk and return survey is applied, ensuring that users get advice on stocks, mutual funds and pension funds.

Hence investors will automatically manage their portfolio with artificial intelligence, according to the amount they set.

**“We aim for new perspectives for investors with the PRO edition”**

Delighted to launch the PRO edition of ALGOLAB to users in this period of time whereby digitisation is more important than ever, **DenizBank Executive Vice President in charge of Private Banking and Investment Group C. Cem Öneneç, PhD.**, said, “ALGOLAB has pioneered the algorithmic trading transactions since 2019 and has been used by thousands of users. Now we are thrilled to say that we have improved the PRO edition of ALGOLAB, encouraged by the positive developments that the platform provided in both the mobile application and website. We can observe that ALGOLAB minimises errors in services transforming into bot power with the new interface and many new features. On the other hand, customers have fast and easy access to such services as our service quality is enhanced. Developed to improve new strategies and user experience, the PRO edition aims to ensure that experienced and inexperienced investors carry out their transactions at any level they like through bespoke dashboards and gain different perspectives through the platform. We will continue to work to improve the competency of our investors in this field.”
