

Two new capital-protected funds from DenizBank

DenizBank is introducing two new 102% capital-protected funds to the market. The funds which can be purchased until April the 6th protects capitals of investors even if USD/TL and Euro/TL rates do not drop at maturity end, and a return of 2% shall be gained. Investors should not miss the application dates in order to take advantage of this opportunity.

Offering its customers a wide range of investment alternatives, **DenizBank** now has two new investment instruments to offer fund investors. DenizBank shall be realizing the IPO of the two 102% capital-protected funds investing in the drop in USD/TL rates and Euro/TL rates until 6 April, 2012.

Investors' capitals are under protection

DenizBank Executive Vice President in charge of Retail Banking Group, **Gökhan Ertürk**, has made the following statement regarding the two new funds launched: "We shall be realizing the IPO of two 102% capital-protected funds until 6 April, 2012. The capitals of the investors shall be protected even if the USD/TL and Euro/TL rates do not drop by the end of maturity. The investors shall also gain a return of 2%. Thus, we shall be protecting the capitals of the investors. We are inviting all investors to purchase our new funds. DenizBank, from now on, shall be offering more alternatives to investors by widening its product range."

In order to take advantage of the new funds of DenizBank, all that investors have to do is to either stop by a DenizBank branch or to visit the Internet Branch via www.denizbank.com by 6 April, 2012. It will not be possible to purchase these funds after the application deadline. It is possible to purchase these capital-protected funds which will become due on 22 March, 2013 at any amount with a minimum amount of TL 1000.
