

Zorlu Elektrik offers important advantages to SMEs which are customers of DenizBank

Making a difference with the services and cooperation it develops in line with the needs of the SMEs, DenizBank continues to satisfy its customers. The SMEs which undertake to procure electricity services from Zorlu Elektrik for 24 months can use electricity free of charge for the first 3 months and 3.000 miles are awarded to them for flights.

Considering all kinds of support to the SMEs, which form the dynamo of Turkish economy, through its innovative services among its priorities, DenizBank continues to provide important advantages to the SME customers by the agreements it makes.

Within the scope of the cooperation between DenizBank and Zorlu Elektrik, the SMEs which undertake to procure electricity services from Zorlu Elektrik for 24 months do not pay any fee for electricity for the first 3 months and they are awarded 3.000 miles for flights.

To participate in the campaign, it is required to type "ZORLU" and send it to 3280 as SMS and communicate the incoming campaign code to Zorlu Elektrik Call Center at 444 80 82.

"We support the SMEs in all their needs"

DenizBank SME Banking Group Executive Vice President Murat Kulaksız stated that "We, as DenizBank, attach great importance to support the SMEs and artisans not only by financial solutions but also at all points which we believe will contribute to their development and growth. By cooperating with the leading companies in the sector, we intend to provide services that will facilitate the daily lives of our customers and decrease the costs that arise from their operations. In this scope, we provide a great advantage to the SMEs which are customers of DenizBank by our cooperation with Zorlu Elektrik. We have established cooperation with Ticket Restaurant for lunch meals, MNG Kargo for mails, Dry Center for dry cleaning services, Pronet for security needs, and Protranslate.net for translation services. We will continue to provide advantages to the SMEs by making further agreements to decrease the expenditures of the enterprises."
