Today in the markets

The postponement of the US tariffs on the EU to July 9th allowed the markets to turn positive yesterday after the negative closures on Friday.

In Europe, all assets except France closed positive, with the Stoxx 50 up by 0.37% and the DAX up by 0.83%. On a day when global equities closed at 1.24% and the basket excluding the US closed at -0.18%, emerging market assets also traded at -0.52%. The US dollar rose 0.59%. It appreciated against developed and emerging market currencies.

In the news flow followed Japan this morning, the lowest b/c ratio since July was seen in the issuance of 40y bonds. Asian pricing is mixed, while US futures are slightly negative.

Unfortunately, the weakness in domestic equities continues. Trading volume is low and it is hard to find new buyers. CBRT closed the day with 292 billion lira net funding, while TLREF and AOFM are at 49%. Lira closed at-0.04% and CDS at 0.37%.

Deniz Invest Model Portfolio

Deniz Invest Model Portfolio is a medium-long-term stock recommendation list prepared by the Deniz Invest Strategy and Research Department according to fundamental analysis criteria. The positions taken are long only. There is no numerical/percentage return target. There is no limit on the number of companies. There is no obligation to make changes in any frequency/calendar. Strategy and Research Department analysts have the right not to change the portfolio within the calendar year if market conditions do not allow it. Even if there is no return potential for the companies in the portfolio in terms of fundamental analysis (as a valuation), they can continue to remain in the list with their past and future trust in the company brand. There is no obligation for companies in the portfolio to have a BUY recommendation. Department analysts can also choose companies within the list with their HOLD and/or Under Review (UR) suggestions.
