**INDEPENDENT AUDITOR'S REVIEW REPORT,
CONSOLIDATED FINANCIAL STATEMENTS AND NOTES
FOR THE THREE MONTH PERIOD ENDED 31 MARCH 2026**

- I. Independent Auditor's Review Report
- II. Publicly Disclosed Consolidated Financial Report

Convenience Translation of the Auditor's Review Report Originally Issued in Turkish

Independent Auditors' Report on Review of Consolidated Interim Financial Information

To the Board of Directors of DenizBank Anonim Şirketi;

Introduction

We have reviewed the consolidated statement of financial position of DenizBank A.Ş. ("the Bank") and its subsidiaries (together will be referred as "the Group"), at March 31, 2026 and the related consolidated statement of profit or loss, consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in shareholders' equity, consolidated statement of cash flows and a summary of significant accounting policies and other explanatory notes to the consolidated financial statements for the three month period then ended. The Group Management is responsible for the preparation and fair presentation of interim consolidated financial information in accordance with the Banking Regulation and Supervision Agency ("BRSA") Accounting and Financial Reporting Legislation which includes "Regulation on Accounting Applications for Banks and Safeguarding of Documents" published in the Official Gazette no.26333 dated 1 November 2006, and other regulations on accounting records of Banks published by Banking Regulation and Supervision Agency and circulars and interpretations published by BRSA and Turkish Accounting Standard 34 "Interim Financial Reporting" for those matters not regulated by the aforementioned regulations. Our responsibility is to express a conclusion on these interim consolidated financial statements based on our review.

Scope of Review

We conducted our review in accordance with the Standard on Review Engagements (SRE) 2410, "Limited Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial reporting process, and applying analytical and other review procedures. A review of interim financial information is substantially less in scope than an independent audit performed in accordance with the Independent Auditing Standards and the objective of which is to express an opinion on the financial statements. Consequently, a review of the interim financial information does not provide assurance that the audit firm will be aware of all significant matters which would have been identified in an audit. Accordingly, we do not express an opinion.

Basis of Qualified Conclusion

As explained in Section Five Part II.h.3, the accompanying consolidated financial statements as at March 31, 2026 include an expense amounting to TL 8,700,000 the entire amount of which was recognized as an expense in prior years by the Group management for the possible current year effects of adverse circumstances that may arise from potential changes in the economy and market conditions, and which does not meet the recognition criteria of TAS 37 "Provisions, Contingent Liabilities and Contingent Assets".

Report on Other Obligations Arising from Legislation

Qualified Conclusion

Based on our review, except for the effect of the matter referred in the basis of qualified conclusion paragraph on the consolidated financial statements, nothing has come to our attention that causes us to believe that the accompanying consolidated financial statements do not give a true view of the consolidated financial position of the Group at March 31, 2026 and of the results of its consolidated operations and its consolidated cash flows for the three month period then ended in all material respects in accordance with the BRSA Accounting and Financial Reporting Legislation.

Report on other regulatory requirements arising from legislation

Based on our review, nothing has come to our attention that causes us to believe that the financial information provided in the accompanying interim activity report in Section VII, are not consistent with the reviewed consolidated financial statements and disclosures in all material respects.

SECTION ONE

GENERAL INFORMATION

I. History of the Parent Bank including its incorporation date, initial status, amendments to legal status

Denizbank A.Ş. ("the Bank") following the resolution of the High Council of Privatization numbered 97/5 and dated 20 March 1997 to privatize 100% of shares of Denizbank A.Ş., share sale agreement between Zorlu Holding A.Ş. and the Privatization Administration was signed on 29 May 1997 and the Bank started its activities on 25 August 1997 upon the receipt of its official authorisation. Bank's shares have been quoted on Borsa Istanbul ("BIST") on 1 October 2004.

Dexia Participation Belgique SA, owned 100% directly and indirectly by Dexia SA/NV, acquired 75% of the outstanding shares of the Bank from Zorlu Holding A.Ş. on 17 October 2006, and Dexia Participation Belgique SA's partnership share has reached 99,85% with subsequent acquisitions following the share transfer.

On 27 December 2012, 99,85% of the Bank's shares were transferred from Dexia Group to Sberbank of Russia ("Sberbank") with a total purchase price of TL 6,90 billion (Euro 2,98 billion).

On 22 May 2018, Emirates NBD Bank PJSC (Emirates NBD) and Sberbank of Russia (Sberbank) signed a definite contract regarding the sales of 99,85% share of the Bank held by Sberbank and with the "Renewed Contract" signed on 2 April 2019, the parties have reached an agreement to the amount of TL 15,48 billion within the rearranged framework regarding the total amount of the relevant shares based on the consolidated equity of the Bank amounting to TL 15,51 billion. Upon obtaining the approvals of the regulatory authorities of Turkey, Russia, United Arab Emirates and the other countries where the Bank operates, the share transfer was completed on 31 July 2019.

As of 31 July 2019, as a result of ENBD's acquisition of 99,85% of DenizBank's shares, obligations arose for ENBD to make mandatory tender offer (MTO) for the Bank as per the provisions of the Capital Markets Board's (CMB) Communiqué on Takeover Bids (II-26.1); and sell-out right; the Bank's shareholders other than ENBD got the right to sell their shares to ENBD as per the provisions of the CMB's Communiqué on Squeeze Out and Selling Rights (II-27.2).

Within the scope of the Communiqué on Squeeze Out and Selling Rights, the rights to sell were used by other shareholders within the three-month sell-out right-ending period between 1 August 2019 and 31 October 2019. Upon completion of the three-month sell-out right-ending period on 31 October 2019, ENBD applied to the Bank on 3 November 2019, requesting the exclusion of other shareholders, who did not use their right to sell. In this context, in the process of ENBD's exercising its right to squeeze out and removing it from the BIST; regarding the amendment of Article 6 of the Bank's articles of association and the capital decrease by canceling 1.426.214.154 public shares of other shareholders who do not use the Bank's right to sell, and making capital allocation to the ENBD simultaneously with the shares issued against these shares. Necessary regulatory approvals were obtained and were approved at the Extraordinary General Assembly Meeting held on 12 December 2019. The "Issuance Document" approved by the CMB with the decisions of the mentioned General Assembly Meeting was registered in the trade registry on 13 December 2019.

Within the scope of Central Registry Agency application, the shares of the shareholders other than the controlling shareholder were canceled, the newly issued shares were transferred to the controlling shareholder account and TL 21,2, which is the price determined in accordance with the CMB regulations, was paid to the shareholders on 13 December 2019. At the end of this transaction, the share of ENBD in the Bank has reached to 100%. Following the completion of the process, the Bank's shares were removed from the stock market as of 16 December 2019.

At the Board of Directors' meeting dated 9 January 2020, it has been decided to be submitted to the approval of the General Assembly for the increase of the full TL 3.316.100.000 paid-in capital of the Bank by full TL 2.380.000.000 in cash, and amending the Article 6 titled "Capital of the Bank" of the Articles of Association of the Bank. The amendment was approved in the Extraordinary General Assembly Meeting held on 3 February 2020. The total capital increase amounting to full TL 2.380.000.000 was paid in cash by ENBD before the registration of the capital increase.

With the decision of the Board of Directors of the Bank dated 1 April 2024 and 18 April 2024 it was decided to increase the capital of the Parent Bank from TL 5.696.100.000 to TL 19.638.600.000 and to increase the capital of the Bank in cash by TL 13.942.500.000 to be covered from the amount transferred to the name and account of ENBD as 'capital advance' as a result of the early repayment of the subordinated loans ("TIER II") obtained from ENBD, the main shareholder of the Bank, within the framework of the BRSA's approval, and within this scope, it has been approved at the Extraordinary General Assembly Meeting on 16 May 2024 and capital increase was registered on 23 May 2024 to amend Article 6 of the Articles of Association of the Parent Bank titled "Capital of the Bank" accordingly.

IV. Explanations regarding the persons and institutions that have qualified shares in the Parent Bank

Commercial Title	Share Amounts	Share Percentages %	Paid-in Capital	Unpaid Capital
Emirates NBD Bank PJSC	19.638.600	100	19.638.600	--

ENBD is the controlling party of the Parent Bank's capital having both direct and indirect qualified shares.

As of 31 March 2026 the capital structure of ENBD is as follows:

Shareholders	Curent Period Share Percentages %	Prior Period Share Percentages %
Investment Corporation of Dubai	40,92	40,92
DH 7 LLC	14,84	14,84
Capital Assets LLC	5,33	5,33
Publicly traded	38,91	38,91
Total	100,00	100,00

V. Type of services of the Parent Bank and summary information including the areas of activity

The Parent Bank is a private sector deposit bank which provides banking services to its customers through 576 domestic branches (31 December 2025: 574) and 2 foreign branch as of 31 March 2026 (31 December 2025:2).

Activities of the Parent Bank as stated in the 3rd clause of the Articles of Association are as follows:

In accordance with the Banking Law and regulations;

- Performing all kinds of banking activities,
- Dealing with transactions on all kinds of capital market instruments within the limits set by the related regulations and Capital Market Law regulations,
- Participating, undertaking the management and performing control activities in domestic and foreign entities and banks, financial institutions and all kinds of investment partnerships by obtaining the permission of the Banking Regulation and Supervision Agency in accordance with the Banking Law, by purchasing its shares or share certificates,
- Conducting all kinds of insurance agency transactions in domestic and abroad and signing insurance agency agreements with insurance companies for this purpose.

Apart from the above-mentioned activities, in case different activities deemed advantageous and necessary for the Parent Bank are to be undertaken in the future, they will be submitted to approval of the General Assembly based on Board of Director's decision and the Parent Bank will be able to implement activities after the relevant decision is made by General Assembly.

VI. A short explanation on application differences between consolidation practices as per the Regulation on Preparation of Consolidated Financial Statements of Banks and as per the Turkish Accounting Standards, and entities subject to full or proportional consolidation or deducted from equity or not subject to any of these three methods

Pursuant to "Communiqué on Preparation of Consolidated Financial Statements of Banks", Banks are obliged to prepare consolidated financial statements with their associates and subsidiaries qualifying as credit institution and financial institution by applying Turkish Accounting Standards. There is no difference between the consolidated financial statements based on the related Communiqué and those prepared in accordance with Turkish Accounting Standards except the scope difference regarding non-financial associates and subsidiaries. Information in regards to consolidated subsidiaries and consolidation methods are given in Section Three, note III.

VII. Existing or potential, actual and legal barriers to immediate transfer of capital or repayment of debts between the Parent Bank and its subsidiaries

None.

I. Explanations on the presentation principles

a. Preparation of the consolidated financial statements and the accompanying footnotes in accordance with Turkish Accounting Standards and Regulation on the Procedures and Principles for Accounting Practices and Retention of Documents by Banks

Consolidated financial statements have been prepared in accordance with the regulations, communiqués, explanations and circulars published with respect to accounting and financial reporting principles by the Banking Regulation and Supervision Agency (“BRSA”) within the framework of the provisions of the Regulation on the Procedures and Principles for Accounting Practices and Retention of Documents by Banks published in the Official Gazette no. 26333 dated 1 November 2006 in relation with the Banking Law no. 5411, as well as the Turkish Accounting Standards (“TAS”) and Turkish Financial Reporting Standards (“TFRS”) enforced by the Public Oversight Accounting and Auditing Standards Authority (“POA”) (hereinafter collectively referred to as “BRSA Accounting and Financial Reporting Legislation”). The form and contents of the consolidated financial statements which have been prepared and which will be disclosed to public have been prepared in accordance with the “Communiqué on the Financial Statements and Related Explanations and Footnotes to be Announced to Public by the Banks” and “Communiqué On Disclosures About Risk Management To Be Announced To Public By the Banks” as well as the communiqués that introduce amendments and additions to these. Parent Bank keeps its accounting records in Turkish Lira, in accordance with the Banking Law, Turkish Code of Commerce and Turkish Tax legislation.

Consolidated financial statements have been prepared based on historical cost principle, except for the financial assets and liabilities measured at their fair values.

The amounts in the consolidated financial statements and explanations and footnotes relating to these statements have been expressed in Thousands of Turkish Lira unless otherwise stated.

In the preparation of consolidated financial statements according to TAS, the management of the Parent Bank should make assumptions and estimations regarding the assets and liabilities in the balance sheet and the contingent issues as of the balance sheet date. These assumptions and estimations include the fair value calculations and impairment of financial assets and are reviewed regularly, necessary corrections are made and the effects of these corrections are reflected in the statement of profit or loss. The assumptions and estimations used are explained in the related footnotes.

The Parent Bank and its consolidated subsidiaries are referred to as "DFS Group" in the footnotes related to the consolidated financial statements.

b. Accounting policies and changes in the presentation of financial statements

Accounting policies and valuation principles used in the preparation of the consolidated financial statements are determined in accordance with the regulations, communiqués, interpretations and legislations related to accounting and financial reporting principles published by BRSA, and in cases where a specific regulation is not made, TAS/TFRS (hereinafter collectively referred to as “BRSA Accounting and Financial Reporting Legislation”) put into effect by POA shall be valid.

On November 23, 2023, Public Oversight Agency (“POA”) announced that financial statements of entities applying Turkish Financial Reporting Standards and the Financial Reporting Standard for Large and Medium-Sized Enterprises (BOBİ FRS) for the annual reporting period ending on or after 31 December 2023, “Turkish Accounting Standard 29 Financial Reporting in Hyperinflationary Economies” and “BOBİ FRS Section 25 Financial Reporting in Hyperinflationary Economies,” adjusted for the effects of inflation; however, the BRSA has issued an announcement stating that institutions or organizations authorized to regulate and supervise in their respective fields may establish transition dates different from those outlined above regarding the application of the provisions in IAS 29 or BOBİ FRS. Pursuant to this announcement, in accordance with BRSA Decision No. 10744 dated December 12, 2023, the financial statements of banks, as well as financial leasing, factoring, financing, savings financing, and asset management companies as of 31 December 2023, are exempt from the inflation adjustment required under IAS 29; Through Decision No. 10825 dated January 11, 2024, the BRSA set the transition date for the application of IAS 29 as January 1, 2025; Subsequently, by Decision No. 11021 dated December 5, 2024, it was decided not to apply IAS 29 in 2025 either; and pursuant to Decision No. 11340 dated December 18, 2025, it was decided not to apply IAS 29 in 2026. In this context, no inflation adjustment was made in accordance with IAS 29 when preparing the financial statements as of 31 March 2026.

(Currency: Thousands of TL - Turkish Lira)

c. Restatements in the Section Seven Interim Activity Report

As a result of the inadvertent error in the presentation of the consolidated financial information under the heading “b - Summary Consolidated Financial highlights - Income Statement” within Section Seven - Interim Activity Report of the interim consolidated financial report published on April 21, 2026, the interim activity report has been corrected and the relevant consolidated financial information has been restated accordingly. The resulting differences are included in the table below (Amounts are presented in millions of Turkish Lira).

	31.03.2026	31.03.2026	31.03.2025	31.03.2025
	Previous	New	Previous	New
Discontinued operations period net profit/loss	12.364	--	19.117	--
Net Profit	--	19.117	--	12.364

II. Explanation on the strategy for the use of financial instruments and transactions denominated in foreign currencies

a. Strategy for the use of financial instruments

DFS Group’s external sources of funds are comprised of deposits with various maturity periods, and external borrowings. Funds provided are generally fixed rate and are interested in high yield financial assets. The majority of the funds are allocated to high yield, fixed or floating interest instruments, such as Turkish Lira and foreign currency Government debt securities and Eurobonds in order to diversify the assets and support liquidity as well as being allocated to loans with a selective approach. The liquidity structure that ensures meeting all liabilities falling due, is formed by keeping sufficient levels of cash and cash equivalents by diversifying the sources of funds. The Bank assesses the maturity structure of the sources, and the maturity structure and yield of assets at market conditions and adopts a high yield policy in long-term assets.

DFS Group carries risks within pre-determined risk limits in short-term currency, interest and price movements in money and capital markets and due to changes in market conditions. These positions are closely monitored by the Risk Management System of the Parent Bank and the necessary precautions are taken if the limits are exceeded or should there be a change in the market environment. In order to avoid interest rate risk, assets and liabilities with fixed and floating interests are monitored, taking the maturity structure into consideration. The asset-liability balance is monitored on a daily basis in accordance with the maturity structure and foreign currency type. The risks associated with short-term positions are hedged through derivatives such as forwards, swaps and options.

The net foreign currency position of DFS Group in foreign enterprises is evaluated together with the Parent Bank’s net foreign currency position and all positions are evaluated within the framework of risk limits.

b. Transactions denominated in foreign currencies

Foreign currency exchange rates used in converting transactions denominated in foreign currencies and their presentation in the financial statements

The DFS Group recognises the transactions denominated in foreign currencies in accordance with TAS 21 “The Effects of Changes in Foreign Exchange Rates” and the foreign exchange gains and losses arising from transactions that are completed as of the end of the period are converted to TL by using historical foreign currency exchange rates. As at the end of the reporting dates, balances of the foreign currency denominated assets and liabilities are converted into TL by using foreign currency exchange rates of the Parent Bank and the resulting exchange differences are recorded as foreign exchange gains and losses. The Parent Bank’s foreign currency exchange rates used in valuations as of the period ends are as follows:

	31 Mart 2026	31 Aralık 2025	31 Mart 2025
US Dollar	TL 44,3961	TL 42,8457	TL 37,7656
Euro	TL 50,9294	TL 50,2859	TL 40,7019

Foreign exchange gains and losses included in the net profit and loss

As of 31 Mart 2026, net foreign exchange loss included in the statement of profit or loss amounts to TL 7.674.266 (1 January - 31 March 2025: TL 4.219.312 net foreign exchange loss).

Total amount of valuation fund arising from foreign currency exchange rate differences

Parent Bank has translated the assets and liabilities of its FC subsidiaries within the scope of consolidation from the period-end closure exchange rate and has converted the income and expense items to Turkish Lira using annual average Parent Bank rates. Translation difference profit/loss amounts arising from the conversion

of statements of profit or loss of the consolidated subsidiaries to Turkish Lira and the Turkish Lira equivalent of their equities as well as the “Subsidiaries” amounts accounted for at the Parent Bank are accounted in the consolidated financial statements under “Other Accumulated Comprehensive Income That Will Be Reclassified in Profit or Loss”.

Total of the relevant conversion differences are TL 58.067.499 as of 31 March 2026 (31 December 2025: TL 57.276.638).

The foreign exchange difference of TL 688.683 (31 December 2025: TL 683.799) arising from the translation of the financial statements of Bahrain branch of the Parent Bank to Turkish Lira in accordance with TAS 21 has been recorded under “Other Accumulated Comprehensive Income That Will Be Reclassified in Profit or Loss”.

In order to hedge the foreign exchange rate risk arising from the foreign currency subsidiaries of the DFS Group, a net investment hedging strategy is applied. The same amounts of foreign currency deposits are designated as hedging instruments and the effective portion of the change caused by the change in exchange rate of these financial liabilities is recognised in hedge funds account under equity.

III. Information regarding the consolidated subsidiaries

Consolidated financial statements have been prepared in accordance with TFRS 10, the “Turkish Accounting Standard for Consolidated Financial Statements”.

Deniz Yatırım Menkul Değerler A.Ş. (Deniz Yatırım), Deniz Portföy Yönetimi A.Ş. (Deniz Portföy), Denizbank AG, JSC Denizbank, Deniz Finansal Kiralama A.Ş. (Deniz Leasing), Deniz Faktoring A.Ş. (Deniz Faktoring), Deniz Gayrimenkul Yatırım Ortaklığı A.Ş. (Deniz GYO) CR Erdberg Eins GmbH & Co KG (CR Erdberg) and Denizöde Elektronik Para ve Ödeme Hizmetleri A.Ş. (“Denizöde”) shares of which are owned directly or indirectly by the Parent Bank are the subsidiaries included to the full scope consolidation.

DFS Funding Co. is the structured entity established for the Parent Bank’s securitization transactions, and consolidated in the accompanying consolidated financial statements. The Parent Bank or any of its subsidiaries do not have any shareholding interests in this company.

Among the subsidiaries of the Parent Bank, Intertech Bilgi İşlem ve Pazarlama Ticaret A.Ş. (“Intertech”) and its affiliate controlled together, Bantaş Nakit ve Kıymetli Mal Taşıma ve Güvenlik Hizmetleri A.Ş. (“Bantaş”); Intertech’s subsidiary Neohub Teknoloji Yazılım Pazarlama ve Danışmanlık A.Ş., Neo Elektronik Ticaret Bilişim Teknolojileri Yazılım ve Danışmanlık A.Ş. ve Neohub Bulut Teknolojileri A.Ş.; Deniz Yatırım’s subsidiary Ekspres Gayrimenkul Turizm Yatırım İşletme ve Ticaret A.Ş. (“Ekspres Gayrimenkul”); Denizbank AG’s subsidiary Deniz Immobilien Service GmbH (“Deniz Immobilien”) have not been included to the consolidation since they are non-financial subsidiaries. Non-financial subsidiaries are recognized at fair value in accordance with “TFRS 9 Financial Instruments” (“TFRS 9”) within the framework of TAS 27 “Separate Financial Statements”. Investments in associates and jointly controlled entities are carried at cost less any provision for diminution in value.

Important changes in consolidated subsidiaries during the period

None.

Consolidation principles of the subsidiaries

Subsidiaries are the entities whose capital or management is controlled directly or indirectly by the Parent Bank. Subsidiaries are consolidated through the full consolidation method.

Control is considered as possessing power of the Bank over an investment in a legal entity, being exposed to variable returns due to its relationship with the legal entity invested, or having the right to use in these returns, and having the ability to use its power over the investee to influence the amount of returns.

This method aims to combine hundred percent of the assets, liabilities, income, expenses and off-balance sheet items of the subsidiaries included in the consolidated financial statements with the assets, liabilities, income, expenses and off-balance sheet items of the Parent Bank and to present minority rights as separate items in the balance sheet and the statement of profit or loss.

The carrying amount of the Parent Bank’s investment in each subsidiary has been settled with the portion of the Parent Bank in the equity of the subsidiaries.

All intercompany transactions and intercompany balances between the consolidated subsidiaries and the Parent Bank are eliminated.

Financial statements used in the consolidation are prepared as of 31 March 2026 and in order to ensure the application of the identical accounting policies for similar transactions and events in similar circumstances, necessary adjustments were made on these financial statements of the subsidiaries considering the materiality level.

IV. Explanations on forward and option contracts and derivative instruments

DFS Group's derivative transactions mainly consist of foreign currency and interest rate swaps, foreign currency options and foreign currency forward contracts.

In accordance with TFRS 9, forward foreign currency purchase/sale contracts, swaps, options and futures are classified as "Derivative Financial Assets/Liabilities at Fair Value Through Profit or Loss". Derivative transactions are recorded with their fair values at contract date. Also, the notional amounts of liabilities and assets arising from the derivative transactions are recorded in off-balance sheet items at their contractual amounts.

Derivative transactions are valued at fair value subsequent to initial recognition and are presented in the "Derivative Financial Assets/Liabilities at Fair Value Through Profit or Loss" items of the consolidated balance sheet depending on the positive or negative fair value amounts. Gains and losses arising from the change in the fair value are recognised in the statement of profit or loss. Fair value of derivatives are calculated either by marking the fair values in the market or by using the discounted cash flow model.

V. Explanations on interest income and expenses

Interest income and expenses are recognised by applying the effective interest method. DFH Group tracks the accruals and discounts of non-performing receivable balances until the moment they are transferred to the follow-up accounts in the loan accrual/discount accounts in accordance with the Uniform Chart of Accounts ("UCA"). After loans are classified as non-performing loans, no discount calculation is made.

VI. Explanations on fee and commission income and expenses

Fee and commission income and expenses are recognised on an accrual basis or via effective interest method and in accordance with TFRS 15 "Revenue from Customer Contracts Standard" and with their nature, other than the fee and commission incomes in respect of certain banking transactions which are recognized as income as they are collected. Incomes gained through contracts or through services related to transactions such as the purchase or sale of assets for a third real or legal person are recognised as income at the time of collection.

VII. Explanations on financial assets

DFS Group classifies and recognises its financial assets as "Financial Assets at Fair Value through Profit / Loss", "Financial Assets at Fair Value through Other Comprehensive Income" or "Financial Assets measured at amortised cost". These financial assets are recognised or derecognised in accordance with the "Recognition and Derecognition from Financial Statements" under the third section of TFRS 9 regarding the classification and measurement of financial instruments, published in the Official Gazette dated 19 January 2017 and numbered 29953 by POA. Financial assets are measured at their fair values at initial recognition in the financial statements. In the initial measurement of financial assets other than "Financial Assets at Fair Value through Profit / Loss", transaction costs are added to the fair value or deducted from the fair value.

DFS Group includes a financial asset in the statement of financial position only when it becomes a party to the contractual terms of the financial instrument. During the initial recognition of a financial asset the business model determined by the Parent Bank management and the nature of the contractual cash flows of the financial asset are taken into consideration. When the business model determined by the Parent Bank management is changed, all affected financial assets are reclassified and reclassification is applied prospectively. In such cases, no adjustments are made to the gain, loss or interest previously recognised in the financial statements.

a. Financial assets at fair value through profit or loss

"Financial assets at fair value through profit or loss" are financial assets other than those are managed with business model that aims to hold to collect contractual cash flows or business model that aims to collect both the contractual cash flows and cash flows arising from the sale of the assets; and if the contractual terms of the financial asset do not lead to cash flows representing solely payments of principal and interest at certain date; that are either acquired for generating a profit from short term fluctuations in prices or are financial assets included in a portfolio aiming to short-term profit making.

Financial assets the fair value through profit or loss are initially recognised at fair value and remeasured at their fair value after initial recognition. All gain and loss arising from these valuations are reflected in the statement of profit or loss.

b. Financial assets at fair value through other comprehensive income

In addition to Financial assets within a business model that aims to hold to collect contractual cash flows and aims to hold to sell, financial asset with contractual terms that lead to cash flows those are solely payments of principal and interest at certain dates are classified as fair value through other comprehensive income.

Financial assets at fair value through other comprehensive income are recognised by adding transaction cost to acquisition cost reflecting the fair value of the financial asset.

After the recognition, financial assets at fair value through other comprehensive income are remeasured at fair value. Interest income calculated with effective interest rate method arising from financial assets at fair value through other comprehensive income and dividend income from equity securities are recorded to statement of profit or loss. "Unrealised gains and losses" arising from the difference between the amortised cost and the fair value of financial assets at fair value through other comprehensive income are not reflected in the statement of profit or loss of the period until the acquisition of the asset, sale of the asset, the disposal of the asset, and impairment of the asset and they are accounted under the "Other Accumulated Comprehensive Income or Expense to be Reclassified through Profit or Loss" under shareholders' equity. When these securities are collected or disposed, the accumulated fair value differences reflected in the equity are reflected to the statement of profit or loss.

Equity securities, which are classified as financial assets at fair value through other comprehensive income, that have a quoted market price in an active market and whose fair values can be reliably measured are carried at fair value. Equity securities that do not have a quoted market price in an active market and whose fair values cannot be reliably measured are carried at cost, less provision for impairment.

During initial recognition, the entity may make an irrevocable decision to present subsequent changes in the fair value of the investment in an equity instrument that is not held for trading purposes under the other comprehensive income. If this decision is made, dividends received from such investment are recognised under profit or loss in the financial statements.

c. Financial assets measured at amortised cost

When the financial assets are held under business model aimed to collect contractual cash flows and contractual terms of the financial assets include solely payments of principal and interest in certain dates, the financial asset is classified as financial assets measured at amortised cost.

Financial assets measured at amortised cost are initially recognised at acquisition cost including the transaction costs which reflect the fair value of those instruments and subsequently recognised at amortised cost by using "effective interest rate (internal rate of return) method" following their recognition. Interest income obtained from financial assets measured at amortised cost is accounted in the statement of profit or loss.

Parent Bank's portfolio of financial assets at fair value through other comprehensive income and the financial assets measured at amortised cost includes CPI indexed government bonds with a maturity of 5 - 10 years and which the real coupon rates of 6 months are fixed throughout the maturity. As stated by the undersecretariat of Treasury in CPI indexed investor guide, the reference indexes used in the calculation of the actual coupon payment amounts of these securities are formed according to the CPI indexes of two months prior to the coupon payment date. Parent Bank sets its projected inflation rate accordingly. The projected inflation rate used is updated as necessary during the year. In this context, the valuation of the relevant assets as of 31 March 2026, was based on a projected annual inflation rate of 25%.

VIII. Explanations on expected credit loss

As of 1 January 2018, the Bank allocates provision for expected credit loss on financial assets measured at amortised cost and measured at fair value through other comprehensive income, also loan commitments and non-cash loans that are not carried at fair value through profit or loss in accordance with TFRS 9 'Financial Instruments' standard requirements according to the "Regulation on the Procedures and Principles for Classification of Loans by Banks and Provisions to be set aside" published in the Official Gazette dated 22 June 2016 numbered 29750.

The provision for expected credit loss is weighted according to the probabilities determined by taking into consideration possible results and reflects the time value of money as an unbiased amount, past events, current conditions and forecasts of future economic conditions as reasonable and supportable information that can be obtained without incurring excessive cost or effort at the reporting date.

According to TFRS 9, it is evaluated whether there is a significant increase in credit risk at each reporting date after the initial recognition of each financial instrument for which impairment is required to be evaluated.

The provision for expected credit loss calculation is performed to estimate the loss that the financial instrument will incur in the case of default.

Financial instruments are allocated to one of the following stages due to the deterioration in loan quality at initial recognition:

Stage 1: Financial instruments for which a 12-month provision for expected credit loss is calculated and no significant increase in credit risk is detected;

Stage 2: Financial instruments with a significant increase in credit risk and the provision for expected credit loss calculated for lifetime;

Stage 3: Impaired, non-performing (defaulted) loans.

Significant increase in credit risk

Qualitative and quantitative evaluations are conducted in determining the significant increase in credit risk.

Qualitative evaluation:

If any of the following conditions are met as a result of qualitative evaluation, the relevant financial asset is classified as Stage 2 (significant increase in credit risk).

As of the reporting date,

- Lifetime expected credit losses are applied on an account basis for customers whose delay reaches 30 days. The Bank does not enforce this estimate only when it has positive, reasonable and supportable information about the customer repayment.
- In case a loan is restructured, it is monitored in Stage 2 during the monitoring period specified in the relevant regulations starting from the date of structuring. At the end of the monitoring period, if there is no significant deterioration in the loan, the transaction can be moved back to Stage 1.
- Existence of indemnified non-cash loans are considered as a significant risk increase.

Quantitative evaluation:

The significant increase in credit risk is quantitatively based on comparing the probability of default calculated at the opening of the loan with the probability of default on the same reporting date.

The financial instruments in Stage 1 are financial instruments that has been recognised for the first time in the financial statements or do not have a significant increase in the credit risk after the initial recognition in the financial statements. For these instruments, credit risk impairment provision is calculated as the provision for expected credit loss for 12-month default risk from the reporting date.

After the initial recognition, if a significant increase is observed in the credit risk and result of the provision for credit risk impairment for the financial instruments mentioned in Stage 2 is calculated as the provision for expected credit loss over the default risk through the remaining life from the reporting date.

Financial instruments in Stage 3 are assumed to be defaulted and therefore impaired. For such financial instruments, provision is calculated based on the expected lifetime credit loss.

Loans belonging to customers included in the scope of the "Financial Restructuring Framework Agreement" are classified regardless of the past due days criterion.

The provision for expected credit loss is calculated either as collectively or individually.

Financial instruments bearing common credit risk characteristics are grouped for provision for expected credit loss calculated collectively.

In the Parent Bank, grouping of credit risks according to common characteristics was made according to their 'risk segments'. The standards for the classification of credit risks by risk segments have been prepared in accordance with the Basel II recommendations for the assessment of capital adequacy based on credit risk in the context of the standard internal rating-based approach ("IRB"). The purpose of classifying credit risks according to risk segments is to determine the approach for analyzing and evaluating credit risk for the relevant risk segment.

The credit risk classification is as follows:

- Segment classification for non-retail loans are made based on all risks of the counterparty and the loan products requested by the counterparty, at the counterparty level and it is ensured that a counterparty is classified in a single risk segment;
- Segment classification for retail loans is based on both product level and counterparty characteristics. This means that counterparty's credit risks can be classified into different risk segments.

The main groupings on the basis of risk segment for the calculation of provision for expected credit loss are as follows:

- Corporate / Commercial loans
- Medium enterprises (ME) loans
- Small enterprises (SE) loans
- Agricultural loans
- Consumer loans
- Mortgage loans
- Vehicle loans
- Overdraft
- Credit cards
- Loans granted to local governments
- Project financing loans
- Central administrations
- Banks

The provision for expected credit loss assessed collectively are calculated by using the components such as exposure at default (EAD), probability of default (PD), loss given default (LGD) and effective interest rate of the loan.

Exposure at default

The amount of default is the expected economic receivable amount at the time of default.

In order to calculate the provision for expected credit loss, the EAD value of each loan is calculated by discounting the expected principal and interest payments from the future dates to the reporting date using the effective interest rate. The loan conversion rate is also applied to the EAD value.

Probability of default

Probability of default indicates the probability of default of the borrower within a certain period of time.

There are two types of PD values calculated in accordance with TFRS 9 requirements:

- 12-month PD: Estimation of the probability of default within 12 months after the reporting date of the financial instrument.
- Lifetime default probability: Estimation of the probability of default over the remaining life of the financial instrument.

The credit ratings, which are the outputs of the internal rating systems used by the Parent Bank in the loan allocation processes are used to classify customers in the calculation of provision for expected credit loss.

Internal rating systems used for non-retail customers are mainly divided into Corporate/Commercial, ME, SE and Agriculture model groups. Internal ratings in the Corporate/Commercial and ME model groups take into account the qualitative evaluation elements along with the quantitative characteristics of the customer such as indebtedness, liquidity and size. Internal ratings in the SE and Agriculture model groups reflect behavioural information, such as the trend of the customer's total limit utilisation rate within the banking sector, overdraft product life at the Parent Bank, or the recent frequency of delays in loan payments.

(Currency: Thousands of TL - Turkish Lira)

Internal rating systems for individual customers also differ at the level of Consumer, Mortgage, Vehicle Loans, Overdraft and Credit Card product groups. In order to generate these scores, behavioural data such as customer's trend in limit utilisation rate in the Bank and sector, frequency of current delays, cross-product ownership and payment routine of other products are used.

In the first step, the outputs of internal rating systems for PD calculations in accordance with TFRS 9 are grouped on the basis of risk segments according to common characteristics of credit risks. Retrospective historical default data of these groups have been prepared. In order to generate reasonable and valid accumulated default rates, a bucket generation analysis has been performed for the default data obtained from the model.

PD curves have been generated by regression method using the suitable statistical distribution from the data obtained for the buckets generated. The resulting PD values have been converted into 'point-in-time' PD values in accordance with TFRS 9 since they represent PD values 'throughout the life cycle'. In the last step, prospective macroeconomic expectations have been reflected in the PD.

For credit risk groups those do not have sufficient historical default data, external default statistics or minimum PD rates in Basel documentation are used.

Internal validation of the process described above is conducted at the end of the year.

Loss given default

Loss given default define the economic loss to be incurred by the debtor in case of default, proportionally.

For the purpose of calculating the provision for expected credit loss, two types of LGD rate are calculated: LGD ratio for the unsecured credit risk and LGD ratio for the secured credit risk.

LGD ratio for unsecured credit risk is calculated by using the Parent Bank's collection data in the previous periods and is grouped on the basis of risk segments according to the common characteristics of credit risks.

The following TFRS 9 requirements have been taken into consideration for the LGD ratio calculation for unsecured credit risk:

- Long-term LGD is used (excluding regression effect is excluded)
- Conservative approach is excluded, if any
- Indirect costs are excluded, if any
- The figures obtained are discounted by the effective interest rate

The LGD ratio for secured loan risk is calculated by considering the collateral structure for each loan. To calculate this ratio, the consideration rates and liquidation periods for each type of collateral and effective interest rates of the loan to which the collateral belongs are used are determined by the Parent Bank for each type of collateral. Historical data have been used to determine the relevant consideration rates and liquidation periods; if these data are not available, the best estimates are used.

For unsecured credit risk groups that do not have sufficient historical collection data, the standard rate in Basel documentation is used.

Internal validation of the process described above is conducted at the end of the year.

Effective interest rate

The effective interest rate is the discount rate that equals the future expected cash payments and collections those are expected to occur over the expected life of the financial asset or liability to the gross carrying amount of the financial asset or the amortised cost of the financial liability.

Individual assessment

In addition to the provision for expected credit loss collectively calculated, a provision for expected credit loss based on the individual evaluation of the financial instruments exceeding a certain risk or within the scope determined by the Bank management are calculated. The calculation has been performed using at least two scenarios for each financial instrument in accordance with the discounted cash flow method in accordance with the "Guidelines on the Calculation of Provision for Expected Credit Loss under TFRS 9" announced by BRSA to banks on 26 February 2018 and the internal policies. The final provision for expected credit loss of the financial instrument is calculated by weighing the provision for expected credit loss calculated for the related scenarios with the probability of occurrence of these scenarios.

Apart from the expected loan loss provisions, the affected portfolios are determined and additional expected loan loss provisions are calculated in order not to ignore the extraordinary situations that did not occur during the consideration periods of the Bank's model.

Low credit risk

In accordance with TFRS 9, the financial instrument's credit risk is considered to be low given the fact that the default risk of the financial instrument is low, the borrower has a strong structure to meet the contractual cash flow obligations in the short term, and the negative changes in the economic conditions and operating conditions in the longer term reduce the borrower's ability to fulfil the contractual cash flow obligations, but this is not considered to be happening in a large context.

It has not been concluded that financial instruments have a low credit risk only if the risk of loss of the financial instruments is considered low because of the value of the collateral and if the credit risk of the related financial instrument is not considered low without this collateral.

Furthermore, it is not considered that the financial instruments have low credit risk just because the establishment has less risk than other financial instruments or the credit risk of the region in which it operates.

In the case of low risk determination of any financial instrument and also assuming that the loan risk does not increase significantly after the first recognition in the financial statements, the relevant financial instrument is evaluated in Stage 1.

Financial instruments considered as having low credit risk under TFRS 9 are as below:

- Receivables from CBRT.
- Risks where the counterparty is the Republic of Turkey's Treasury
- Loans granted to subsidiaries of the main shareholder
- Transactions with banks with AAA rating

Forward macroeconomic information

The Parent Bank uses models to reflect macroeconomic expectations in the assessment of significant increase in credit risk and expected credit loss calculation. These models differ according to risk segments and products. In forward-looking expectations, three different scenarios as base, pessimistic and optimistic are taken into account in proportion to their assigned realization probabilities. For periods beyond the macroeconomic forecast length, the long-term average of default is included in the calculation.

Macroeconomic variables considered in the models used; Gross Domestic Product (GDP) growth rate, unemployment rate, 3-month Treasury bill yield rate, 5-year CDS Premium, USDTRY and EURTRY parities. Models are reviewed annually, renewed for segments deemed necessary and subjected to validation process.

The Parent Bank has reflected its future expectations to the expected credit loss calculation in the financial statements, with the current economic conditions taking into account possible different scenarios and management evaluation. The study is reviewed periodically and updated according to expectations, and the Bank provides additional provisions in to the Expected Credit Loss model provisions against potential credit risks that may arise in line with macroeconomic expectations. Additional provisions are evaluated by the Bank's TFRS 9 Management Committee on a monthly basis and are canceled if it is concluded that the provisions are no longer relevant.

Participation of senior management in TFRS 9 processes

Within the scope of the internal systems, risk management, corporate governance and regulations on the classification of loans and reliable loan risk applications issued in accordance with Banking Law No. 5411 and pursuant to the Article 20 of the "Regulation on Procedures and Principles Regarding Classification of Loans and Provisions to be Reserved" published in the Official Gazette dated 22 June 2016 and No. 29750, 'TFRS 9 Management Committee' has been established in accordance with the "Guidelines on the the Calculation of Provision for Expected Credit Loss under TFRS 9" ('Good Practice Guide') prepared by BRSA.

In accordance with TFRS 9, the Committee is responsible for the control of the classification and measurement of financial instruments, the approval of business models, and the control of an adequate calculation of the provision for expected credit loss. Committee is also responsible for controlling the establishment and maintenance of the Parent Bank's current policies and processes in accordance with TFRS 9 and related good practice guidelines.

The Committee is responsible for ensuring that the provision for expected credit loss are based on reliable and robust methods, that these methods are documented, developed, timely updated and are properly accounted.

The members of the Committee are Executive Board Member responsible for Loans, Assistant General Manager responsible for Financial Affairs, Assistant General Managers responsible for the duties of the Board Member responsible for loans and Assistant General Manager responsible for Risk.

IX. Explanations on offsetting financial instruments

Financial assets and liabilities are presented on a net basis on the balance sheet when the Group has a legally enforceable right to offset the recognised amounts and there is an intention to collect/pay the related financial assets and liabilities on a net basis, or to realise the asset and settle the liability simultaneously.

X. Explanations on sale and repurchase agreements and transactions related to the lending of securities

Government bonds and treasury bills sold to customers under repurchase agreements are classified under "Financial Assets at Fair Value through Profit or Loss", "Financial Assets at Fair Value through Other Comprehensive Income" and "Financial Assets Measured at Amortised Cost" according to the purpose of retaining the asset in the accompanying consolidated balance sheet and are subjected to valuation as per the valuation principles of the relevant portfolio. Funds obtained from repurchase agreements are presented in the liabilities of the consolidated balance sheet in "Receivables from money market" line. The accrual amounts corresponding to the period is calculated for the part of the difference between the sales and repurchase prices determined by the relevant repo agreements. Accrued interest expenses calculated for funds obtained from repurchase agreements are presented in "Due to money markets" account in liability part of the consolidated balance sheet.

Securities purchased with resale commitments are presented under "Due from money markets" line in the balance sheet. The accrual amounts for the corresponding part to the period of the resale and repurchase price difference determined in reverse repurchase agreements are calculated using the effective interest method. The Parent Bank has no securities which are subject to borrowing activities.

XI. Explanations on non-current assets held for sale and from discontinued operations and liabilities related to these assets

In accordance with TFRS 5 ("Non-Current Assets Held for Sale and Discontinued Operations Standard"), assets that meet the criteria to be classified as held for sale are measured at the lower of their book value and fair value less costs to be incurred for sale, and depreciation is stopped on the assets in question and these assets are presented separately in the statement of financial position. In order for an asset to be classified as held for sale, the asset (or group of assets to be disposed of) must be available for immediate sale on terms customary and usual in the sale of such assets (or group of assets to be disposed of) and the sale must be highly probable. In order for the probability of sale to be high, a plan for the sale of the asset (or the asset group to be disposed of) must be made by an appropriate management level and an active program to identify buyers and complete the plan must be initiated. Additionally, the asset (or group of assets to be disposed of) must be actively marketed at a price consistent with its fair value. Various events or circumstances may delay the completion of the sale for more than one year. If there is sufficient evidence that the delay in question has occurred due to events or conditions beyond the Group's control and that the Group's sales plan for the sale of the relevant asset (or group of assets to be disposed of) is ongoing, the assets in question continue to be classified as assets held for sale.

A discontinued operation is a part of the Parent Bank that is classified as disposed of or held for sale. The results of discontinued operations are presented separately in the statement of profit or loss. The Parent Bank does not have any discontinued operations.

In addition, the Parent Bank classifies assets acquired for non-performing loans and receivables in accordance with TFRS 5 as other assets. The positive difference between the book values and the value generated during the sale is shown as sales revenue in the financial statements under other operating income.

XII. Explanations on goodwill and other intangible assets

a. Goodwill

Goodwill represents the excess of the total acquisition costs over the shares owned in the net assets of the acquired company at the date of acquisition. The “net goodwill” resulted from the acquisition of the investment and to be included in the consolidated balance sheet, is calculated based on the financial statements of the investee company as adjusted according to the required accounting principles. Assets of the acquired company which are not presented on financial statements but separated from goodwill at fair values of tangible assets (credit card brand value, customer portfolio etc.) and/or contingent liabilities to financial statements in process of acquisition.

In accordance with “IFRS 3 - Business Combinations”, the goodwill is not amortised, instead it is annually tested for impairment or more frequently when changes in circumstances indicate impairment according to “Turkish Accounting Standard 36 (TAS 36) - Impairment of Assets”.

b. Other intangible assets

Intangible assets are initially recognised in accordance with TAS 38 “Intangible Fixed Assets” at the cost value including acquisition costs and other direct expenses necessary to make the asset usable. Intangible assets are valued at amounts remaining after deducting accumulated depreciation and any accumulated impairment losses from the cost value in the period following their recognition.

Intangible fixed assets consist of software programs, license rights, data/telephone lines and the customer portfolio values of credit cards and individual loans.

Intangible fixed assets acquired before 1 January 2003 and after 31 December 2006 are amortised according to straight-line method, whereas those received between these dates are amortised according to declining balance method. The useful life of the assets is determined by assessing the expected useful life of the asset, technical, technological or other types of obsolescence and maintenance costs necessary to obtain the expected economic benefit from the asset.

Maintenance costs related to the computer software currently in use are expensed in the period in which they occur.

XIII. Explanations on tangible assets

While DFS Group was accounting all of its tangible fixed assets at cost in its records in accordance with TAS 16 “Tangible Fixed Assets” standard, as of 31 December 2016, the revaluation model has been adopted for the valuation of real estate in use, which is accounted under tangible fixed assets. The positive difference between the real estate values in the appraisal reports prepared by licensed valuation companies and the net book value of the relevant real estate are accounted in the equity accounts, negative differences are accounted from the positive differences recognized under equity in the previous reporting periods, and the remaining negative difference, if any, is followed in the income statement.

	Estimated Economic Life (Year)	Depreciation Rate %
Movables		
- Office machinery	4	10 - 50
- Furniture and fixtures	5	10 - 50
- Motor vehicles	5	20 - 50
- Other equipment	10	2,50 - 50
Real estate	50	2 - 3,03

Maintenance and repair costs incurred for a tangible asset are recognised as expense. The capital expenditures which expand the capacity of the tangible asset or increase the future benefit of the asset are capitalized on the cost of the tangible asset.

There are no pledges, mortgages and other measures or commitments given for the purchase of tangible fixed assets.

XIV. Explanations on investment property

Property, and land and buildings held for the purpose of earning rent or appreciation or for both, rather than being used in the production of goods and services or sold for administrative purposes or during the normal course of business are classified as “investment property” and they are valued with fair value method. Any gains or losses arising from changes in the fair value of investment property are recognised in profit or loss in the period in which they are incurred.

Investment property is derecognised through disposal or withdrawal from use and when no future economic benefit is expected from its disposal. Gains or losses arising from the disposal of investment property are recognised in profit or loss in the period in which they occur.

XV. Explanations on leasing transactions

Fixed assets acquired through financial leasing are classified as tangible assets and depreciated in line with the related fixed assets group. The obligations arising from the lease contracts are presented under “Lease Liabilities” under liabilities. Interest expenses and foreign exchange differences related to leasing activities are reflected to the statement of profit or loss.

DFS Group has finance lease transactions as “Lessor” via its subsidiary, Deniz Leasing. The lease receivables related to leased assets are recorded as finance lease receivables. The asset subject to the financial leasing is presented in the balance sheet as receivable equal to the net leasing amount. Interest income is recognised over the term of the lease using the net investment method which reflects a constant periodic rate of return and the unrecognised portion is followed under unearned interest income account.

With the “IFRS 16 Leases” standard effective from 1 January 2019, the difference between operating leases and financial leases has been eliminated and the leasing transactions have been presented under “Liabilities from Leasing Operations”.

XVI. Explanations on provisions and contingent liabilities

Specific and general provisions for loans and other receivables as well as the provisions and contingent liabilities other than the provisions for possible risks are recognised in accordance with TAS 37 “Provisions, Contingent Liabilities and Contingent Assets” standard; provisions are recognised immediately when they arise as a result of past events and DFS Group estimates the amount of the liability and reflects this amount in the consolidated financial statements. It is considered “Contingent” in cases where the amount of the obligation cannot be estimated. For contingent liabilities; if the probability of the realisation of the condition is higher than the probability of non-realisation and can be measured reliably, a provision is recognised; and where they are not able to be measured reliably or there is no probability of realisation of the condition or less than the probability of non-realisation, such liabilities are disclosed in the footnotes.

Contingent assets generally consist of unplanned or other unexpected events that create the possibility of an inflow of economic benefits to the entity. Since the recognition of contingent assets in the financial statements may result in the recognition of revenue that may never be received, such assets are not included in the financial statements.

Contingent assets are disclosed in the notes to the financial statements if it is probable that an inflow of economic benefits will arise. The Bank continually assesses the development of contingent assets to ensure that they are appropriately reflected in the financial statements. If it has become virtually certain that an inflow of economic benefits will arise, the asset and the related income are recognized in the financial statements of the period in which the change occurs.

XVII. Explanations on obligations for employee benefits

The Parent Bank recognises employee benefits in accordance with TAS 19 “Employee Benefits” standard.

The Parent Bank in accordance with existing legislation in Turkey, is liable to pay retirement and notice payments to each employee whose employment is terminated due to reasons other than resignation or misconduct. Except to this extents, the Parent Bank is liable to pay severance payment to each employee whose employment is terminated due to retirement, death, military service and to female employees following their marriage within one year leave the job of their own accords pursuant to Article 14 of the Labour Law.

In accordance with TAS 19, DFS Group recognises provision by estimating the present value of the probable future obligation of severance pay. Actuarial gains and losses arising after 1 January 2013 are accounted for under equity in accordance with revised TAS 19.

DFS Group has recognised vacation pay liability amount which is calculated from unused vacation to financial statement as a provision.

XVIII. Explanations on tax applications

a. Current tax

In accordance with the "Law No. 7456 on the Creation of Additional Motor Vehicle Tax for the Compensation of Economic Losses Caused by the Earthquakes Occurring on 6 February 2023 and Amending Certain Laws and the Decree Law No. 375" published in the Official Gazette dated 15 July 2023; the 25% corporate tax rate applicable to banks, financial leasing, factoring, financing and savings finance companies, electronic payment and money institutions, authorized foreign exchange institutions, asset management companies, capital market institutions, insurance and reinsurance companies and pension companies is 30%. The 20% corporate tax rate applicable to other companies has been increased to 25%. The tax rate change in question will be valid for the profits of companies in 2023 and subsequent taxation periods, starting from the returns that must be submitted as of 01 October 2023.

With Tax Procedure Law Circular/115, the deadlines for some tax returns to be submitted as of 1 April 2019 have been extended until a new determination is made. With the said circular, the corporation tax declaration can be declared from the first day of the fourth month to the evening of the last day following the month in which the relevant accounting period is closed.

The provision for corporate tax for the period is reflected as the “Current Tax Liability” in the liabilities and “Current Tax Provision” in the statement of profit or loss.

In accordance with the Corporate Tax Law, carry forward tax losses shown on the declaration can be deducted from the corporate tax base for up to five years. The tax authorities can inspect tax returns and the related accounting records for a retrospective maximum period of five years.

Besides institutions reside in Turkey, dividends paid to the offices or the institutions earning through their permanent representatives in Turkey are not subject to withholding tax. According to Presidential Decision No. 9286, published in the Official Gazette on December 22, 2024, certain withholding tax rates set forth in Article 94 of the Income Tax Law No. 193 and Articles 15 and 30 of the Corporate Tax Law No. 5520 have been revised. In this respect, the withholding tax rate applied to the dividend payments made to non-resident companies, tax-exempt narrow and full taxpayer institutions/real persons, limited and full taxpayer real persons, excluding non-residents who earn income through a workplace or their permanent representative in Turkey is 15%. While applying the withholding tax rates on dividend payments to the foreign based institutions and the real persons, the withholding tax rates covered in the related Avoidance of Double Taxation Treaty are taken into account. Addition of profit to capital is not considered as profit distribution and therefore is not subject to withholding tax.

The foreign subsidiaries of DFS Group that operate in Austria and the Russian Federation are subject to corporate tax rates of 23% and 25%, respectively.

Tax effects related to transactions recognised directly in equity are also recognised in equity.

According to the TRNC Corporate Tax Law No. 41/1976, as amended, corporate earnings (including foreign corporations) are subject to 10% corporate tax and 15% income tax according to the Income Tax Law. Corporate tax is calculated based on the income earned by taxpayers within an accounting period. The tax base is determined by adding the expenses that are not allowed to be deducted by law to the commercial income of the institutions and by applying the exemptions and deductions in the tax laws.

(Currency: Thousands of TL - Turkish Lira)

The right of deduction of losses stipulated in the Corporate Tax Law, the right to investment allowances stipulated in the income tax legislation and the depreciation prescribed in the tax legislation are granted to corporations that certify the balance sheet, profit and loss statement and business accounts for the calculation of corporate tax without having them prepared and certified by an accountant and auditor authorized by the Ministry of Finance, and that corporations' rights are not recognized. Tax may be requested to any taxable institution within seven years following the taxation period, in cases where tax has not been assessed in previous years or if it is revealed that tax has been assessed less than the amount required to be paid. Corporate tax returns are declared to the tax office in the April following the closing date of the accounting period. Corporate tax is paid in two equal installments, one in May and the other in October. According to the decision of the TRNC Council of Ministers dated 25 March 2020, provisional taxes are calculated and paid quarterly at a tax rate of 15% on the financial earnings of that year. Provisional taxes paid during the year can be offset against the taxes calculated on that year's annual corporate tax return.

Pursuant to Law No.11 of 2024 dated September 1, 2024, Bahrain has implemented the Domestic Minimum Top-Up Tax (DMTT) regime to comply with the OECD's "Pillar Two / GloBE" framework. This regulation is effective for fiscal periods beginning on or after January 1, 2025 and applies to requires multinational corporate groups with a consolidated turnover of EUR 750 million or more to pay a top-up tax equal to the difference if the effective tax rate of their subsidiaries or branches in Bahrain falls below 15%.

According to the temporary article 33 added to the Tax Procedure Law by Law No. 7352 published in the Official Gazette dated 29 January 2022; It has been considered that the financial statements dated 31 December 2023 will be subject to inflation adjustment regardless of whether the inflation adjustment conditions are met or not. The profit/loss difference resulting from the inflation adjustment will be shown in the previous years' profit/loss account; It has been determined that the previous year's profit determined in this way will not be subject to tax, and the previous year's loss will not be accepted as loss. Although the Banks will apply inflation accounting together with the financial leasing, factoring, savings finance companies, payment and electronic money institutions, authorized foreign exchange institutions, asset management companies, capital market institutions, insurance - reinsurance companies, pension companies and other taxpayers within the scope, there will be no tax consequences as a result of the correction in these institutions.

Article 7 and 8 of the Law No. 7524 and Article 263 of the Tax Procedure Law has been amended and Article 274/A has been added published in the Official Gazette dated August 2, 2024 and numbered 32620. With this regulation, the valuation provisions of precious metals have been harmonized with the foreign currency valuation principles. Banks are required to take the buying exchange rates determined in accordance with the principles determined by the Central Bank of the Republic of Turkey and actually applied during the valuation they will make in terms of tax applications.

With the Law No. 7491 on the Amendment of Certain Laws and Decree Laws, it has been regulated that the profit / loss difference arising from the inflation adjustment to be made by the banks in the 2024 and 2025 accounting periods, including the provisional tax periods, will not be taken into account in the determination of earnings. With the Tax Procedure Law General Communiqué numbered 582 published in the Official Gazette dated February 15, 2025 and numbered 32814, it has been declared that it is appropriate not to make inflation adjustment as of the end of the first provisional tax, second and third provisional tax periods of the 2025 accounting period. In accordance with the provisional Article 33 of the Tax Procedure Law, the tax effects arising from the inflation adjustment of the financial statements in accordance with the Tax Procedure Law is presented in the current tax provision in the financial statements for the periods of March, June and September 2025.

According to the temporary Article 37 added to the Tax Procedure Law No. 213 by Law No. 7571 published in the Official Gazette dated 25 December 2025 and numbered 33118; for the 2025 accounting period and the 2026 and 2027 accounting periods, including provisional tax periods (for those with a special accounting period, for the accounting periods ending in 2026, 2027 and 2028) financial statements shall not be subject to inflation adjustment, regardless of whether the conditions for inflation adjustment under Repeated Article 298 are met. For the purposes of applying paragraph (C) of the repeated Article 298, the periods specified in the first paragraph as not subject to inflation adjustment (including periods extended under the authority) shall be considered as periods in which the conditions for inflation adjustment have not been met. Therefore, depreciable economic assets included in the balance sheet (except those subject to sale-lease-back transactions or lease certificate issuance as long as they retain these characteristics) and the depreciation allocated on them and shown on the liabilities side of the balance sheet may be subject to revaluation within the scope of Repeated Article 298/ç of the Tax Procedure Law.

b. Deferred tax

The Group calculates and recognises deferred tax in accordance with TAS 12 “Income Taxes” for the temporary differences between the accounting policies and valuation principles applied and the tax basis determined in accordance with the tax legislation.

The deferred tax assets and liabilities of the entities included in the consolidation have been netted within themselves and have not been netted in the consolidated balance sheet. As a result of this, deferred tax asset amounting to TL 5.961.243 as of 31 March 2026 (31 December 2025: TL 758.690) and deferred tax liabilities amounting to TL 1.924.568 (31 December 2025: TL 1.866.716) have been recognised in the accompanying financial statements.

The deferred tax liability is calculated for all taxable temporary differences whereas deferred tax assets arising from deductible temporary differences are calculated provided that it is highly likely to benefit from these differences in the future by generating taxable profit.

Deferred taxes directly related to equity items are recognised and offset in related equity accounts.

The tax effects arising from the revaluation of amortised fixed assets in accordance with the Tax Procedure Law are shown in the deferred tax provision in the financial statements as of 31 March 2026.

In deferred tax calculations, 30% rate is used for corporations in Turkey (31 December 2025: 30%).

c. Transfer pricing

In the framework of the provisions on “Disguised Profit Distribution Through Transfer Pricing” regulated under article 13 of Corporate Tax Law no. 5520, pursuant to the Corporate Tax Law General Communiqué no. 1, which became effective upon its promulgation in the Official Gazette dated 3 April 2007 and numbered 26482, Corporate Tax Law General Communiqué no. 3, which became effective upon its promulgation in the Official Gazette dated 20 November 2008 and numbered 27060, Council of Ministers Decree no. 2007/12888, which became effective upon its promulgation in the Official Gazette dated 6 December 2007 and numbered 26722, Council of Minister Decree no. 2008/13490, which became effective upon its promulgation in the Official Gazette dated 13 April 2008 and numbered 26846, “General Communiqué No. 1 on Disguised Profit Distribution Through Transfer Pricing”, which became effective upon its promulgation in the Official Gazette dated 18 November 2007 and numbered 26704 and “General Communiqué No. 2 on Disguised Profit Distribution Through Transfer Pricing”, which became effective upon its promulgation in the Official Gazette dated 22 April 2008 and numbered 26855, “General Communiqué No. 3 on Disguised Profit Distribution Through Transfer Pricing”, which became effective upon its promulgation in the Official Gazette dated 7 December 2017 and numbered 30263 and the Communiqué on the Amendment of the “General Communiqué on Disguised Profit Distribution through Transfer Pricing” no. 1, which became effective after being published in the Official Gazette dated 01 September 2020 and numbered 31231, profits shall be deemed to have been wholly or partially distributed in a disguised manner through transfer pricing if companies engage in the sales or purchases of goods or services with related parties at prices or amounts defined contrary to the arm’s length principle. Buying, selling, manufacturing and construction operations and services, renting and leasing transactions, borrowing or lending money, bonuses, wages and similar payments are deemed as purchase of goods and services in any case and under any condition.

Corporate taxpayers are obliged to fill in the “The Form on Transfer Pricing, Controlled Foreign Corporation and Thin Capital” regarding the purchases or sales of goods or services they perform with related parties during a fiscal period and submit it to their tax office in the attachment of the corporate tax return.

The taxpayers registered in the Large Taxpayers Tax Administration (Büyük Mükellefler Vergi Dairesi Başkanlığı) must prepare the “Annual Transfer Pricing Report” in line with the designated format for their domestic and cross-border transactions performed with related parties during a fiscal period until the filing deadline of the corporate tax return, and if requested after the expiration of this period, they must submit the report to the Administration or those authorized to conduct tax inspection. The organizational structure of corporate taxpayers, who are affiliated to the multinational business group and whose asset size in the balance sheet and net sales amount in the income statement are both TL 500 million and above, which are attached to the corporate tax declaration for the previous accounting period, the definition of the business activities, the intangible rights they have, it is obligatory to prepare the general report containing the financial transactions of the group and the financial and tax status of the group for the previous year until the end of the current year and submit it to the Administration or those authorized to conduct tax inspections, if requested. According to the consolidated financial statements of the previous accounting period from the reported accounting period, total consolidated group income of Euro 750 million and over multinational enterprises resident group in Turkey ultimate parent company or proxy business, the reported accounting period’s income until the end of twelfth month, before tax it prepares a country-based report including profit / loss, accrued and paid corporate tax, capital, previous year profits, number of employees and tangible assets other than cash and cash equivalents, and submits it to the Administration electronically. Within the framework of the explanations stated in the “Communiqué on the Amendment to the General Communiqué on Disguised Profit Distribution through

Transfer Pricing (Serial No: 1)” with Serial No: 5, which entered into force after being published in the Official Gazette dated October 17, 2024 and numbered 32695, it is stipulated that the notification form regarding which entity will make country-based reporting within the scope of country-based reporting will be submitted electronically via the Digital Tax Office until the end of the sixth month following the end of the accounting period.

d. Local and Global Supplementary Minimum Corporate Tax

Law No. 7524 on Amendments to Tax Laws, Certain Laws and Decree Law No. 375, which was published in the Official Gazette dated 2 August 2024 and numbered 32620, and the 11 Additional Articles to the Corporate Tax Law ("KVK") and "Local and "Global Minimum Supplementary Corporate Tax" has been added. In Additional Article 1 of KVK, the gains of the subsidiaries of multinational business groups whose annual consolidated revenue in the consolidated financial statements of their ultimate parent company exceeds the Turkish lira equivalent limit of Euros 750 million in at least two of the four accounting periods preceding the accounting period in which the revenue is reported are subject to local and global minimum supplementary corporate tax.

The Parent Bank are within the scope of a Multinational Enterprise (MNE) with consolidated revenues of Euro 750 million or more in at least two of the last four financial years.

The calculated global minimum supplementary corporate income tax is declared and paid by the last day of fifteenth (eighteenth for the first year) month following the close of the accounting period. The calculated local minimum supplementary corporate income tax is declared and paid from the first day to the last day of the twelfth month following the close of the accounting period.

According to the calculations made as a result of the regulation, the Bank will not have a significant liability for minimum corporate tax as of 31 March 2026.

e. Domestic minimum corporate tax

Article 32/C has been added to the Law No. 5520 with Article 36 of the Corporate Tax Law with the Law No. 7524 on the Amendment of Tax Laws and Certain Laws and Decree Law No. 375, which entered into force after being published in the Official Gazette dated August 2, 2024 and numbered 32620.

2025 and the following taxation periods, and for corporations subject to special accounting period, it is applied to the earnings obtained in the special accounting period starting in the calendar year 2025 and the following taxation periods.

The corporate tax calculated by applying the rate to be determined by applying the provisions of paragraphs one to nine of Article 32 of the Corporate Tax Law and Article 32/A to the earnings of the corporations within an accounting period shall not be less than 10% of the corporate income before deducting discounts and exemptions.

In the event that the amount remaining after deducting the tax amounts not collected due to the discounted rate applications by taking into account the provisions of Articles 32 and 32/A of the Corporate Tax Law from the calculated minimum corporate tax exceeds the tax amount calculated upon the taxpayer's declaration, minimum tax will be calculated up to the excess amount.

Corporate tax paid by withholding for the accounting period and advance taxes paid can be deducted from the calculated minimum tax.

XIX. Additional explanations on borrowings

Borrowings are initially recognised at cost representing their fair value and remeasured at amortised cost based on the internal rate of return at next periods. Foreign currency borrowings have been translated using the foreign currency buying rates of the Parent Bank at the balance sheet date. Interest expense incurred for the period has been recognised in the accompanying financial statements.

General hedging techniques are used for borrowings against liquidity and currency risks. The Parent Bank, if required, borrows funds from domestic and foreign institutions. The Parent Bank also borrows funds in the forms of syndication loans and securitization loans from foreign institutions.

XX. Explanations on issuance of share certificates

In 2026 and 2025, the Parent Bank does not have issuance of share certificates.

XXI. Explanations on bill of guarantee and acceptances

Bill of guarantee and acceptances are followed-up as off-balance sheet liabilities as possible debts and commitments. Cash transactions regarding guarantee and acceptances are realised simultaneously with the customer payments.

As of the balance sheet date, there are no bill of guarantee and acceptances shown as liability against assets.

XXII. Explanations on government incentives

As of the balance sheet date, DFS Group does not have any government incentives used.

XXIII. Explanations on segment reporting

Segment reporting is presented in Section Four, note XII.

XXIV. Explanations on other matters

None.

XXV. Classifications

None.

SECTION FOUR

INFORMATION ON CONSOLIDATED FINANCIAL STRUCTURE AND RISK MANAGEMENT

I. Explanations related to the consolidated shareholders' equity

Capital and capital adequacy ratio are calculated in accordance with the "Regulation on Equities of Banks" and "Regulation on Measurement and Assessment of Capital Adequacy Ratios of Banks".

With the decision of BRSA numbered 10747 dated 12 December 2023, to be implemented as of 1 January 2024;

If the net valuation differences of the securities owned by banks in the "Financial Assets at Fair Value Through Other Comprehensive Income" portfolio are negative as of 1 January 2024, these differences will be calculated in accordance with the Regulation on Banks' Equity published in the Official Gazette dated 5 September 2013 and numbered 28756 and to be taken into account in the equity amount to be used for the capital adequacy ratio, to continue to apply the existing provisions of the said Regulation for "Financial Assets at Fair Value Through Other Comprehensive Income" acquired after 1 January 2024,

In the calculation of the amount subject to credit risk in accordance with the Regulation on Measurement and Evaluation of Capital Adequacy of Banks, published in the Official Gazette dated 23 October 2015 and numbered 29511, specified in the Board Decision No. 10496 dated 31 January 2023; the application for using the foreign exchange buying rate of the Central Bank of the Republic of Turkey (Central Bank) as of 30 December 2022, calculating the valued amounts of monetary assets and non-monetary assets, other than items in foreign currency measured in historical cost, in accordance with Turkish Accounting Standards and the relevant special provision amounts implemented as of 1 January 2024, it was decided to continue using the Central Bank foreign exchange buying rate of 26 June 2023 until a Board Decision to the contrary is taken. With the decision of BRSA dated 19 December 2024 and numbered 11038, it has been decided to continue using the Central Bank foreign exchange buying rate of 28 June 2024, to be applied as of 1 January 2025.

Pursuant to the decision of the Banking Regulation and Supervision Agency (BRSA) dated 13 November 2025 and numbered 11286, as of 1 January 2026, the applications of the Board Decision dated 12 December 2023 and numbered 10747 and the Board Decision dated 19 December 2024 and numbered 11038, as explained above, have been terminated. If the regulatory change were applied to capital adequacy calculated as of 31 December 2025, the ratio would be 15,72%.

As of 31 March 2026 the equity of the Group amounts to TL 252.633.506 (31 December 2025: TL 242.161.822) while its capital adequacy standard ratio is 14,80% (31 December 2025: 17,91%).

- c. Main differences between "Equity" amount mentioned in the prior tables' equity statements and "Equity" amount in consolidated balance sheet arise from stage 1 and stage 2 loss provisions. The portion of main amount to credit risk of stage 1 and stage 2 loss provisions up to 1,25% considered as supplementary capital in the calculation of "Equity" amount included in equity statement as result of deductions mentioned in scope of Regulation on Equity of Banks. Additionally, Losses reflected to equity are determined through excluding losses sourcing from cash flow hedge reflected in equity in accordance with TAS which are subjects of discount from Core Capital. On the other hand, leasehold improvement costs monitored under Plant, Property and Equipment in balance sheet, intangible assets and deferred tax liabilities related to intangible assets and certain other accounts determined by the Board are taken into consideration in the calculation as assets deducted from capital.**

II. Explanations related to the consolidated foreign currency exchange rate risk

a. Foreign exchange rate risk the Group is exposed to, related impact estimations, and the limits set by the Board of Directors of the Parent Bank for positions which are monitored daily

Foreign currency risk arises from the DFS Group's net foreign exchange position arising from foreign currency in balance sheet and off-balance sheet assets and liabilities. Against foreign currency risk, the Bank performs foreign currency transactions, as well as foreign currency indexed transactions. Foreign currency indexed transactions are also accepted in foreign currency in the management of exchange rate risk.

The management and follow-up of currency risk has been handled through separate processes for trading and banking accounts. In the management of the position arising from trading accounts, risk-based value-at-risk limit, position limits, option sensitivity limits and stop loss limits are defined and monitored daily. The limit system was formed in two levels by the Board of Directors and the Asset-Liability Committee.

The ultimate responsibility for the management of currency risk arising from banking accounts lies in the Asset-Liability Committee ("ALCO"). Positions are constantly monitored and transactions are carried out in line with the strategy determined by ALCO. In addition to the legal limits, the limits determined by the Board of Directors on the basis of total and foreign currency are taken into account in managing the exchange rate risk.

b. The magnitude of hedging foreign currency debt instruments and net foreign currency investments by using derivatives

In accordance with TFRS 9, DFS Group applies net investment hedge accounting to avoid foreign currency exchange rate risk arising from translation of its foreign investments in its consolidated financial statements.

Information relating to investment hedge to avoid foreign currency exchange rate risk arising from retranslation of its foreign investments are explained in Section Four, note XI-a.

c. Foreign currency risk management policy

The procedures and principles regarding the management of currency risk have been written down in the Currency Risk Policy. The limit system, which is the most important element of the Bank's risk management policy, is reviewed once a year and approved by the Board of Directors, considering the general economic situation and developments in the markets.

d. The Parent Bank's current foreign exchange buying rates announced to the public as of the financial statement date and for the last five working days before that date

US Dollar purchase rate at the balance sheet date	TL 44,3961
Euro purchase rate at the balance sheet date	TL 50,9294

<u>Date</u>	<u>US Dollar</u>	<u>Euro</u>
25 March 2026	44,2737	51,3620
26 March 2026	44,2828	51,1617
27 March 2026	44,2887	51,0150
30 March 2026	44,3841	51,0236
31 March 2026	44,3961	50,9294

e. The simple arithmetic average of the Parent Bank's current foreign exchange buying rate for the last thirty days from the date of the financial statements

The arithmetical average US Dollar and Euro purchase rates for March 2026 are TL 44,0894 and TL 50,9632 respectively.

III. Explanations related to the consolidated interest rate risk

Interest rate risk arises from mismatch between the repricing dates of the assets, liabilities and off-balance sheet items (for floating-rate products) or maturities (for fixed-rate products). Although this mismatch is a structural situation in the banking system, it may affect the bank's interest income and expense and the economic value of the balance sheet if there are unexpected changes in interest rates.

The ultimate responsibility for managing the interest rate risk is in the Asset and Liability Committee (ALCO). However, the Treasury and Asset Liability and Capital Management units are responsible for identifying the most appropriate strategies for interest rate risk management and recommending them to decision makers. There are limits approved by the Board of Directors for the control of interest rate risk.

a. Interest rate sensitivity of assets, liabilities and off-balance sheet items (In terms of time remaining for repricing):

IV. Position risk of equity shares arising from banking accounts

a. Comparison of book value, fair value and market value of equity shares

As of 31 March 2026 and 31 December 2025, the Group has no subsidiaries or subsidiaries that are traded on the BIST markets and are not consolidated.

b. Information on realised gains/losses, revaluation surpluses and unrealised gains/losses on equity shares and their amounts included in the Tier I and Tier II capitals

None.

V. Explanations related to the consolidated liquidity risk management, liquidity coverage ratio and net stable funding ratio

Liquidity risk can form as a result of significant changes which can happen in market liquidity or a general funding risk. Funding risk states the risk of not meeting cash outflows completely because of maturity mismatch between assets and liabilities while market liquidity risk states the risk of not liquidating assets because of a collision in market conditions or insufficient market depth.

Information on liquidity risk management, including the Parent Bank's risk capacity, responsibilities and structure of liquidity risk management, liquidity risk reporting in the Parent Bank, liquidity risk strategy, policy and practices, communication with the board of directors and business lines

The procedures and principles regarding the liquidity risk management within the Parent Bank are determined by the "Liquidity Risk Management Policy" approved by the Board of Directors. This policy includes the main duties and principles of liquidity risk management within the Parent Bank, including related methods, procedures, controls and reporting framework. Within the Liquidity Risk Management Policy, "Liquidity Emergency Action Plan" has been established and measures that can be taken against unexpected liquidity shortages have been included.

"Risk Appetite Statement" approved by the Board of Directors is reviewed annually in order to manage the risks in accordance with the Bank's strategy and financial strength. Risk Appetite Statement includes limits for liquidity risk as well as other risk limits. Risk appetite limits are reported to the senior management on a monthly basis within the scope of risk management activities. In the risk appetite statement (RAS), limits are determined based on criteria such as loan / deposit ratio, liquidity coverage ratio, life expectancy under stress conditions and deposit concentration. Other indicators followed by these metrics are; liquidity buffer, large deposits, core deposits.

The short-term liquidity management of the Parent Bank is the responsibility of the Treasury Group. The Treasury Group reports to the ALCO on a weekly basis regarding the liquidity structure. ALCO possesses the ultimate responsibility for structural liquidity and funding management. ALCO plays an active role in monitoring and decision-making processes as well as establishing systems related to liquidity and funding management. Monitoring the current liquidity status and legal and internal liquidity indicators, taking decisions regarding liquidity management by taking into consideration the Parent Bank's strategy and risk appetite framework are under the authority and responsibility of ALCO. Financial Institutions Group, Financial Affairs Group and Risk Management Group contribute to the liquidity management process of the Bank in accordance with the ALCO decisions and also provide the necessary support to the ALCO with the information, analysis and recommendations needed in the decision-making process.

Information on the degree of centralization of liquidity management and funding strategy and the functioning of the Parent Bank and the functioning between Parent Bank and its subsidiaries

Liquidity risk management is performed on unconsolidated and consolidated basis. In this context, although the liquidity monitoring and management of the affiliate is carried out by the related affiliate, they are closely monitored by the Parent Bank. Limits are allocated by the Parent Bank in order to meet the liquidity needs of affiliates in the event of emergencies.

Information on the Bank's funding strategy, including policies on the diversity of funding sources and durations

Liquidity risk management arising from funding forms the basis of the Bank's liquidity management activities. The source of deposits is the Bank's main funding source due to the more stable funding and diversification effect compared to the loans provided by the Banks and other sources. In addition, securities issuance and credit utilisation activities are carried out to extend the maturity of funding.

On the other hand, the securities portfolio of the Parent Bank carried for liquidity risk management arising from the market is structured in a way to consist of securities issued by Republic of Turkey Treasury in order to reduce liquidity risk sourcing from market to minimum level since they allow repurchase transactions carried

out under CBRT/BIST. The criteria and principles regarding the securities investments to be included in this portfolio have been written and approved by the relevant committee.

Information on liquidity management in terms of currencies which constitute at least five percent of the total liabilities of the Parent Bank

Majority of the Parent Bank's liabilities consist of Turkish Lira, US Dollar, Euro and gold. The main foreign currency funding source of the Parent Bank consists of deposits and loans obtained from credit institutions. The foreign currency liquidity risk of the Parent Bank is low due to the fact that the foreign currency sources of the Parent Bank are higher level than FX loans. For this reason, Turkish Lira is generated through swap transactions by using the current foreign currency liquidity. In other words, foreign currency liabilities are used in the funding of Turkish Lira assets.

Information on liquidity risk mitigation techniques used

In order to mitigate the liquidity risk, a liquidity buffer is created and closely monitored to meet possible fund outflows. Securities required for repurchase used to manage short-term risks are kept at a certain level within the balance sheet. On the other hand, diversification of funding sources and extension of the maturity structure are aimed to reduce the structural liquidity risk. The strategy of wide spread deposit base is another important element.

Explanations related to using the stress test

In order to measure the liquidity level under stress conditions, scenario analyses are performed in which special conditions that are not experienced and likely to be experienced and which are important in terms of liquidity are included. Within the scope of the scenario analyses, the measures that can be taken are also evaluated and a sufficient level of liquidity is targeted to meet all liabilities even under stress conditions. Assumptions regarding liquidity stress tests are reviewed on an annual basis at minimum. Within the scenarios determined, the Risk Management Department regularly performs stress tests and monitors the liquidity situation, calculates the time the Bank can survive, compares the limits with the determined results and presents them to the relevant committees.

General information on the liquidity emergency and contingency plan

In order to be prepared for the liquidity crises that may be experienced and to be able to manage them in a healthy and planned way, the "Liquidity Unexpected Situation Plan Regulation" was prepared to guide the processes. In this document, early warning indicators, action plans, duties and responsibilities of the units within the Bank are used to determine the unexpected liquidity situation.

a. Liquidity coverage ratio

Liquidity coverage ratios calculated in accordance with the Regulation on Calculation of Liquidity Coverage Ratio of Banks published in the Official Gazette dated 21 March 2014 and numbered 28948 are as follows.

The lowest monthly consolidated foreign currency ratio for the last three months was 493,04 in February, the highest 520,60 in January, and the total lowest liquidity coverage ratio has been calculated as 155,90 in March and 181,39 in January as the highest.

The liquidity coverage ratio calculation table is reported to the BRSA on a monthly basis and monitored on a daily basis within the Bank.

High quality liquid assets included in the ratio calculation consist of cash assets, reserves held in CBRT and free securities. Cash outflows consist of deposits, bank borrowings, non-cash loans, derivatives and other payables with no maturity date. However, some bank borrowings are presented as cash outflows regardless of their maturities due to the provision of conditional early payment. In addition, cash outflows include additional collateral requirements that may arise from changes in the fair value of derivative transactions. Cash inflows consist of loans with maturities less than 30 days with definite due dates and receivables from banks and derivative products.

LCR is considered as an important liquidity management measure for the Bank. The Bank carried out to manage its liquidity within the framework of minimum LCR limits of 80% for foreign currency and 100% in total. In the Risk Appetite Statement, internal limits above the legal minimum limits have been determined for LCR and the related ratio is reported and monitored at ALCO, senior management and the Board of Directors level.

(1) Includes stage 1 and stage 2 provisions for expected credit loss amounting of TL (45.176).

(2) Includes stage 1 and stage 2 provisions for expected credit loss amounting of TL (10.025).

(*) Certain assets on the balance sheet that are necessary for the banking operations but not convertible into cash in the short run such as tangible fixed assets, investments in associates, joint ventures and subsidiaries, stationary supplies, non-performing loans (net) and prepaid expenses are included in this column.

c. Net stable funding ratio liquidity risk management, liquidity coverage ratio and net stable funding ratio

While the liquidity coverage ratio is used to measure the short-term liquidity level, the net stable funding ratio is used to measure the liquidity levels of the funding risk that banks may be exposed to in the long term. The net stable funding rate is calculated on a consolidated and unconsolidated basis by dividing the available stable funding amount by the required stable funding amount. The available stable fund includes the portion of banks' liabilities and equity that are expected to be permanent; the required stable funding refers to the fund requirement that banks create by considering the nature and maturity of their on-balance sheet assets and off-balance sheet liabilities. This ratio is a measure that shows whether the bank has sufficient and stable financial resources to fund its long-term assets, and in this regard, it is considered a complementary metric to the liquidity coverage ratio in terms of liquidity risk management.

The three-month simple arithmetic average of the consolidated and unconsolidated net stable funding ratio calculated monthly can not be less than one hundred percent as of March, June, September and December. In addition, depending on the Bank's risk appetite, internal limits are set to be more conservative than the legal limit and are managed within this framework.

33 Required stable funding					1.077.738.920
34 Net stable funding rate					122,66

Three-month simple arithmetic average of the net stable funding values for the last three months.

When the balance sheet items that significantly affect the net stable funding rate are evaluated, in the available stable funding calculation, equity items and borrowings with a maturity of more than one year are 100%, retail deposits are 95% or 90%, other deposits and borrowings with a remaining maturity less than one year are weighted with 50% or 0% depending on their counterparty. In the required stable funding calculation, cash and receivables from the central bank are 0%, high quality liquid assets that are not subject to collateral or have a collateral period of less than six months are 5%, non-cash loans are 5%, secured receivables are 10%, remaining maturities from financial institutions are less than 6 months receivables are 15%, loans with a remaining maturity of less than 1 year are 50%, housing loans with a maturity of more than one year and meeting the conditions specified in the regulation are 65%, loans with a maturity of more than one year are 85%, net derivative products reflected in the balance sheet and other receivables with a maturity of more than one year are weighted by 100%.

TL 241,5 billion was composed of Tier I and Tier II Capital, TL 706,9 billion of real person and retail deposits and their share in total available stable funds was 69,7% as of 31 December 2025. When the highest amounts in required stable funds are analyzed, TL 777,4 billion was composed of live receivables and its share in total required stable funds was realized as 67,3%.

VI. Explanations related to leverage ratio

Information on matters causing difference between leverage ratios of current period and previous period

As of 31 March 2026, the leverage ratio of the DFS Group is calculated as 5,96% (31 December 2025: 6,31%). This rate is above the minimum rate. The main reason for the difference between the current period and the prior period leverage ratio is the increase in the balance sheet assets.

Summary comparison table of total asset amount and total risk amount in the financial statements prepared in accordance with TAS :

	Current Period (**)	Prior Period (**)
1 Total assets in the consolidated financial statements prepared in accordance with TAS (*)	2.208.019.550	2.002.254.437
2 Differences between the total assets in the consolidated financial statements prepared in accordance with TAS and the total assets in the consolidated financial statements prepared in accordance with Communiqué on Preparation of Consolidated Financial Statements of the Banks	(23.389.351)	(4.522.503)

VII. Explanations related to risk management

The footnotes and explanations prepared in accordance with the “Communiqué On Disclosures About Risk Management To Be Announced To Public By the Banks” published in the Official Gazette dated 23 October 2015 and numbered 29511 and entered into force as of 31 March 2016 are given in this section. Since standard approach is used in the capital adequacy calculation of the Parent Bank, the tables to be prepared within the scope of Internal Rating Based Approach (IR) are not presented as of 31 March 2026.

Risk management explanations are prepared in accordance with the internal control process adopted by the Board of Directors.

a. Risk management approach and risk weighted assets

1. Explanations related to the risk management approach

Risks exposed as a result of the Bank’s business model are detected on a consolidated basis through the Bank’s risk identification and important evaluation process. Risk mitigation factors and monitoring activities are implemented for the important risks determined. In the Risk Appetite Statement of the Bank, limits are determined for the risks that are deemed important and the declaration is approved by the Board of Directors. Developments regarding the risk limits determined in the Risk Appetite Statement are monitored on a monthly basis and the actions foreseen in the risk appetite statement are applied in the event these limits are exceeded.

Denizbank Risk Management Group Department is an internal systems unit that operates under the Board of Directors and that are assigned to carry out risk management activities. Reports directly to the Board of Directors. Risk Management Group is responsible for the identification and measurement of risks, establishment and implementation of risk policies and implementation procedures, analysis and monitoring as well as reporting of risks within the framework of the principles determined by the Senior Management of the Bank and the Risk Management Group and approved by the Board of Directors.

In the Bank, the delegation levels generated by the customers are determined pursuant to the risk categories determined according to the limit and loan rating components within the bank.

The rating process carried out by the Credit Allocation unit is monitored and reported by the Risk Management Group.

Main components and scope of the risk measurement systems

Bank has a comprehensive risk definition process, including its subsidiaries. Process aims to define the important risks specific to the bank from a broad list, including those exposed by the banking naturally. In the determination stage of the importance level of the risks, the opinions and evaluations of the persons who are expert in this subject are taken. Evaluation results are updated every year and linked to the report and form the basis for the bank’s internal capital assessment processes. The purpose of the activities carried out within the scope of the measurement of the risks is to establish a relationship between the risks undertaken by the bank and the expected earnings and to measure the financial risks that the bank and its subsidiaries are exposed to. The process includes testing the validity of the parameters and assumptions subject to risk measurement.

The Bank determines what kind of reports will be prepared as consolidated and as solo and the authorities to whom they will be forwarded. Ensures that an active internal audit system to be established which will prevent taking risks above the targeted risk level and limits set by the regulatory authority. When the control and reporting of the risks are made, the risk levels that are approved by the Board of Directors are taken into consideration for each risk type.

Risk Management Group ensures the coordination of the internal capital adequacy evaluation process (ICAAP) and the measurement of the risks undertaken by the bank. Within the scope of the ICAAP report, which is a result of the ICAAP process and within the framework of the 3 year strategic plan, the annual stress test report, which presents the effects of the scenarios in which macroeconomic variables are taken into consideration on the bank’s capital and liquidity, is reported to the BRSA. Bank monitors the capital adequacy level internally on a monthly basis.

Disclosures on risk reporting processes provided to Board of Directors and senior management, especially the scope and main content of the reporting

Risk Management Group performs reporting to Senior Management and Board of Directors through the Audit and Risk Committee, Asset Liability Management Committee, Model Risk Management and Validation Committee.

Audit and Risk Committee: Holds quarterly meetings in ordinary situations. Activities performed by the Risk Management Group and risk indicators are presented to the Committee.

Consolidated Financial Report
Originally Issued in Turkish*

Active-Liability Management Committee: Committee meets weekly. It presents risk-limit monitoring and detailed analyses related to indicators such as interest rate and liquidity risk, and capital adequacy.

Model Risk Management and Validation Committee: It is the committee that the Risk model validation results, prepared within the frame of annual plan, are presented to and approved.

Risk management, hedging and mitigation strategies of the Bank sourcing from business model and monitoring process with respect to continuing effectiveness of hedging and mitigating components

Limits, which are defined for risks considered to be significant, are monitored on a monthly basis and actions included in risk appetite statement are taken, if required.

Additionally, taking into consideration the stress conditions of the Bank, an emergency plan regarding capital adequacy has been created in order to fulfil its strategic goals.

VIII. Explanations related to hedging transactions

a. Net investment risk

DFS Group applies net investment hedge strategy to hedge against the currency risk arising on a consolidated basis from the net investments amounting to a total of Euro 1.360 million of one of its subsidiaries Denizbank AG. A part consisting of the same amounts of its foreign currency deposit of the Group has been defined as "hedging instrument". The effective part of the change in value of the foreign currency deposit arising from change in exchange rate has been recognised as "hedging funds" under equity.

On the other hand, as of 1 April 2014, the Parent Bank stopped applying net investment hedge accounting due to its net investment to hedge against the currency risk on the subsidiary of JSC Denizbank, and the total hedging fund which is booked under equity for that subsidiary is amounting to TL (58.164).

Total abroad net investment hedging funds recognised under equity is amounting to TL (36.138.196) as of 31 March 2026 (31 December 2025: TL (35.525.553))

b. Cash flow risk

None.

IX. Explanations related to the consolidated segment reporting

DFS Group operates in four main areas; wholesale banking, SME and agricultural banking, retail banking, and treasury.

Wholesale banking provides financial solutions and banking services to large-scale national and international corporate and commercial customers. Short and long term business loans, investment loans, financial and operational leasing services and factoring loan products, non-cash loans, foreign exchange purchase-sales, foreign trade financing, project financing, structured financing, corporate finance, deposits and cash management services are provided in order to meet the needs of customers for investment, working capital and projects.

Within the scope of retail banking, loan products (consumer, mortgage, vehicle, workplace, tractor, agricultural equipment and investment loans), credit cards with different features, producer cards, investment products (mutual funds, stocks, treasury bills/government bonds, repurchase), deposit products (demand, term, protected), insurance products as well as financial and operational leasing services and factoring loan products are provided to SME and agricultural customers. Alternative distribution channels allow customers to meet their banking needs without the need to physically visit the branches. Among products that meet every day needs of customers are overdraft loans, automated bill payment, chequebooks and rental safes.

Treasury covers the Group's short, medium and long-term price strategies and maturity nonconformities, as well as spot and forward TL and foreign exchange trading, treasury bills, bonds and other domestic and international securities trading and derivative products. Bank also performs activities to provide medium and long-term funding, diversification of funding sources and establishment of an international investor base in this field.

Information on business segments has been prepared in accordance with the data provided from the Parent Bank's Management Reporting System.

Total	126.023.981	165.562.911	129.048.798	122.729.413

3. Explanations on reserve requirements

As per the Communiqué no. 2013/15 "Reserve Deposits" of the Central Bank of the Republic of Turkey ("CBRT"), the Bank keeps reserve deposits at the CBRT for their TL and FC liabilities mentioned in the communiqué.

As of 31 March 2026, all banks operating in Turkey should provide a reserve requirements in a range of 3% to 17% (31 December 2025: between 3% and 17%), excluding accounts providing exchange rate protection support, in a range of 22% to 40% (31 December 2025: between 22% and 40%), including accounts providing exchange rate protection support, depending on the terms of the deposits for their liabilities in Turkish Lira and in a range of 0% to 30% (31 December 2025: between 0% and 30%) for their liabilities in foreign currencies.

The interest income received from reserve requirements of the Bank with the CBRT is amounting to TL 7.945.041 (1 January - 31 March 2025: TL 6.924.782). The related interest income recognised under "Interest on Reserve Requirements".

4. Information on Banks

h. Explanation on provisions

1. Provision for foreign exchange differences on foreign currency indexed loans

As of 31 March 2026, there is no provisions for foreign exchange differences on foreign currency indexed loans (31 December 2025: None). The amount of the provision for foreign exchange differences on foreign currency indexed loans are netted against loans and receivables under assets in the financial statements.

2. Liabilities of provision for employee benefits

TAS 19 requires using the actuarial valuation method for calculation of liabilities.

Accordingly, the following actuarial assumptions were used in the calculation of the total provision for employee termination benefits:

	Current Period	Prior Period
Discount rate	4,17%	4,17%
Interest rate	30,04%	30,04%
Estimated rate of increase in salary/severance pay limit	24,83%	24,83%

As of 31 March 2026, TL 2.306.038 of provision for employee termination benefits (31 December 2025: TL 2.217.283) and TL 1.973.254 of unused vacation provisions and other rights (31 December 2025: TL 2.330.026) were reflected to the consolidated financial statements.

Movement of the provision for employee termination benefits during the period is as follows:

	Current Period	Prior Period
Balance at the Beginning of the Period	2.217.283	1.443.388
Changes in the period	239.240	611.259
Actuarial loss/(gain)	--	635.215
Paid in the period	(151.492)	(478.141)
FX difference	1.008	5.562
Balance at the End of the Period	2.306.039	2.217.283

3. Information on other provisions

Information on the items and amounts causing the excess if other provisions exceed 10% of total provisions:

Current period:

TL 2.807.662 of other provisions represents stage 1 and stage 2 provisions for expected credit loss for non-cash loans, TL 2.849.159 is related to stage 3 provision for expected credit loss for non-cash loans that are unindemnified and not converted into cash, TL 1.318.061 is the provisions for the litigations against the Bank, TL 8.700.000 includes free provision and TL 3.136.245 includes other provisions.

Prior period:

TL 2.638.344 of other provisions represents stage 1 and stage 2 provisions for expected credit loss for non-cash loans, TL 2.881.468 is related to stage 3 provision for expected credit loss for non-cash loans that are unindemnified and not converted into cash, TL 1.182.167 is the provisions for the litigations against the Bank, TL 8.700.000 includes free provision and TL 2.885.167 includes other provisions.

4. Information on share capital increases from revaluation funds during the current period

None.

5. Capital commitments in the last fiscal year and at the end of the following period, the general purpose of these commitments and projected resources required to meet these commitments

The capital is totally paid in and there are no capital commitments.

6. Prior period indicators of the Parent Bank's income, profitability and liquidity; and possible effects of the predictions on equity, considering uncertainty indicators

Balance sheets of the entities under DFS Group are managed prudently, to minimize the negative effects of interest rate, foreign currency and credit risks. This policy contributes to the progress of DFS Group's profitability with a steady increasing trend.

7. Summary information on the privileges given to stocks representing the capital

The Parent Bank does not have any preferred stocks.

8. Information on marketable securities value increase fund

Balance at the End of the Period	1.332.009	1.301.281

11. Explanations on revaluation differences of tangible fixed assets

As of 31 December 2016, in the valuation of the properties in use that are recognised under tangible fixed assets, the cost model has been changed as revaluation model in accordance with TAS 16 "Tangible Fixed Assets". As a result of the revaluation made, the net revaluation difference after tax amounting to TL 6.581.660 has been accounted for in "Other Accumulated Comprehensive Income That Will Not Be Reclassified in Profit or Loss" under equities (31 December 2025: TL 6.601.263).

12. Explanations on profit distribution

At the Ordinary General Assembly meeting held on 26 March 2026, it was resolved to set aside TL 540.025, representing 5% of the net profit for the period, as the first-tier statutory reserve in accordance with Article 519/1 of the Turkish Commercial Code No. 6102, pursuant to the approval of the Banking Regulation and Supervision Agency dated 11 March 2026, a gross first cash dividend of TL 981.930, corresponding to 5% of the capital, to be distributed to shareholders as a gross first cash dividend; after the first cash dividend is paid, TL 64.207, representing 10% of the total amount to be distributed, to be set aside as a second statutory reserve; and, pursuant to the approval of the Banking Regulation and Supervision Agency dated 11 March 2026, TL 642.070 gross second cash dividend to be distributed to shareholders, and the remaining net amount of TL 52.676 to be transferred to the Extraordinary Reserves account to support the Bank's capital adequacy, preserve its financial flexibility, and achieve its long-term strategic objectives; the dividend distribution took place on 30 March 2026.

III. Explanations and disclosures related to consolidated off-balance sheet items

a. Explanation on liabilities in off-balance sheet accounts

1. Type and amount of irrevocable loan commitments

All of DFS Group's off-balance sheet loan commitments are in the nature of irrevocable commitments. As of 31 March 2026, loan granting commitments, commitments for credit card expenditure limits and commitments for cheque payments are TL 123.903.680, TL 964.727.513 and TL 29.602.666 respectively (31 December 2025: TL 111.017.790, TL 778.252.959 and TL 23.297.425 respectively). The details of these items are followed in the off-balance sheet accounts.

2. Structure and amount of probable losses and commitments arising from off-balance sheet items

(i) Non-cash loans including guarantees, bill of guarantee and acceptances of bank and other letters of credit and commitments which can be considered as financial collateral

As of 31 March 2026, DFS Group has letters of guarantee amounting to TL 277.744.245, bill of guarantee and acceptances amounting to TL 1.962.015, and guarantees and warranties on letters of credit amounting to TL 68.755.159 and other guarantees and warranties amounting to TL 36.167.919.

As of 31 December 2025, DFS Group has letters of guarantee amounting to TL 241.516.564, bill of guarantee and acceptances amounting to TL 1.666.094, and guarantees and warranties on letters of credit amounting to TL 53.835.365 and other guarantees and warranties amounting to TL 29.397.979.

(ii) Final guarantees, provisional guarantees, sureties and similar transactions

	Current Period	Prior Period
Provisional Letters of Guarantee	8.440.975	6.712.161
Final Letters of Guarantee	166.791.049	150.098.358
Letters of Guarantee for Advances	23.465.717	20.652.462
Letters of Guarantee given to Customs Offices	629.149	655.624
Other Letters of Guarantee	78.417.355	63.397.959
Total	277.744.245	241.516.564

3. Information on non-cash loans

(i) Total amount of non-cash loans

	Current Period	Prior Period
Non-Cash Loans Given for Obtaining Cash Loans	108.038.562	88.225.637
With Original Maturity of 1 Year or Less	108.038.562	88.225.637
With Original Maturity of More Than 1 Year	--	--
Other Non-Cash Loans	276.590.776	238.190.365
Total	384.629.338	326.416.002

b. Explanations on contingent assets and liabilities

In accordance with the precautionary principle regarding the lawsuits to which the Group is a party, TL 1.318.061 (31 December 2025: TL 1.182.167) provision has been set aside and these provisions are classified under "Other provisions" on the balance sheet. Except for those provisioned, other ongoing lawsuits are unlikely to result in a negative conclusion and cash outflow is not foreseen for them.

c. Explanations on services carried out on behalf and account of other persons

The Parent Bank provides purchase, sale, custody, management and consultancy services on behalf and account of other persons.

Domestic Banks	1.835.977	38.379	6.699.234	224.553
Foreign Banks	347.503	2.176.447	46.719	1.343.702
Foreign Head Offices and Branches	--	--	--	--
Total	2.183.480	2.214.826	6.745.953	1.568.255

3. Information on interest income received from securities

	Current Period		Prior Period	
	TL	FC	TL	FC
Financial Assets at Fair Value Through Profit or Loss	64.944	--	21.076	13.497
Financial Assets at Fair Value Through Other Comprehensive Income	5.269.956	1.750.279	3.242.653	1.375.951
Financial Assets Measured at Amortised Cost	3.505.553	--	3.457.959	20.269
Total	8.840.453	1.750.279	6.721.688	1.409.717

As noted in Footnote VII of Section III, the parent company's portfolios of financial assets measured at fair value through other comprehensive income and financial assets measured at amortized cost include 5- to 10-year government bonds indexed to the Consumer Price Index (CPI), with 6-month real coupon rates that remain fixed throughout the term. As stated in the Treasury Undersecretariat's Investor Guide for CPI-Indexed Bonds, the reference indices used to calculate the actual coupon payment amounts for these securities are based on the CPI from two months prior. The Bank determines its estimated inflation rate accordingly. The estimated inflation rate used is updated as deemed necessary during the year. In this context, the valuation of these securities as of 31 March 2026, was based on an annual inflation estimate of 25%. If the valuation of these CPI-indexed securities had been performed based on the reference index valid as of 31 March 2026, the Bank's valuation differences for securities under equity would have decreased by TL 62.736, and net income for the period would have increased by TL 428.475 to TL 19.544.979.

The consolidated financial statements and notes to the consolidated financial statements of DFH Group have been audited by Güney Bağımsız Denetim ve Serbest Muhasebeci Mali Müşavirlik Anonim Şirketi (A member firm of Ernst & Young Global Limited) and the independent auditors' report dated 21 April 2026 is presented before the consolidated financial statements.

II. Explanations and notes prepared by Independent Auditor

There are no explanations or notes, deemed to be required, and no significant issues which are not mentioned in the prior sections above related to the activities of the DFS Group.

SECTION SEVEN

INTERIM ACTIVITY REPORT

(*) Amounts are expressed in TL in Section Seven.

Message From the Chairman of the Board of Directors

In the first quarter of 2026, DenizBank maintained its steady momentum, delivering financial solutions to our customers to support the growth of the economy. We remain dedicated to elevating customer experience through innovation, people and society-oriented approach.

The current environment has once again demonstrated the resilience of the Turkish economy. Supported by sound macroeconomic fundamentals and policy measures, the impact of the regional events on the domestic markets has remained limited and the recovery in capital inflows have confirmed this outlook. With the Central Bank maintaining its proactive stance, we remain confident that the disinflation process will continue.

In response to the changing monetary environment, our Bank has maintained a balanced and prudent approach to resource management, while seamlessly adapting to the new regulatory framework introduced during the year. Through a strong emphasis on sustainable growth and strategic balance sheet optimization, we continued to broaden our customer base and strengthen our market position. As a result, total assets grew by 10%, customer deposits by 9%, and the total loan portfolio, including both cash and non-cash loans recorded a 13% increase on a consolidated basis.

Going forward, we remain focused on achieving steady, sustainable growth with strong profitability, while strengthening customer engagement and amplifying the positive contribution we make to society. Guided by our long-term vision, DenizBank will continue to serve as a trusted financial partner supporting Türkiye's development and progress.

Message from the CEO

Although the year of 2026 has presented a more balanced outlook on a global scale, global economic outlook weakened again due to increasing geopolitical tensions, and growth expectations have been updated downward in contrast to upside inflation foresights. Particularly, the European Union countries, our main trade partners, were significantly affected by those events due to their energy dependences, compared to other developed economies.

The Turkish economy closed 2025 with a growth that is close to the potential and an ongoing disinflation process even though it fell below expectations. The impact of the conflict remained limited with the support of policy measures applied, and during this process, the Turkish economy demonstrated its resilience against external shocks once again.

Although the ongoing environment of uncertainty in the global economy makes the disinflation path targeted for the Turkish economy more difficult, we believe that these effects will continue to be actively managed and protect the strength of economic activity.

We maintained active balance sheet management

In an era where changing macroeconomic conditions and tightening monetary policies are determinant, our Bank has focused on resource utilization and dynamic management of balance sheet composition. Our bank has maintained both balanced growth and the expansion of its customer base through an asset-based balance sheet management approach while complying with regulations regarding loans and deposits. As a result of this approach, consolidated asset size amounted to TL 2.250 billion as of the first quarter of 2026.

As savings continued to move toward TL assets due to impact of policies aimed at strengthening the Turkish lira, our key financial indicators also maintained their strong performance with the support of our expanding customer base. Within this scope, on a consolidated basis:

- Our total customer deposits on a consolidated basis reached TL 1.377 billion,
- Our cash volume reached TL 1.238 billion,
- Total sum of our cash and non-cash loan volume reached TL 1.623 billion,
- Our equity size reached TL 229 billion
- Our net profit reached TL 19,1 billion.

We focused on increasing our competitive power by working consistently and promptly

At DenizBank, in the first nine months, we continued to be prepared robustly for the period where we will increase our contribution further to the economy and growth. In line with our objective to become one of the most successful and largest banks in Türkiye, we have focused on increasing the competitive power of our Institution with agile and consistent working that creates higher added value.

In terms of technology being one of the most significant keystones of this transformation, we prioritized strengthening our decision-making mechanisms and moving our operational efficiency to the highest standards by increasing our transaction speed with artificial intelligence and data analytics-based projects. In the upcoming period, with the help of the advantages provided by this strong technological infrastructure, we will approach our aim for expanding our customer base and becoming the leading bank of our customers.

We focused on enhancing our competitive power in strategic transformation

During this period, at DenizBank, we focused on directing our resources to areas that generate high added value and have the potential for sustainable growth, while increasing our contribution to the economy. We aimed at strengthening our Bank's competitive capacity in a permanent manner through agile decision-making and consistent practice discipline. We placed our focus regarding technology, one of the main drivers of this transformation, on redesign of our way of doing business with the help of artificial intelligence and data analytics-based solutions. We prioritized strengthening our data-driven decision-making competencies, increasing speed and efficiency in operational processes. In the coming period, due to the flexibility and scalability provided by this infrastructure, we will further improve our customer experience and take stronger steps toward our goal of becoming our customer's main bank.

We provide resources to the projects that pay regard to environmental impacts and social inclusion.

Sustainability has continued to be an integral part of our corporate strategy. In this period, we continued to utilize existing international fundings and the resources that we provide in order to finance investments that meet the criteria of being green and social eligibility. In the meantime, we have reinforced our approach to being an institution that not only provides funding but also guides transformation by informing our customers of emission reduction, environmental risk analysis and industry-based transformation.

We do not limit our sustainability approach to environmental aspects and assume responsibility in areas that contribute to social development. In this respect, we have taken on the role of main sponsor for the 8th DenizBank International Children and Youth Art Biennial that aims to strengthen children and young people's connection to the art.

In the coming period, we will focus on directing our resources to the right areas and firmly maintaining a growth model that creates long term value for all our stakeholders.

Developments in DFSG Companies

The changes in the top management of the bank in the first three months of 2026 are presented below:

As per the board resolution dated 25 March 2026, it was decided to appoint Tuba Köseoğlu Okçu as Executive Vice President in charge of Human Resources Group, and Mehmet Feridun Aktaş as Executive Vice President in charge of Technology Group.

As a result of the Ordinary General Assembly held on 26 March 2026, it was decided to elect Hesham Abdulla Qassim AL Qassim as Chairman of the Board, and Shayne Keith Nelson as Deputy Chairman of the Board so as to serve until 20 March 2028 during the assignment of duty between the Board Members carried out on 26 March 2026.

Other developments that were announced through a material disclosure are summarized below:

- On January 23, 2026, international credit rating agency Fitch Ratings revised Türkiye's credit rating outlook from "Stable" to "Positive," while maintaining its credit rating at "BB-." Following this decision, on January 28, 2026, the rating agency maintained DenizBank's Long-Term Foreign Currency and Long-Term Turkish Lira Debt ratings at "BB-," while revising the outlook from "Stable" to "Positive."
- Fitch Ratings announced on 10 March 2026 that DenizBank's Viability Rating was upgraded from b+ to bb-.
- Within the scope of the Ordinary General Assembly decisions dated 26 March 2026; it was decided to (1) set aside TL 540.025.124,66 as first legal reserve from the net profit of TL 54.904.164.589,38 TL accrued according to the Bank's 2025 balance sheet, to distribute TL 981.930.000 in gross terms as first cash dividend at a rate of 5% of the capital to the shareholders, to distribute TL 642.070.000,00 TL as second cash dividend, to set side TL 64.207.000,00, which is ten percent of the total amount to be distributed, after paying first cash dividend, as general legal reserve, and to transfer the remaining amount to the Extraordinary Reserves account, (2) to select Güney Bağımsız Denetim ve Serbest Muhasebeci Mali Müşavirlik A.Ş. (EY Türkiye) as the Independent Auditor to perform the audit activities for the 2026 accounting period.
- Within the scope of the Board of Directors decision dated 8 December 2025, the CMB application regarding the renewal of the issuance ceiling for domestic financing bills and/or bonds up to a maximum of TL 25.000.000.000 (twenty-five billion Turkish Lira) has been approved as announced in the CMB bulletin dated 9 January 2025 and numbered 2025/2.
- By the Bank's Board of Directors' decision dated 9 February 2026, the CMB application for the issuance of conventional debt instruments up to 3.000.000.000 US Dollars (3 billion USD) or equivalent foreign currency or Turkish Lira, and the issuance of green/sustainable debt instruments up to 2.000.000.000 US Dollars (2 billion USD) or equivalent foreign currency or Turkish Lira, to be sold abroad by our Bank under the EMTN Program or independently was approved, as announced in the CMB's bulletin No. 2026/18 dated 26 March 2026.

Amendments in the Articles of Association within the Period

There were no amendments to the Articles of Association within the Period.

Revisions in Ratings

DenizBank's credit ratings were revised as follows in 2026 after Moody's and Fitch Ratings assessments.

Fitch Ratings revised Türkiye's credit rating outlook from "Stable" to "Positive" on 23 January 2026, and affirmed its credit rating "BB-". Following this decision, on January 28, 2026, the rating agency affirmed DenizBank's Long Term FX and LT Turkish Lira Borrowing rating at "BB-" while revising its outlook to "Positive" from "Stable".
