

Two new 100% Capital Protected Funds from DenizBank based on Oil

DenizBank offers two new funds affiliated with increase and decrease in oil prices with 100% capital protection. In order to benefit from this opportunity, investors should not miss the public offering between dates of 3-7 September 2012.

Providing its customers investment products in a wide range, **DenizBank** offers two new funds for investors who see changes in oil prices as an opportunity. "DenizBank A.Ş 100% Capital Protected Fund Estimating Increase in Oil Prices" and "100% Capital Protected Fund Estimating Decrease in Oil Prices" will be offered to public between dates of 3-7 September 2012. New oil funds of DenizBank was developed for investors who estimate increase or decrease in Brent type crude oil in the next year in terms of American Dollars and who also do not want to risk losses from principal amount.

More options will be offered to investors

DenizBank Executive Vice President in charge of Retail Banking Gökhan Ertürk stated that with the two funds they issued, they are offering a new instrument to investors. Ertürk said, "Our new product is attractive as it is a fund that aims 100% capital protection and our customer can capitalize on their savings with increase and decrease in Brent oil prices within global economic development expectations. DenizBank will further expand its product range and offer more options to investors."

To benefit from DenizBank's new fund, investors only need to visit a DenizBank branch between 3-7 September 2012. After application dates, it will not be possible to buy this fund. Any amount can be bought from the fund, TL 1000 being at minimum. Maturity of the fund will be 312 days.
