DENİZBANK FINANCIAL SERVICES GROUP (DFSG)

*On 27 June 2011, DenizBank has signed a Share Transfer Agreement with American Life Hayat Sigorta A.Ş. (MetLife) to sell its shares at 99.86% on DenizEmeklilik. The transfer of the company's shares will be realized upon obtaining required approvals.

**DenizBank has sold its direct and indirect shares at 100% in total on Deniz Türev to Endeks Gayrimenkul ve Madencilik Enerji Sanayi ve Tic. A.Ş. and the share transfer has been completed on 19 July 2011.

DENİZBANK in BRIEF

DenizBank was founded in 1938 as a state-owned bank to provide funding for the developing Turkish maritime sector. Acquired by Zorlu Holding from the Privatization Administration as a banking license in early 1997, the Bank became one of the major banks in Turkey in a short period of time. In October 2006, DenizBank was acquired from Zorlu Group by Dexia, a leading financial group in Europe and currently operates as part of the Dexia Group.

In addition to DenizBank, DenizBank Financial Services Group consists of eight domestic and three international financial subsidiaries, four domestic non-financial subsidiaries and a branch in Bahrain. DenizYatırım Securities, EkspresInvest Securities, DenizInvestment Trust, DenizPortfolio Management, DenizTürev Securities, DenizLeasing, DenizFactoring, DenizEmeklilik, Intertech, DenizKültür, Bantaş and Pupa are the Group's domestic companies; EuroDeniz, DenizBank AG and CJSC Dexia Bank are the international subsidiaries.

The primary customer segments of DenizBank Financial Services Group include retail customers, small and medium-size enterprises, exporters, public and project finance users and corporate clients. The Group has identified agriculture, energy, tourism, education, health, sports, infrastructure and maritime sectors as a priority for her activities. The Group also operates in EU countries through its Vienna-based subsidiary DenizBank AG. CJSC Dexia Bank serves the Group's existing customers abroad that have commercial and trade ties with Russia and meets their various financial needs.

The Group possesses a service network that reaches all segments of the society throughout Turkey. In addition to the 540 domestic DenizBank branches, including one in Bahrain, DenizBank AG and CJSC Dexia Bank have 12 branches in total. In addition, thanks to its Alternative Distribution Channels, DenizBank enables both individual and corporate customers all over the world to carry out financial transactions over the internet.

DEXIA in BRIEF

Group Profile

Dexia is a European banking group, with about 35,200 members of staff and core shareholders' equity of EUR 19.3 billion as at 31 March 2011. The Group carries out its activities principally in Belgium, Luxembourg, France and Turkey.

Business Lines

Retail and Commercial Banking

Dexia offers a wide range of retail, commercial and private banking services to over 8 million customers.

Dexia ranks among the three largest banks in Belgium and Luxembourg. In Belgium, Dexia serves its 4 million customers through a network of approximately 850 branches. The Luxembourg operation is the international wealth management centre within the Group; it also covers the country with a nationwide network of branches. Dexia also holds a strong position in Turkey, through DenizBank, which currently stands in sixth position among privately-held banks and serves its customers through a nationwide network of some 540 branches. Besides the retail and commercial banking activities, DenizBank is a fully-fledged bank, with a significant corporate activity and offering its clients asset management services and insurance products.

The Group aims to continue developing its commercial franchises in Belgium and Luxembourg and to capture the significant growth potential of Turkey. The objective is to increase the proportion of income from its retail and commercial banking activities (approximately 60% of the Group's total income, including 29% from Turkey) and to achieve a client base of 10 million (4 million in Belgium and Luxembourg, 6 million in Turkey) by 2014.

Public and Wholesale Banking

Dexia plays a major role in the financing of local facilities and infrastructures, the health and social housing sectors and the social economy, principally in Belgium and France.

Dexia is also active;

- in the field of project finance, adopting a selective approach and in sectors such as infrastructures and renewable energies, both in Europe and North America;
- in the field of corporate banking in Belgium, where Dexia focuses on medium-sized corporates, whilst maintaining an opportunist presence with large corporates.

In addition, the Group is established in Germany, with an access to the Pfandbriefe market.

Close to its clients and fully in tune with their requirements, Dexia is constantly developing and widening its range of products and services. The aim is to go well beyond the role of specialist lender, offering clients of the business line integrated solutions (treasury management, budget optimisation, IT solutions and so on) most suited to their needs.

Asset Management and Services

This business line consists of three activities (asset management, investor services and insurance), characterised by attractive growth outlook based on a diversified clientele and strong collaboration with the Group's other commercial franchises.

With EUR 86.3 billion of assets under management as at 31 March 2011, Dexia Asset Management is the Group's asset management centre. Its four management centres (in Belgium, France, Luxembourg and Australia) serve a broad client base.

The investor services business is conducted by RBC Dexia Investor Services, a joint venture with Royal Bank of Canada, which offers its expertise in global custody, fund and pension administration and shareholder services to institutions all around the world. Total assets under administration amounted to EUR 2,064 billion as at 31 March 2011.

Dexia's insurance activities are mainly concentrated on the Belgian and Luxembourg markets. The Group offers a complete range of life and non-life insurance products to retail, commercial and private banking clients as well as to Dexia's public and semi-public clients, through a banking-insurance approach and through a network of tied agents.

Ratings

The Group's main operating entities operating on the long-term capital markets, Dexia Bank Belgium, Dexia Crédit Local and Dexia Banque Internationale à Luxembourg, are rated A+ by Fitch, A3 by Moody's and A by Standard & Poor's. Three of Dexia's European subsidiaries (Dexia Municipal Agency, Dexia Kommunalbank Deutschland and Dexia LDG Banque) issue Triple-A rated secured bonds.

MESSAGE FROM THE CHAIRMAN

Nearly three years have passed following the crisis which started in the last quarter of 2008. We have observed global banks change shells with the US and EU being in the first place in especially the first half of the three-year crisis period. Large amounts of loss were written and capital injections were made with the support of governments accordingly. Banks which could not adapt to this process either merged or were transferred to public sector. The structuring in the global financial sector continues in 2011. We can see that global banks are observing their business models, exiting some countries and rapidly increasing their assets in markets having high growth ratios. Authorities are trying to ensure that the same problems are not re-encountered by taking the necessary precautions. For this purpose, a vast range of studies and assessments are ongoing on bringing additional capital requirements and BASEL 3 preparations for banks having vital importance on a global scale.

Public debts and budgetary problems which started off in Greece in the second half of the period following the three-year crisis which is felt quite intensely due to the concerns of the case spreading to other countries are followed closely nowadays. The fear of a potential default problem having a chain reaction on banks and other companies and spreading to other countries with the loss of consumer confidence is affecting the global financial markets negatively. We have observed that a series of actions were taken under the leadership of central banks and the IMF with saving packages being in the first place in order to eliminate this risk. Accordingly, countries having high current account deficits and public indebtedness ratios have taken into course austerity measures and privatization programs.

The economic growth in the second quarter of 2011 slowed down due to natural disaster with secondary effects of the Tsunami disaster in Japan being in the first place and the increase in oil prices as a result of the crisis in the Middle East. When this was accompanied by the measures on cooling down economies due to the concern of inflation in emerging economies, distress on global growth rose once more. Primary indicators in the third quarter of the year show that economic activities are recovering once more. As the US Central Bank FED has announced that they have a series of instruments kept side in order to take new measures to support economic growth in the US has strengthened the belief that global economic recovery will continue in coming days.

Turkey has attracted a lot of attention growing by 11% in Q1 of 2011 following the annual growth rate of 8.9% in 2010. This growth mainly derived from private consumption and investment expenditures accordingly as it was the case in 2010. The contribution of external demand was weaker due to the effects of the global crisis abroad. The increase tendency in foreign trade continued in this sense.

On the other hand, the fact that the risk elements increased in developed countries made it necessary for the Turkish authorities to take regulatory precautions as a measure. As from the end of the last year, the regulations made by the Central Bank about reserve requirements and the new steps taken by the BRSA in 2011 Q2 have been the important support points indicating that the increase in the current account deficit will slow down in the coming periods. The weak performance of TL in the recent months which positively affects competitive power and the decline in energy prices draw attention as the other bases that can slow down the increase in current account deficit. Parallel to this, we observed that the positive evaluations of credit rating agencies about Turkish economy increased in recent months. I believe that Turkey's credit rating, which is already

considered as “investment grade” by the markets, will be at the deserved levels by rating agencies in the near future.

Although the fact that the steps taken in order to slow down the increase in the current account deficit were applied through the banking sector led to decline to some extent in the profit figures announced in the first five months compared to the last year’s figures, both the decline in NPL provisions and the strong evolution of fees and commissions will continue to support the profitability of the sector in the coming periods.

Upon the rapid growth of recent years, banking sector assets grew by about 13% in the first half of 2011. As were the recent years, the growth in assets was realized on credits and the increase in credits was realized as 23% in the first half of the year. Although the growth in deposits remained below credits with 6%, the fact that credits will slow down in the second half of the year with the impact of the measures taken will be an important factor that will reduce the fund needs of banks. Moreover, thanks to the confidence in the Turkish economy, banks are able to support their funding needs with long term resources from foreign wholesale markets. The capital strength of the banking sector and successful liquidity management will act as an important support in the economy reaching its growth potential in the coming years. While the new policy approach of the Central Bank will support the extension of funding maturities of banks especially on the TL side, it will also provide a robust basis for the healthy and stable growth of the banking system.

PIERRE MARIANI
CHAIRMAN

MESSAGE FROM THE PRESIDENT AND CEO

DenizBank achieved to increase her assets, customer deposits and equity both on consolidated and unconsolidated basis with a successful performance higher than the sector averages in the second quarter of 2011. DenizBank has increased her assets by 16% on a consolidated and 13% on an unconsolidated basis compared to the year-end 2010 and reached TRY 39 billion 188 million and TRY 31 billion 158 million, respectively.

DenizBank increased her consolidated customer deposits, the main source of funding, by 19% in the first six months of 2011, reaching TRY 23 billion 393 million. The unconsolidated customer deposits reached TRY 16 billion 706 million, increasing by 9% according to the end of 2010, relatively higher than the sector average of 6%. Besides, DenizBank continued to obtain low-cost and long-term funding sources from several international institutions to support her priority sectors.

DenizBank acquired a securitization loan in the amount of EUR 300 million against workers’ remittances from WestLB, EIB (European Investment Bank), EBRD (European Bank for Reconstruction and Development), IFC (International Finance Corporation) ve DEG (Deutsche Investitions und Entwicklungsgesellschaft) to finance mid-size sustainable energy efficiency projects, agricultural customers and SMEs operating in the food and beverages sector. In addition, DenizBank got permission from CMB for issuing bank bonds up to a maximum amount of TL 2 billion. At the beginning of May, we completed first part of the issue of discounted bank bonds amounting TL 500 million in total and restored trust to our bank with high-rate demands. Moreover, DenizBank got the permission from CMB for

issuing bonds up to a maximum amount of USD 750 mn to be purchased by foreign real persons and authorized 4 development banks for completion of the process. Our bonds, planned to be issued, are rated as Ba1 and BBB- by Moody's and Fitch, respectively.

Serving as a financial supermarket with an extensive product portfolio and providing funding to all sectors of the economy DenizBank reached her consolidated loans TL 28 billion 343 million, increasing 19% in the first six months.. Unconsolidated loans realized as TL 21 billion 14 million. Consumer loans grew by 26% y-t-d in total thanks to 29% increase in auto loans, 24% and 29% increase in general purpose and mortgage loans, respectively. The growth in credit card loans, doubling the sector average, realized as 22% in the first half. In the second quarter of 2011, DenizBank kept her leading place with her 121% loan to deposit ratio and 72% loan to asset ratio.

Our consolidated and unconsolidated shareholders' equity increased by 11% and 7% compared to the end of 2010, reaching TL 4 billion 49 million and TL 3 billion 371 million, respectively. DenizBank recorded 14.36% and 14.92% capital adequacy ratios on consolidated and unconsolidated basis, respectively, both of which are relatively higher than the international standards.

DenizBank considers support for the agriculture industry as part of her social responsibility mission as well as a good business proposition. DenizBank kept her first place among private banks and agricultural loans reached TL 2 billion as a result of the innovations offered to producers.

Besides her financial achievements, DenizBank continued her sponsorships of İDSO (Istanbul State Symphony Orchestra), TAYK (Turkish Off-Shore Racing Club) and 2nd International Istanbul Opera Festivals a leading supporter of culture and art facilities in the second quarter of 2011.

DenizBank became one of the banks extending its service network most by opening 40 new branches in the first six months of 2011 and reached 540 branches country-wide.

DenizBank left behind another highly effective year in terms of financial as well operational results as a result of her effective risk-oriented management policy that conforms to internationally-accepted corporate governance standards and reached TL 426 million consolidated net profit, increasing 30% y-o-y and TL 269 million unconsolidated net profit in the first half of 2011.

HAKAN ATEŞ
THE PRESIDENT AND CEO

CHANGES IN SHAREHOLDING STRUCTURE AND PAID-IN CAPITAL

As of 30 June 2010, DenizBank's shareholding structure is presented in the table below. DenizBank's shareholding structure does not contain any cross-shareholdings.

All financial figures presented in this table are extracts from the audited consolidated financial statements prepared in accordance with accounting and valuation standards as described in the "Regulation on Principles Related to Banks' Accounting Applications and Preserving the Documents", dated 1 November 2006 which is published in the Official Gazette No.26333, Turkish Accounting Standards and Turkish Financial Reporting Standards.

* It is the sum of financial assets at fair value through profit or loss (excluding trading purpose derivatives), investment securities available for sale and investment securities held to maturity.

ASSESSMENT of FINANCIAL POSITION and RISK MANAGEMENT

DenizBank continues its activities profitably, without compromising asset quality and strengthen its shareholder's equity. The share of the Bank's fixed asset investments in the shareholder's equity is low level. DenizBank put its free capital to interest earning assets as part of its core banking activities. DenizBank has a capital adequacy ratio significantly higher than the regulatory requirements thanks to strong and effective risk management.

Shareholders' Equity and Capital Adequacy (TRY million)

Consolidated	30.06.2011	31.12.2010	30.06.2010	31.12.2009
Capital Adequacy Ratio (%)	14.36%	15.70%	15.90%	16.72%
Shareholders' Equity	4,049	3,659	3,270	2,968
Return on Average Equity (%)	22.1%	18.6%	21.0%	23.0%

Non-performing Loans Provision Ratio (%)	127.3%	112.3%	105.6%	99.9%

RISK MANAGEMENT POLICIES

One of the major pillars of DenizBank's main strategies is to adhere to Risk Management principles. Risk Management policies consist of identification, measurement and management processes. In this respect, DenizBank conducts its banking activities by strictly adhering to risk management policies that aim to analyze risks and manage them by way of acceptable limits. Risk Management Policies were devised based on market risk, credit risk, liquidity risk, operational risk and structural interest risk categories. DenizBank has adopted it as an integral principle in all of her operations to develop systems that comply with Basel II and other guiding international risk management principles.

Market Risk

DenizBank measures market risk using internationally-accepted Value at Risk (VAR) method. VAR quantifies the loss of value that the portfolio of the Bank and her financial subsidiaries might suffer at a given time and confidence interval as a result of the price fluctuations in risk factors. VAR analyses are supported with scenario analysis and stress tests. This method allows adaptation to changing market conditions when the risk level is determined. The reliability of the model used in calculating VAR is periodically tested through back testing.

DenizBank has formulated risk policies and established risk-based limits with regards to her trading activities in money and capital markets.

Structural Interest Rate Risk

The Risk Management Group monitors the structural interest rate risk that the Bank is exposed to due to her balance sheet structure by using advanced models and controls assumed risks through defined limits. Interest sensitivity analyses are conducted to measure the impact of the Bank's maturity mismatch on net present value and income.

Liquidity Risk

Risk Management Group monitors the Bank's liquidity position that she carries as a result of her activities within defined limits. Limits are set to ensure continuity of the Bank operations by using the existing reserve facilities even under the worst-case scenarios that are created by taking into consideration the negative developments that may arise as a result of a change in market conditions or customer behavior.

Basel II/Credit Risk

The Risk Management Group undertakes efforts for compliance with Basel II/CRD criteria. Basel II consolidated credit risk is being calculated monthly using the standard method and monitored regularly since June 2008. DenizBank's Basel II dataset has been used for the consolidated reports of Dexia since September 2008.

As a part of Basel II preparation efforts, development of internal credit risk assessment models has been scheduled based on a well-defined plan and the modeling of necessary parameters has been completed for the most part.

Operational Risk

Bank activities that carry financial or non-financial operational risk are being recorded for DenizBank and its subsidiaries in a way that captures causes and impact of events, collections made and measures that will prevent the repetition of such events. These events are periodically reported to the senior management and updated as needed. Potential risk is assessed by way of Risk and Control Self Assessment and risk mitigation measures are taken before events transpire. On the other hand, the Business Continuity Program is coordinated to cover the design implementation and testing stages of these policies.

GENERAL OUTLOOK OF THE TURKISH ECONOMY AND THE BANKING SECTOR

Evaluations regarding the developments in Turkish Economy and banking sector in the first six months of 2011 have been summarized below.

While the recovery in the global economy has continued getting stronger, the differentiation in growth rates has led effects of the developed countries in the global economy to be weakened. It is expected that the global economy will grow by 4.5% in 2011 and 2012. While the expected growth rate for developed economies is 2.5%, it rose to 6.5% for developing economies.

The Turkish economy, which became the fastest growing economy in Europe with an 8.9% growth rate in 2010, has been sixteenth largest economy of the world and sixth largest economy of Europe. In 2010 year end, GDP per capita exceeded USD 10,000 again. Turkish economy has continued to grow increasingly in 2011 and recorded 11% growth in the first quarter of 2011. Unemployment rate which was 12% at the end of 2010, decreased to 9.9% in April 2011. It is expected that Turkey will reach high growth rates over after 2011 as well. Stable political environment, budget discipline, low indebtedness rate and high growth rates have drawn the attention of rating agencies and helped Turkey approach the "investment grade". It is doubtless that one of the elements that supported the Turkish economy was the robust banking sector.

Evaluation of the banking sector according to the data* as of June 2011:

-Loan volume (excluding financial sector loans)	TL 635 billion
TL Loan volume (excluding financial sector loans)	TL 452 billion
FX Loan volume (excluding financial sector loans)	USD 105 billion
-Deposit Volume (excluding interbank deposits)	TL 656 billion
TL Deposit Volume (excluding interbank deposits)	TL 456 billion
FX Deposit Volume (excluding interbank deposits)	USD 125 billion

In the first six months of 2011, the total loan volume of the Banking sector increased by 23% compared to the end of 2010 and by 44% compared to the first half of 2010 and reached TL 635 billion. In the first half of 2011, general purpose loans, commercial and corporate loans are the segments with priority impact on total loan increase. Consumer and credit card loans realized a higher increase compared to the first quarter without slowing down. While general purpose loans rose by 25%, the increase in commercial and corporate loans approached to 18%. While the growth of SME loans in five months was around 11%. Even if the growth rate of SME loans slowed down in the second quarter, the twelve-month performance of SME loans was still high with its 46% growth. The NPL ratio of SMEs which was 7.6% at the end of 2009 and fell to 4.5% at the end of 2010 decreased further to 3.6% as of May 2011. The NPL ratio of all loans which reached up to 5.8% during the crisis dropped to 3.1% at the end of May and 2.9% at the end of June 2011.

Total deposits reached TL 656 billion by increasing only 6% in the first six months. The sector's total equity rose by 4% y-t-d and reached TL 142 billion. The net profit of the banking sector in the first five months realized as TL 8.4 billion, recording an 18% y-o-y decrease.

* Banking sector data are extracts from the BRSA weekly bulletin including participation bank figures.
