

# **ALGOLAB carried the algorithmic operations to mobile for the first time in Turkey.**

**DenizBank Investment Services Group carried the first online algorithmic operation platform of Turkey to the pocket of the investor. It is now easier to access simple, secure and applicable investment strategies with ALGOLAB Mobile which will support the implementation of investment decisions of customers, let them save time and robotize the process entirely.**

DenizBank Investment Services Group has presented ALGOLAB to the service of customers as a mobile application where they can place a robotized transaction order in Borsa Istanbul Stocks and Futures and Options markets through a single channel for algorithmic operations.

With this application in which algorithmic transactions can be downloaded to the mobile phone for the first time in Turkey and makes the lives of investors trading in Borsa Istanbul easier, the customer can design their investment ideas on a secure platform with strategies which already exist or which they can create themselves without having to constantly keep track of the markets. Thus, ALGOLAB users can place an order for an automatic transaction in their investment accounts by testing whichever strategy they want that are presented ready.

The investors which are Deniz Yatırım customers can access ALGOLAB Mobile directly through their online banking account information and realize their transactions whereas the non-customer investors can also experience the application by opening a demo account.

With ALGOLAB Mobile which serves a wide range of users from those with no experience in investment to investors with a long experience in this field, it is easier to access simple, secure and applicable investment strategies.

**“We are carrying our service which makes it easier for investors to the future”.**

Stating that they offer an advantage of selecting whatever strategy they like out of the rich pool of options for investors with ALGOLAB Mobile, **DenizBank Private Banking and Investment Group Executive Vice President Dr. Cem Öneç** commented on the subject: “Carrying ALGOLAB where the investors can create algorithmic operation strategies without needing software knowledge and can execute these strategies on live stock exchange data over to the mobile application, we meet an important need. ALGOLAB which we presented over the desktop computers for the investors’ service in 2019 has been the choice of thousands of investors in a short period of time. This quick momentum that the application gained encouraged to develop a version that can be available on mobile devices as well and we are very happy to have realized this

goal over a short period of time of 6 months. Hence, the investors in the capital market can realize their investment preferences in a fast, secure and customized manner from wherever they like regardless of the experience they have. With ALGOLAB Mobile, we are saying to the investors "You just choose your investment idea and let ALGOLAB deal with the rest from anywhere you wish." He added "We are pleased to serve our investors through ALGOLAB WEB which we continue to develop to help them create new strategies and improve their user experience and our new application ALGOLAB Mobile."
