Today in the markets

Global markets focused on the growing consensus that the Federal Reserve will refrain from cutting interest rates in December. Thursday's long delayed September nonfarm payrolls report showed stronger-than-expected job growth, but the unemployment rate rose to 4.4%, the highest in four years. As the final labor market reading ahead of the December FOMC meeting, the data reinforced expectations that the Fed will keep rates unchanged amid ongoing economic uncertainty. Fed Governor Michael Barr also stated that the central bank must proceed cautiously with further rate cuts while inflation remains above target. U.S. stock futures steadied on Friday following Thursday's sharp reversal, as Al-related volatility continued and firm labor data diminished the case for imminent rate cuts.

U.S. equities closed lower on Thursday despite Nvidia's strong earnings initially lifting sentiment. Stocks opened sharply higher, but gains faded during the session as high valuation concerns returned. The Dow Jones fell 0.84%, the S&P 500 dropped 1.56%, and the Nasdaq lost 2.15%. Major tech names came under pressure, with Nvidia, AMD, Palantir, Micron Technology, and Oracle falling between 3.2% and 10.9%. Nvidia reversed early gains despite reporting better-than-expected results, closing down 3.2% after CEO Jensen Huang highlighted uncertainty around OpenAI's \$100 billion datacenter pledge. On the other hand, Walmart jumped 6% after raising its full-year guidance on strong e-commerce and price-sensitive demand.

In Turkey, the BIST 100 index gained 0.70% to close at 10,979, the positive trend observed since the beginning of the week was maintained. A weekly close above 11,000 will be watched for maintaining the upward trend. On the macro front, according to weekly data from the Central Bank of Turkey (CBRT), total reserves increased to USD 187,4 billion the week ending November 14. Non-residents recorded a net equity outflow of USD 158.8 million during the same period. The consumer confidence index rose 1.6% month-on-month in November, reaching a level of 85. Today, attention will turn to the release of the financial services confidence index.

As Deniz Investment Strategy and Research Department, we do not make any investment consultancy and/or buy-sell proposals in this study. Investors should make decisions on their own portfolio with their own free will. The aim of this study is to reflect the values they get on a daily basis through the scoring system established over the changes of the selected indicators (price level, trading volume, RSI and MACD).

Shares that meet each of the following conditions are given 25 full points. Evaluation was made out of 100 full points. The shares in the BIST 100 index are ranked from largest to smallest according to their total scores.

1) The trading volume on the basis of shares should be above the average trading volume of the last 3 days and the last dosing price should be above the previous day's dosing price.

2) The last solar given should be above the 3-day moving average value and the previous dosing price should be above the 3-day moving average value and the previous dosing price should be above the 3-day moving average value and the previous dosing price should be above the 3-day moving average value of the 18-day for the 85 indicator should be above the 3-day moving average value of the last 5-days.

3) The last value for the MACD indicator should be above the eaverage value of the last 5-days and 300 the 18-day for the MACD indicator should be above the last 5-days and 300 the start 5-days.

Deniz Yatırım analysts evaluate stocks in light of potential catalysts, triggering developments, and risks, as well as market, sector, and competitor developments. After publicly disclosing general investment recommendations, our analysts closely monitor stocks. However, if stock price fluctuations cause values to exceed the limits of our rating system, our analysts may choose not to change their recommendation regarding the stock and/or place it Under Review (UR). There is absolutely no time constraint for our analysts in terms of rating and/or recommendation updates in the event of a potential UR. From a valuation perspective, if there is mathematical potential for an increase or risk of decline, our analysts may make recommendations outside the BUY-HOLD-SELL framework. They consider the general trend and recent developments in the sector and company beyond potential return levels that form the basis of the rating. In such cases, the evaluation may consider various factors, such as general sector conditions, potential risk and return, parameters in the latest financial statements, and political and geopolitical factors. Our analysts do not use a mechanical process that only considers mathematical values when making BUY-HOLD-SELL recommendations.
