### Today in the markets

Global markets started the week on a positive note as easing concerns over the U.S. government shutdown and renewed optimism around trade supported risk appetite. U.S. President Donald Trump signaled that a trade agreement with India is nearing completion, noting that tariffs on Indian goods could be reduced at some point. The remarks came during the swearing-in ceremony of Sergio Gor as U.S. Ambassador to India. Trump later stated that tariffs had been high due to India's Russian oil purchases, but with imports now declining, the U.S. is prepared to lower duties in the future.

Meanwhile, the record 41-day government shutdown in the U.S. may soon come to an end. The Senate advanced a bipartisan deal that would fund federal agencies through January 30. Relief measures include reinstating food assistance, back pay for furloughed workers, and resumed airport operations after widespread flight cancellations. The proposal adds roughly USD 1.8 trillion annually to the U.S. debt and paves the way for a December vote on extending health insurance subsidies. U.S. equities responded strongly to the progress with S&P 500 up 1.6%, Nasdaq gained 2.3%, and the Dow added 0.81% points. Al-focused tech stocks led the rally, with Nvidia, Palantir, AMD, and Micron among the top gainers. Comments from Fed Governor Stephen Miran in favor of a 50bps cut in December further boosted sentiment, although risks remain given the ongoing uncertainty in the House.

In Turkey, the BIST 100 index declined by 1.24% to close at 10,789. According to the Turkish Statistical Institute, industrial production fell by 2.2% on a monthly basis in September, despite recording a 2.9% annual increase. While today's domestic data calendar is light, retail sales figures will be monitored. As the heavy earnings season draws to a close, a slight reduction in market volatility may be expected. Within our coverage, we most recently reviewed the financial results of ALFAS TI, VESTL TI, ALKIM TI, KONTR TI, AKSEN TI, INDES TI, TEZOL TI, SELEC TI, DOAS TI and BIMAS TI.

# DOAS: Review of Financial Results / slightly positive

Doğuş Otomotiv announced TRY 58,297 million in sales revenue (Consensus: TRY 54,672 million / Deniz Yatırım: TRY 56,745 million), TRY 4,323 million in EBITDA (Consensus: TRY 3,390 million / Deniz Yatırım: TRY 3,754 million), and TRY 2,120 million in net income (Consensus: TRY 1,502 million / Deniz Yatırım: TRY 2,386 million) for 3Q25. A positive effect of TRY 561 million was realized under the monetary gain/loss item in the 3Q25 financials..

#### Positive balance sheet details

✓ Annual increase in sales revenue, EBITDA, and net income, in addition to an upward revision in guidance.

#### Negative balance sheet details

✗ Increasing net debt position and NWC.

#### Our brief assessment of the balance sheet

→ While we positively view the partial recovery from the ongoing weak financial results along with the revision in sales volume guidance, we believe that the increasing net debt and NWC may limit this effect.

Overview: The Company will hold a teleconference today following the 3Q25 financials. Our model had a 2025 sales volume expectation of 132,000 units. A quick review suggests that the changes made in the guidance, combined with the increasing net debt position and updates in our macro forecasts, do not indicate a significant need for revision. We strongly state that we will review our model for the Company after the meeting and reserve the right to change our potential price and/or recommendation positions. Currently, our 12-month target price for Doğuş Otomotiv is TRY 297.50, and we maintain our "HOLD" recommendation. The stock has underperformed the BIST 100 index by 5% since the beginning of the year. Based on trailing 12-month data, the stock is trading at 5.9x P/E and 4.1x EV/EBITDA multiples.

### ALFAS: Review of Financial Results / slightly negative

Alfa Solar Enerji announced TRY 2,027 million in revenue, TRY 71 million in EBITDA, and a net loss of TRY 53 million for 3Q25. Due to inflation accounting, a positive effect of TRY 26 million was realized under the monetary gain/loss item.

#### Positive balance sheet details

✓ Real revenue growth and a decreasing net debt position.

#### **Negative balance sheet details**

Weak operational profitability.

#### Our brief assessment of the balance sheet

→ Despite the continuing weak operational profitability, we expect the decreasing net debt position and increasing production capacity to limit this effect.

<u>Overview</u>: While the decreasing operational profitability creates downward pressure on our model, the increasing production capacity, decreasing net debt position, and changes in our macro forecasts limit this effect. We currently reserve the right to revise our stance, but we maintain our 12-month target price for Alfa Solar Enerji at TRY 71.84, and our recommendation as "HOLD".

# **BIMAS: Review of Financial Results / positive**

Bim Birleşik Mağazalar reported revenue of TRY 179,681 million in 3Q25 (Consensus: TRY 180,211 million / Deniz Investment: TRY 181,037 million), EBITDA of TRY 13,235 million (Consensus: TRY 11,111 million / Deniz Investment: TRY 11,347 million), and net profit of TRY 5,275 million (Consensus: TRY 4,538 million / Deniz Investment: TRY 3,558 million). In 3Q25 financials, a monetary gain of TRY 5,045 million was recorded under the monetary gain/loss item.

#### Positive balance sheet details

 $\checkmark$  Real sales growth and stronger-than-expected EBITDA performance.

#### Negative balance sheet details

Continued pressure from high indebtedness and rising financial expenses.

### Our brief assessment of the balance sheet

- → 3Q25 results indicate a positive outlook supported by real revenue growth and strong EBITDA expansion driven by operational leverage. Improvement in gross margin and a decline in operating expenses-to-sales ratio supported profitability, while higher financial expenses partially offset this positive picture. Considering the ongoing financial pressure but robust EBITDA focus, we evaluate the 3Q25 financials as positive.
- Overview: Following the results, we revised our 12-month target price for Bim Birleşik Mağazalar from TRY 760.46 to TRY 816.60, maintaining our BUY recommendation, reflecting adjustments in macro assumptions and the lower net debt position.
  Based on 2026 estimates, BIMAS trades at 5.2x EV/EBITDA. Year-to-date, the share underperformed the BIST 100 index by 6%, and on a trailing 12-month basis, it trades at 20.3x P/E and 9.4x EV/EBITDA multiples.

As Deniz Investment Strategy and Research Department, we do not make any investment consultancy and/or buy-sell proposals in this study. Investors should make decisions on their own portfolio with their own free will. The aim of this study is to reflect the values they get on a daily basis through the scoring system established over the changes of the selected indicators (price level, trading volume, RSI and MACD).

Shares that meet each of the following conditions are given 25 full points. Evaluation was made out of 100 full points. The shares in the BiST 100 index are ranked from largest to smallest according to their total scores.

1) The trading volume on the basis of shares should be above the a werage rading volume of the last 3 days and the last closing price should be above the 3-day prioring average value and the previous doing price.

2) The last closing price should be above the 3-day prioring average value and the previous dosing price should be above the 3-day prioring price should be above the 3-day prioring average value and the previous dosing price.

3) The last value for the RSI indicator should be above the 3-day prioring average value of the last 5 days.

4) He last value for the MSCI indicator should be above the everage value of the last 5 days and 800 when the 300.

#### Rating

Deniz Yatırım analysts calculate 12-monthly target values (prices) and their associated potential return by using one or more valuation method for each stock. Our 12-monthly rating system includes 3 different general investment recommendations which are BUY, HOLD and SELL.

**BUY:** This refers to a valuation where a stock is expected to yield a total potential return of <u>minimum 20% and above</u> in the next 12 months. **HOLD:** This refers to a valuation where a stock is expected to yield a total potential return <u>between 0-20%</u> in the next 12 months. **SELL:** This refers to a valuation where a stock is expected to yield a total potential return <u>lower than 0%</u> in the next 12 months.

Recommendation	Potential Return (PR), 12-month
BUY	≥%20
HOLD	%0-20
SELL	≤%0

Deniz Yatırım analysts evaluate stocks in light of potential catalysts, triggering developments, and risks, as well as market, sector, and competitor developments. After publicly disclosing general investment recommendations, our analysts closely monitor stocks. However, if stock price fluctuations cause values to exceed the limits of our rating system, our analysts may choose not to change their recommendation regarding the stock and/or place it Under Review (UR). There is absolutely no time constraint for our analysts in terms of rating and/or recommendation updates in the event of a potential UR. From a valuation perspective, if there is mathematical potential for an increase or risk of decline, our analysts may make recommendations outside the BUY-HOLD-SELL framework. They consider the general trend and recent developments in the sector and company beyond potential return levels that form the basis of the rating. In such cases, the evaluation may consider various factors, such as general sector conditions, potential risk and return, parameters in the latest financial statements, and political and geopolitical factors. Our analysts do not use a mechanical process that only considers mathematical values when making BUY-HOLD-SELL recommendations.
