### 5-year country risk premium (CDS) (basis points)

### Market comment:

We expect XU100 to mix opening this morning. XU100 closed the day at 14.092 level, down by 1.60%.

Total trading volume was average. We anticipate today's trading for BIST100 w/in the 13900 – 14375.

The first 5 stocks that stand out today to our Selected Indicators Scoring System, which you can see in detail on the following pages of our Daily Bulletin: **SOKM, ALARK, KLRHO, BSOKE and BTCIM**. We would like to emphasise that you should read the methodology and disclaimer of our system on the relevant page.

Based on the closing of the last trading day, our Deniz Yatırım Model Portfolio, which is created with an equal distribution rate, performed at -2% on a daily basis, performance of BIST 100 index was realized at -1.6%.

### What we watched:

- TR retail sales accelerated to 13.7% YoY in May.
- TR current account deficit widened to USD 1.46 billion in May, exceeding consensus expectations, mainly due to a wider primary income deficit.

### Today's focus:

- US CPI figures will be on focus today with expectations centered around 0.10% decrease MoM while 3.80% increase YoY

### Equites:

- KORDS:** Brief Notes from 2Q26 Financials Pre-Meeting
- TAVHL:** June pax traffic results / slightly negative
- PETKM:** Ethylene-naphtha spread decreased / neutral
- PGSUS:** June pax traffic results / neutral

## Markets note

Global markets traded cautiously as renewed geopolitical tensions in the Middle East overshadowed broader market sentiment. President Donald Trump reinstated a blockade on Iranian vessels transiting the Strait of Hormuz and called on countries benefiting from US efforts to secure the strategic shipping route to contribute financially, driving oil prices sharply higher and reviving concerns over energy-driven inflation. The latest developments reinforced expectations that central banks may need to keep monetary policy tighter for longer despite recent signs of moderating inflation. Investors are now awaiting today's US CPI report and Fed Chair Kevin Warsh's testimony before Congress for further clues on the policy outlook. Markets currently price in roughly a 51% probability of a Fed rate hike in September, while expectations for policy easing remain limited. On Wall Street, risk appetite weakened, with the Dow, S&P 500 and Nasdaq declining 0.26%, 0.79% and 1.55%, respectively, led by losses in semiconductor stocks as investors continued to question the sustainability of AI-related capital spending. Attention today will also turn to the start of the US banking earnings season, with results from JPMorgan, Goldman Sachs, Bank of America, Citigroup and Wells Fargo expected to provide additional insight into the health of the financial sector and the broader US economy.

BIST 100 index declined 1.60% to close at 14,092 as broad-based selling pressure weighed on the market. while the information technology sector outperformed with 1.86%, financial leasing and factoring index recorded the 9.41% loss, reflecting the cautious tone across domestic equities. According to yesterday's data, Türkiye's current account deficit widened to USD 1.46 billion in May, exceeding consensus expectations, mainly due to a wider primary income deficit and a softer services surplus despite an improvement in the goods balance. The current account excluding gold and energy remained in a USD 3.63 billion surplus, indicating that underlying external balances continue to improve. Meanwhile, retail sales accelerated to 13.7% YoY in May from 11.7% in April, while sales increased 2.4% MoM, suggesting that household consumption remained resilient despite the tight monetary policy environment. Although the wider headline current account deficit may limit short-term optimism, the strong core balance and resilient domestic demand continue to point to a relatively balanced macroeconomic backdrop. The domestic data calendar is relatively quiet today, with investor focus expected to remain on global developments, particularly the US inflation report and Fed Chair Warsh's remarks, which could shape expectations for the Fed's next policy move.

## Equities

### KORDS: Brief Notes from 2Q26 Financials Pre-Meeting

We recently held a meeting with Kordsa on July 13 to discuss recent developments and expectations for 2Q26. Key takeaways from the meeting are provided below.

- **Tire Reinforcement Segment:** While a full recovery in sales volumes has not yet been observed due to global competition, we believe that the dynamics created by geopolitical developments will positively impact product prices, supporting both growth and operational profitability.
- **Composite Technologies Segment:** With the rise of artificial intelligence, demand for ceramic yarn products is particularly prominent. This appears to be positively contributing to sales revenue and overall profitability. While other composite product groups are also said to be supporting growth, it should be noted that composite products account for approximately 25% of revenue according to the latest data.
- **One-off Effect:** The sale of land will provide a cash inflow to the company. Furthermore, this transaction is expected to have a positive impact on the net income for the period.

Kordsa Teknik Tekstil reported sales revenue of TRY 8,756 million, EBITDA of TRY 637 million, and net profit of TRY 33 million in 1Q26.

Based on evaluation of the possible developments of 2Q26, we believe it will support the company both operationally and financially. On the other hand, we would like to point out that while the data shaped around our assessments may also support share performance, the high net debt/EBITDA metric may put pressure on the valuation. Our 12-month target price for Kordsa is TRY 77.80 and our recommendation is HOLD.

### TAVHL: June pax traffic results / slightly negative

TAV Havalimanları (TAVHL) has released its monthly traffic results. Accordingly, in the June 2026 period, the total number of passengers realized at 11,546,679, while domestic passengers stood at 3,394,976 and international passengers at 8,151,703.

- **Total passengers:** The total number of passengers, which was 11,615,429 in the June 2025 period, realized at 11,546,679 in the same period of 2026, representing a 0.6% decrease.
- **Domestic passengers:** The number of domestic passengers, which was 3,357,801 in the June 2025 period, increased by 1.1% to realize at 3,394,976 in the same period of 2026.
- **International passengers:** The number of international passengers, which was 8,257,628 in the June 2025 period, decreased by 1.3% to realize at 8,151,703 in the same period of 2026.

With the June data, TAV Havalimanları' operational results for the 2Q26 period have been finalized. During this period, the total number of passengers decreased by 2.1% year-on-year to realize at the 29.2 million level, with international passengers showing a 4.7% decrease and domestic passengers showing a 3.5% increase.

In the January–June 2026 period, the total number of passengers reached 48,220,097 with a 1% increase; domestic passengers rose by 5% to reach 18,272,769, while international passengers receded to the 29,947,328 level with a 1% decrease.

A decline in passenger numbers continued to be recorded in June, a month in which the impact of geopolitical tensions partially eased. Against the Company's 2026 passenger growth target of 3% to 9%, it is observed that first-half growth fell below expectations due to the current conjuncture. Accordingly, we evaluate the disclosed data as slightly negative.

On the other hand, in the Georgia operations, which alone constitute 22% of the year-end consolidated EBITDA, a 6% growth was captured in June after the weakening in March and April lost momentum in May. Under the current outlook, while we expect pressure to persist in the second-quarter financial results, we project that this recovery trend could come to the forefront during the high season of the third quarter.

### PETKM: Ethylene-naphtha spread decreased / neutral

According to data shared by Petkim, the ethylene-naphtha spread stood at 69.5 USD/metric ton as of July 10, 2026, marking a weekly decrease of 36.3 USD/metric ton (34.3%). While ethylene prices fell by 7.0 USD/metric ton (0.9%), naphtha prices rose by 29.3 USD/metric ton (4.6%). As a reminder, the spread had increased by a total of 40.8 USD/metric ton the previous week, rising from 65.0 USD/metric ton to 105.8 USD/metric ton.

The ethylene-naphtha spread, which stood at 330.9 USD/metric ton at the beginning of the year, is projected to be 2022, 2023, 2024, and 2025 at 585.6 USD/metric ton, 364.9 USD/metric ton, 190.4 USD/metric ton, 178.4 USD/metric ton, and 245.0 USD/metric ton, respectively.

The Platts Petrochemical Index rose 2.1% on a weekly basis to 912.7 USD/metric ton. The index, which stood at 789.4 USD/metric ton at the start of the year, 2022, 2023, 2024, and 2025 at USD 1,103.9/metric ton, 1,065.1 USD/metric ton, 854.0 USD/metric ton, USD 872.1 USD/metric ton, and 789.4 USD/metric ton, respectively.

Although the ethylene-naphtha spread is a general profitability metric for the petrochemical industry, final product prices should be followed to make a better interpretation of the profitability outlook. The Platts index can also be followed in this respect, as it is an index of the prices of certain petrochemical products. However, it should be noted that the Platts index does not exactly match the product range produced by Petkim.

For nearly two months, we have been observing a downward trend in both the ethylene-naphtha spread and the Platts index. In fact, two weeks ago, both the ethylene-naphtha spread and the Platts index had fallen below their historical averages. Although we saw a recovery last week, we observed that the weak trend continued this week as well; we would like to note that current levels are still trading near their historical averages.

**Overall comment:** While we expect Petkim to report quite strong financial results for the second quarter of the year, we anticipate that the positive impact resulting from the price pullback in the aromatics segment—which has lagged behind the decline in naphtha prices—will carry over into the third quarter, albeit to a limited extent. On the other hand, we would like to remind you that the economic environment and the structural characteristics of the production facility continue to pose a disadvantage for the company in the long term. **Our 12-month target price for Petkim Petrochemical is 21.00 TL, and we maintain our HOLD recommendation.** The stock has underperformed the BIST 100 Index by 6% year-to-date

## PGSUS: June pax traffic results / neutral

Accordingly, in the June 2026 period, the total number of passengers realized at 3.74 million, while international passengers stood at 2.19 million and domestic passengers at 1.55 million. The passenger load factor was tracked at 85.7%, while the total Available Seat Kilometers (ASK) reached 6,709 million km.

- **Total passengers:** The total number of passengers, which was 3.61 million in the June 2025 period, increased by 3.5% to realize at 3.74 million in the same period of 2026.
- **Total load factor:** The total passenger load factor, which was 86.6% in the June 2025 period, realized at 85.7% in the same period of 2026.
- **Domestic & international passengers:** While the number of domestic passengers was 1.29 million in the June 2025 period, it increased by 20.2% to realize at 1.55 million in the same period of 2026. On the other hand, the number of international passengers decreased by 6% compared to 2025, falling to 2.19 million passengers.
- **Total Available Seat Kilometers (ASK):** While it was 6,798 million km in the June 2025 period, it decreased by 1.3% to realize at 6,709 million km in the same period of 2026.

**With the June data, Pegasus' operational results for the 2Q26 period have been finalized.** During this period, the total number of passengers decreased by 1.2% year-on-year to realize at the 10.55 million level, with international passengers showing a 10.8% decrease and domestic passengers showing a 15.7% increase.

**In the January–June 2026 period, the total number of passengers reached 20.37 million with a 3% year-on-year increase.** During this period, international passengers realized at 12.15 million with a 4% decrease, while domestic passengers stood at 8.22 million with a 16% increase. While the passenger load factor hovered at the 84.5% level, total Available Seat Kilometers reached 36,800 million.

**Although we find it partially positive that the decline in international passenger numbers lost momentum in June and that the total passenger count was balanced by domestic growth, we evaluate the disclosed data as neutral..**

**Overview:** Our 12-month target price for Pegasus Havalimanları is TRY305,50 and our recommendation is Under Review (U.R.). The stock underperformed the index by %31 YTD.

## KAP (Public Disclosure Platform) news

### GLCVY

Our company won the auction for 2 individual and 1 commercial portfolio with a principal amount of 1.243 million TL, out of 10 individual and 2 commercial portfolios offered for sale in Denizbank A.Ş.'s non-performing loan sale on July 10, 2026, by submitting the highest bid. A total of 15 asset management companies participated in this auction. The finalization of the auction results is subject to the approval of the Board of Directors of the bank that opened the auction, and after approval, the contract signing process and the transfer of the receivables subject to the sale will be initiated.

### LKMNH

According to information provided to our company by our subsidiary, Lokman Hekim Van Health Services Inc., studies have been initiated to purchase a plot of land approximately 1,800 m<sup>2</sup> in size located adjacent to the hospital building, with the aim of increasing the service capacity and quality of Lokman Hekim Van Hospital. As part of this investment, it is planned to construct or have constructed an additional hospital building with approximately 10,000 m<sup>2</sup> of enclosed space, in addition to the existing 12,500 m<sup>2</sup> hospital building.

### GWIND

Our company's financial and operational results for the period 01.01.2026 – 30.06.2026 are planned to be publicly announced on 10.08.2026 after the close of trading on the Istanbul Stock Exchange.

### MIATK

Our subsidiary, Tripy Mobility Teknoloji A.Ş., has signed a strategic cooperation agreement today in Tianjin, China, with CalmCar, a China-based developer of autonomous driving technologies, to expand its activities in the field of autonomous mobility and AI-based transportation technologies. CalmCar is one of China's leading technology companies developing fully autonomous, L4-level driverless vehicles and is carrying out various projects with global automotive manufacturers and key stakeholders in the mobility ecosystem. The company's technology is used in different automotive platforms, primarily by Volkswagen, Polestar, and SAIC Motor, and is developed based on millions of kilometers of test data and years of R&D work. Under the signed agreement, work will be carried out to prepare CalmCar's autonomous driving technology, which runs on Nvidia and Horizon Robotics hardware, and the Robotaxi solution, developed on the MIFA 7 electric vehicle platform produced by SAIC Motor, for commercial use in selected international markets, primarily Turkey. The main activities that our Company will undertake within the scope of the collaboration are as follows: Conducting the necessary technical adaptation and localization studies in Türkiye,

Planning and operational management of road tests,  
Establishing the fleet management infrastructure,  
Developing remote operation, call center and fleet control systems,  
Creating Robotaxi fleet leasing and mobility service models for corporate customers,  
Developing commercial operations with public institutions, the private sector and international business partners,  
Planning operational activities in markets to be determined outside of Turkey.

The Robotaxi platform developed within the scope of the project has completed over 100,000 hours of real road tests abroad to date, and over 3.8 million hours of engineering work have been carried out during the development process. The vehicles operate with advanced sensor fusion, high-resolution mapping, artificial intelligence-based decision-making systems and a multi-layered safety architecture with L4 level autonomous driving capability. Tripy Mobility Teknoloji A.Ş. aims to complete the testing processes in Türkiye within the framework of the relevant legislation as part of this project, and to carry out preparations for commercial operations after obtaining the necessary permits. In addition, preliminary preparations and application processes for Robotaxi operation in London are ongoing as part of activities targeting the European market.

The global autonomous mobility market is expected to continue its rapid growth in the coming years. According to projections published by Goldman Sachs Research, the global Robotaxi market is expected to reach approximately US\$415 billion in 2035, with approximately 6 million Robotaxi vehicles in service worldwide. With this strategic collaboration, Tripy aims to take an early stage in AI-powered next-generation mobility technologies and to capitalize on growth opportunities both in Türkiye and in international markets.

## AKSEN

As stated in our Special Announcement dated April 7, 2023, a 20-year energy sales agreement in US Dollars was signed with the Electricity Company of Ghana for the construction, electricity generation, and guaranteed sale of the generated electricity at the Kumasi combined cycle natural gas power plant with an installed capacity of 350 MW. The first phase of the plant, which reached an installed capacity equivalent to 130 MW in simple cycle mode as of January 19, 2026, has been completed in combined cycle mode, and as of July 13, 2026, it has reached an installed capacity of 179 MW. Further announcements regarding developments related to the second phase (171 MW) of the plant will be made to the public as they occur.

## CWENE

Our company has received a capital advance of 296,946,997 TL from our current shareholder, Tarzan Tarık Sarvan, transferred to the company account.

## TRALT

As part of the share buyback process initiated by the decision of our Company's Board of Directors dated June 29, 2026; on July 13, 2026, shares of Türk Altın İşletmeleri A.Ş. with a nominal value of 400,000 TL were repurchased on the Istanbul Stock Exchange at a price range of 51.30 – 51.50 TL per share (weighted average 51.40 TL). The ratio of shares repurchased on July 13, 2026 to the capital is 0.01249%. Together with the previous buyback amount of 75,000,000 shares, the total ratio of shares repurchased to the capital has reached 2.6760%.

## FROTO

Our company's financial reports for the interim accounting period of January 1, 2026 – June 30, 2026 are planned to be publicly disclosed on August 4, 2026.

## TOASO

Our company's financial reports for the accounting period of January 1, 2026 – June 30, 2026 are planned to be publicly disclosed on July 29, 2026.

| Share buybacks |        |                        |          |        |                           |                   |               |                   |

## Brief Notes from the 2Q26 Financials Pre-Meeting

### ALKIM

We held a meeting with Alkim Kimya on July 2 to discuss recent developments and the 2Q26 period. The key takeaways we compiled from the meeting are presented below.

**The US-Iran war** positively impacted prices and demand in the sodium sulfate segment.

**On the other hand**, a production halt at one of the Company's clients in the sodium sulfate segment created a negative volume impact of 16-17 thousand tons. However, production is expected to resume in July.

**At the beginning of the year**, the Company targeted a sales volume of 300-310 thousand tons in the sodium sulfate segment. It was stated that despite the negative impact of the client's production halt, the target still appears achievable alongside the performance expected in the second half.

**A positive outlook prevails in the potassium sulfate segment.** Following a sales performance of 3,744 tons in 1Q26, volume exceeded the 8 thousand-ton level in 2Q26, partially compensating for the loss in the sodium sulfate side. Company management considers maintaining a monthly production pace of 3 thousand tons in potassium sulfate to be crucial, and it was expressed that raw materials for potassium sulfate are sourced from Jordan with no supply issues. Furthermore, the Company had a plan to reduce the potassium chloride ratio in potassium sulfate production. Having successfully lowered this ratio to optimum levels through ongoing efforts, this is expected to positively affect profitability in the chemical segment over the medium term.

**Consequently**, while the April-May period marked a recovery phase in terms of EBITDA for the Company's chemical business line, the current outlook points to better financial results in 2Q26 compared to 1Q26, and in 2H26 compared to 1H26.

**On the paper side**, it was noted that the new investment could come online during the August-September period and contribute around 20-25 thousand tons to the 2026 volume, while a recovery was also recorded in the paper business line during 2Q, similar to the chemical business line.

**1Q26 Financials:** Alkim Kimya reported sales revenues of TRY 1,238 million (down 7% year-on-year), a negative EBITDA of TRY 15 million, and a net loss of TRY 196 million (1Q25: net loss of TRY 144 million) in the 1Q26 period. Due to inflation accounting, a negative impact of TRY 47 million was generated under the monetary gain/loss item in the 1Q26 financial statements. Our 12-month target price for Alkim Kimya stands at TRY 23.00, and our recommendation is HOLD.

## TABGD

We held a meeting with TAB Gıda on July 2 to discuss recent developments and the 2Q26 period. The key takeaways we compiled from the meeting are presented below.

**The Company's expectations for the full year of 2026** were i) revenue growth of 8% to 10% above inflation and ii) new restaurant openings equivalent to 10% of the existing restaurant network. Overall, the performance in the first 6 months of the year remains within annual targets.

**No significant deterioration in consumption has been observed so far.** Despite the presence of a slowdown risk on the macro side, it has not yet distinctly reflected on operations.

**Weather conditions fell below expectations in the second quarter.** Especially the cold and rainy weather during the April–May period acted as one of the elements limiting restaurant traffic. However, despite this, we understand that sales were in line with expectations.

**The product mix is expected to be parallel to last year.** While a similar outlook to last year is anticipated for the operational margin, tax expenses are projected to remain high, parallel to the first quarter.

**Additionally, key developments regarding the sale of 32.8 million lots of shares** transferred by the controlling shareholder TFI between June 9 and 11 include:

Following the dematerialization carried out in June, approximately 32.8 million lots were added to the free float. While a portion of the shares entering the free float consisted of TFI executives or former partners, block sales executed by financial investors EBRD and ELQ Investors were tracked.

Following the sales by EBRD and ELQ Investors, a total of approximately 24 million lots have been sold. Management evaluates that the block sales are largely completed and that the execution of these transactions in a short period of about 3 weeks stands as an important indicator pointing to strong foreign demand.

**1Q26 Financials:** TAB Gıda reported sales revenues of TRY 13,150 million (up 14% year-on-year), an EBITDA of TRY 2,235 million, and a net profit of TRY 224 million (1Q25: net profit of TRY 406 million) in the 1Q26 period. Due to inflation accounting, a negative impact of TRY 170 million was generated under the monetary gain/loss item in the 1Q26 financial statements.

**Our Assessment:** We view positively that the first-half results realized in line with the Company's annual guidance, and that the growth in ticket counts and revenue was preserved despite weather conditions falling below seasonal norms. Due to the significant seasonality effect in the Company's financials, we will closely monitor the 2nd and 3rd quarter outlooks. Furthermore, following the substantial completion of the share transfers and block sales that recently pressured the stock, we continue to view the increased free float positively in the medium term as it supports stock liquidity and international investor access. Our 12-month target price for TAB Gıda stands at TRY 375.00, and our recommendation is BUY. The stock has underperformed the BIST 100 index by 15% since the beginning of the year. Based on trailing 12-month data, the stock trades at an EV/EBITDA multiple of 5.3x. According to our 2026 forecasts, the stock trades at an EV/EBITDA multiple of 4.4x. As of the latest close, the Company's market capitalization stood at USD 1,255 million, reaching its lowest level in the past year. Moreover, since June 9, 2026, when the share transfer transactions commenced, TABGD shares have posted a performance of -23% in absolute terms and -26% on a relative basis against the BIST 100 index.

**ANHYT**

We held a meeting with Anadolu Hayat Emeklilik on July 2 to discuss recent developments and the 2Q26 period. The key takeaways we compiled from the meeting are presented below.

**The relative loss of momentum observed in premium production** over the past months stems from the Company pursuing a profitability-oriented strategy rather than volume-focused growth. As of June, we expect a recovery in this area.

**We anticipate that growth will gain acceleration in the credit-linked life insurance branch**, which is the Company's highest-margin product group. This recovery will lift the overall technical profitability of the life insurance side. In summary, the life insurance segment maintains its strong outlook in terms of technical profitability.

**Although the fund size on the pension (BES) side** has been affected by the volatility in gold prices, the segment's capacity to generate revenue persists. Furthermore, the share of pension revenues within the total income statement currently remains low. Therefore, unlike its competitors, we consider the preservation of profitability in this segment to be significant.

**As these will be the financial results for the first half of the year**, a revaluation gain is expected to be recorded in the Company's Venture Capital Investment Fund portfolio. Although the contribution of this item to total profitability will remain limited, it stands out as a supporting factor for net profit.

**1Q26 Financials:** Despite a tax effect of TRY 624 million in the 1Q26 period, Anadolu Hayat Emeklilik reported a net profit of TRY 1,661 million, representing a 59% increase year-on-year. On the operational side, it was observed that the pension segment managed to preserve its technical income. In 1Q26, pension technical income reached TRY 185 million, marking an increase of 2% year-on-year and 139% on a quarterly basis. Total premium production on the life insurance side realized at TRY 5,676 million in the 1Q26 period, up 29% compared to the same period last year. Technical income in the life segment outperformed premium growth; during this period, life technical income rose by 33% year-on-year to approximately TRY 827 million. When the general technical division balance (non-life + life + pension) for the 1Q26 period is examined, it realized at TRY 1,012 million, indicating a 26% increase year-on-year and a 23% decrease quarter-on-quarter.

**Operational Data Disclosed Following 1Q26 Financials:** In the life insurance segment, the Pension Monitoring Center (EGM) has most recently published the assets under management (AUM) data for May. As of May, the total assets under management rose by 67% to TRY 2,047 billion. Anadolu Hayat Emeklilik's total assets under management reached TRY 345 billion as of May, with an increase of 63%. During this period, its market share realized at 16.9%. On the premium production side, the total gross written premium figure in the January–May 2026 period realized at TRY 9.6 billion, up 60% compared to the same period last year. We expect the Company to generate TRY 27.1 billion in premium production for the full year of 2026. Accordingly, the Company's disclosed premium production figures meet 36% of our expectation.

**Our Assessment:** Although premium production did not fully capture our expected acceleration in the first half of the year, we evaluate that Anadolu Hayat Emeklilik harbors strong growth potential, driven both by the yet-to-be-disclosed June data and the fact that the deviation from our expectations remains limited. Our expectation for ANHYT for the full year of 2026 points toward a gross written premium forecast of TRY 27 billion and a net profit forecast of TRY 7.4 billion. Currently, we maintain our 12-month target price for Anadolu Hayat Emeklilik at TRY 168.86 and our recommendation as BUY

## SAHOL

We held a meeting with Sabancı Holding on July 3 to discuss recent developments and the 2Q26 period. The key takeaways we compiled from the meeting are presented below.

**In the banking segment,** there is a quarterly weakening due to rising costs and the absence of the anticipated interest rate cuts.

**In the energy segment,** a positive period was left behind, driven by a favorable production mix and trading contributions on the generation side, along with the reflections of the new tariff period on the distribution side.

**In the insurance segment,** while business is going well on the Agesa side, the recovery process continues at Aksigorta.

**In the cement segment,** while this will be the final quarter in which Akçansa is consolidated and a one-off income from its sale will be recorded, a positive performance is observed in Çimsa's international operations despite a high base effect in domestic sales volume.

**In the tire segment,** a strong recovery continues, similar to the previous quarter; however, a one-off expense to be recorded due to the Competition Authority fine acts as a pressure element on net profit.

**1Q26 Financials:** Sabancı Holding reported a consolidated net profit of TRY 318 million in the 1Q26 period, representing a 94% decrease on a quarterly basis (1Q25: net loss of TRY 3,847 million, 4Ç25: net profit of TRY 5,080 million). Due to inflation accounting, a negative impact of TRY 13,991 million was generated under the monetary gain/loss item in the 1Q26 financial statements.

We calculate Sabancı Holding's net asset value (NAV) at approximately TRY 438 billion. Based on the latest closing price, the net asset value discount stands at 53%.

We favor Sabancı Holding due to its strong balance sheet structure, medium-term targets, accelerating investments in new economy sectors (such as energy & climate technologies, advanced materials, and digital), and uninterrupted dividend payments. Our 12-month target price for Sabancı Holding stands at TRY 151,59, and our recommendation is BUY.

**SOKM**

We held a meeting with Şok Marketler on July 3 to discuss recent developments and the 2Q26 period. The key takeaways we compiled from the meeting are presented below.

**As a result of the market share gains by discount retailers** that we observed in the first quarter continuing into this period, we evaluate that the Company sustained its real growth, resulting in a growth rate of 6% to 6.5%.

**When looking at the components of like-for-like (LFL) growth;** while we project that basket growth realized lower in nominal terms compared to the first quarter due to ongoing promotions and price competition, we believe that the overall performance was similar to the first quarter, driven by an improvement in store traffic.

**We expect the share of Şok 2.0 stores** within total revenues to approach approximately 10% in the 1H26 period. **We evaluate that net working capital management and cash flow were strengthened** during the 2Q26 period through inventory optimization.

**While we anticipate an expansion in the Company's non-TAS 29 EBITDA margin,** we expect the TAS 29-adjusted EBITDA margin to realize close or parallel to 2Q25 levels.

**1Q26 Financials:** Şok Marketler reported a revenue of TRY 76,316 million, an EBITDA of TRY 456 million, and a net loss of TRY 736 million in 1Q26. Due to inflation accounting, a positive impact of TRY 5,152 million was generated under the monetary gain/loss item in the 1Q26 financial statements.

**Our Assessment:** We continue to see discount retailers come further to the forefront as a result of declining purchasing power. While we view the real growth positively, we evaluate the potential for slight pressure on the EBITDA side due to TAS 29 inventory valuation adjustments as limited negative. Our 12-month target price for Şok Marketler stands at TRY 80.00, and our recommendation is BUY.

## PETKM

We held a meeting with TAB Gıda on July 2 to discuss recent developments and the 2Q26 period. The key takeaways we compiled from the meeting are presented below.

**The Company's expectations for the full year of 2026** were i) revenue growth of 8% to 10% above inflation and ii) new restaurant openings equivalent to 10% of the existing restaurant network. Overall, the performance in the first 6 months of the year remains within annual targets.

**No significant deterioration in consumption has been observed so far.** Despite the presence of a slowdown risk on the macro side, it has not yet distinctly reflected on operations.

**Weather conditions fell below expectations in the second quarter.** Especially the cold and rainy weather during the April–May period acted as one of the elements limiting restaurant traffic. However, despite this, we understand that sales were in line with expectations.

**The product mix is expected to be parallel to last year.** While a similar outlook to last year is anticipated for the operational margin, tax expenses are projected to remain high, parallel to the first quarter.

**Additionally, key developments regarding the sale of 32.8 million lots of shares** transferred by the controlling shareholder TFI between June 9 and 11 include:

Following the dematerialization carried out in June, approximately 32.8 million lots were added to the free float. While a portion of the shares entering the free float consisted of TFI executives or former partners, block sales executed by financial investors EBRD and ELQ Investors were tracked.

Following the sales by EBRD and ELQ Investors, a total of approximately 24 million lots have been sold.

Management evaluates that the block sales are largely completed and that the execution of these transactions in a short period of about 3 weeks stands as an important indicator pointing to strong foreign demand.

**1Q26 Financials:** TAB Gıda reported sales revenues of TRY 13,150 million (up 14% year-on-year), an EBITDA of TRY 2,235 million, and a net profit of TRY 224 million (1Q25: net profit of TRY 406 million) in the 1Q26 period. Due to inflation accounting, a negative impact of TRY 170 million was generated under the monetary gain/loss item in the 1Q26 financial statements.

**Our Assessment:** We view positively that the first-half results realized in line with the Company's annual guidance, and that the growth in ticket counts and revenue was preserved despite weather conditions falling below seasonal norms. Due to the significant seasonality effect in the Company's financials, we will closely monitor the 2nd and 3rd quarter outlooks. Furthermore, following the substantial completion of the share transfers and block sales that recently pressured the stock, we continue to view the increased free float positively in the medium term as it supports stock liquidity and international investor access. Our 12-month target price for TAB Gıda stands at TRY 375.00, and our recommendation is BUY.

## ALARK

We held a meeting with Alarko Holding on July 6 to discuss recent developments and the 2Q26 period. The key takeaways we compiled from the meeting are presented below.

**In the energy business line,** while the generation segment—which will be included in the balance sheet for the last time due to its transfer—experienced a weak season owing to low electricity prices, the distribution segment completed a period in line with expectations. As the Holding continues its investments, there is no change in its target of reaching a USD 1 billion asset base by the end of the year. Additionally, although no one-off income or expense is expected since the swap transaction of the electricity generation and distribution business lines is close to equivalent value, we should note that this is not definitive and will be finalized following the independent audit.

**In the agriculture business line,** while operations continue across a total of 1,500 decares domestically and abroad, the Holding persists in its operational improvement efforts. As a result, although we do not have a definitive forecast, we believe that the agriculture business line could report better EBITDA and a lower net loss in 2Q.

**In the REIT business line,** works continue for the opening of the Bodrum hotel. Furthermore, we would like to remind that a 200% rights issue decision was taken on the REIT side in mid-June.

**In the aviation business line,** while the conversion of the first aircraft has been completed and made ready, its licensing and sale are expected to be carried out by the end of the year.

**1Q26 Financials:** Alarko Holding reported a consolidated net profit of TRY 153 million in the 1Q26 period. Due to inflation accounting, a positive impact of TRY 1,470 million was generated under the monetary gain/loss item in the 1Q26 financial statements.

Our 12-month target price for Alarko Holding stands at TRY 141.82, and our recommendation is BUY.

## THYAO

**Our initial views on 2Q26:** We evaluate that the 2Q26 period, which began under the shadow of rising geopolitical risks, concluded as a quarter where Türk Hava Yolları effectively utilized its geopolitical positioning and fleet composition advantages. The traffic data we monitor clearly demonstrates the benefits provided by the Company's Asia-focused growth strategy. In addition to this strategy, the Company further strengthened its growth by capturing temporary market share from Gulf-based airlines. We expect that rising unit revenues, along with passenger and capacity growth in markets outside the Middle East, will support revenue performance. Additionally, on the cargo side, both increasing volumes and rising unit revenues will accelerate revenue growth. **Our preliminary expectations point to a 15% growth in passenger revenue to \$5.7 billion, and cargo revenue approaching \$1.2 billion.** We observe that this positive outlook on the revenue side partially limits the pressure on profitability stemming from rising fuel prices. Brent crude oil prices, which averaged \$66.7 in 2Q25, realized at \$96.7 in 2Q26. As a result, we anticipate that fuel expenses will nearly double compared to the same period last year.

**Our preliminary expectations for the 2Q26 period point to a revenue of \$7.1 billion and an EBITDAR of \$879 million.** These forecasts indicate a year-on-year revenue growth of approximately 18% and an EBITDAR margin of 12.4%. As may be recalled, following the 1Q26 financial results, the Company shared its own guidance for 2Q26. Türk Hava Yolları' 2Q26 expectations were shaped under the shadow of regional geopolitical developments and rising fuel costs. Management had anticipated that **passenger capacity and the number of passengers carried would remain flat** compared to the same period last year in this quarter. This indicated a step back from the previous 9% growth target and a more cautious stance. On the Company side, **ex-fuel unit costs were expected to increase by 10-14% year-on-year**, while total **revenues were projected to rise by 11-12%**, supported by improvements in cargo and passenger unit revenues. Since the pressure of fuel costs, which have lagged effects, would become more pronounced during this period, the **EBITDAR margin guidance was estimated to be between 2-8%.** In summary, the preliminary forecasts derived from our model indicate a performance above the initial guidance shared by the company.

**Following the geopolitical developments, our model dynamics for Türk Hava Yolları have changed.** In the update note we shared at the end of 2025, one of the main pillars of our 2026 expectations was that *"unit revenues would continue to be pressured in parallel with increasing competition."* However, looking at the current conjuncture, we see that the main narrative for 2026 has shifted. Despite rising fuel costs, unit revenue growth and strong cargo operations come to the fore, thanks to the geopolitical advantage and flexible fleet structure achieved by Türk Hava Yolları. Furthermore, we observed that the growth target in Asian operations, which forms the basis of our 2026 strategy, has turned into a greater advantage for the company coupled with these geopolitical tensions. **In parallel with the changing conjuncture, we can already state that our current model will point to significant growth on the revenue side, and through this strong revenue performance, the negative impact on the EBITDAR margin caused by cost pressures will be largely compensated.**

**1Q26 Financials:** Türk Hava Yolları reported a revenue of USD 5,916 million in the 1Q26 period. During this period, the total number of passengers increased by 12.7% year-on-year to reach 21.3 million, while passenger revenues showed a 19.9% increase compared to the same period last year. The cargo segment, on the other hand, was positively impacted by the contraction in market supply. Cargo volume carried recorded a 14.8% increase in 1Q26 compared to the same period last year, while cargo revenues rose by 29.5% driven by strong growth in unit revenues. Consequently, total revenues increased by 21.1% year-on-year in 1Q26. Evaluating the process since 2023; following the 43% growth in 1Q23, this 21% increase recorded in 1Q26 was registered as the second-highest first-quarter growth historically. EBITDA increased by 17.5% year-on-year to USD 591 million, while EBITDAR grew by 15.8% in this period to USD 769 million. Following the net loss position in 1Q25, a net profit of USD 226 million was achieved in 1Q26, with the performance of the investment portfolio also positively supporting the net profit.

**Our General Assessment:** Despite the geopolitical tensions experienced in March, the Company started the year with a strategic location advantage and exhibited one of its strongest year-on-year growth performances. Looking at the first half of the year, it is observed that this positive impact continues unshaken. While reserving our right to revise our model following the April traffic data, we maintained our 12-month target price for Turkish Airlines at TRY 404.90, but revised our stock recommendation from BUY to "Under Review." Our expectation for the full year of 2026 was for the Company to report USD 25.6 billion in sales revenue, USD 5.1 billion in EBITDA, and USD 2.6 billion in net profit. The current conjuncture highlights the need for an upward revision in our revenue forecasts, while indicating that our EBITDA expectation will remain at current levels.

## DOHOL

**We held a meeting with Doğan Holding recently to discuss recent developments and the 2Q26 period. The key takeaways we compiled from the meeting are presented below.**

**In the energy segment,** while we do not expect real growth in parallel with the weak course of price and the decline in production figures compared to the same period last year, we anticipate profitability figures to be pressured due to costs being predominantly fixed-expense based. In fact, based on EPIAŞ data in our quarterly energy bulletin, we calculate that the Company generated approximately 173,707 MWh of electricity in the 2Q26 period. During this period, electricity generation decreased by 33% quarter-on-quarter and by 13% compared to the same period last year.

**In the mining segment,** Gümüştaş had recorded a 141% revenue growth and a 58% EBITDA margin in the first quarter of the year compared to the same period last year, outperforming the full-year 2026 guidance shared at the beginning of the year, which pointed to a minimum 40% revenue growth and a 40–50% EBITDA margin. The company had achieved a 36% production increase in the first quarter, in line with its annual ore production targets. In the second quarter of the year, we expect revenue growth above inflation, while projecting the EBITDA margin to realize within the Company's guidance. We anticipate that the total CAPEX plan of over USD 70 million indicated for the full year of 2026—following a USD 10 million capital expenditure in the first quarter—continued according to schedule in the second quarter. Notably, while the Company experienced a production decline at one mine due to a DMS investment, it sustained its production activities uninterruptedly at other mine sites.

**In the finance segment,** we expect the positive trend to continue. On the Hepiyi Sigorta side, the growth trend in premium production gained momentum in the 2Q period on a quarter-on-quarter basis. Additionally, the amendment to the Compulsory Traffic Insurance regulation that entered into force on July 1 will not create an additional liability for the company, as it is already making depreciation/diminution in value (değer kaybı) compensation payments. The positive operational and financial outlook is also preserved at the group's other subsidiaries, Doruk Factoring and Doğan Yatırım Banks.

**On the Karel side,** we expect the recovery trend we have been observing for some time to continue in this quarter as well. While we project real growth on the revenue side, we also anticipate the EBITDA margin to continue improving alongside increased operational efficiency.

**On the Doğan Trend Otomotiv side,** in line with the general outlook in the automotive market, we expect sales volumes to sustain their weak and flat course, parallel to the same period last year.

**Across the consolidated results,** we project that the sluggish pricing and decline in production volumes in the energy segment, along with the stagnation on the automotive side, will be balanced by the strong performance in the mining and finance segments, and the recovery in Karel. In light of these dynamics, while we anticipate a flat course in consolidated revenue for Doğan Holding in the 2Q26 period, we expect growth to continue on the EBITDA side.

**1Q26 Financials:** The Holding's sales revenue realized at TRY 23,932 million in the 1Q26 period, representing a 2% decrease. While the mining, investment banking, and factoring business lines formed the main dynamics of growth, Doğan Trend Otomotiv and Hepiyi Sigorta created pressure on sales revenue, in addition to the Ditaş exit. EBITDA reached TRY 2,626 million in the 1Q26 period with a 142% increase, leading to a 6.5 percentage point improvement in the EBITDA margin. The strong contribution from the mining business line, Karel's operational transformation, and the partially recovering automotive business line supported the profitability increase. Lacking the net loss position of TRY 680 million in 1Q25, the Holding shifted to profitability and reported a net profit of TRY 334 million in the 1Q26 period.

**Our 12-month target price for Doğan Holding stands at TRY 31.90, and our recommendation is BUY.**

## MPARK

We recently held a meeting with MLP Sağlık to discuss the latest developments and expectations for 2Q26. Key takeaways from the meeting are provided below.

**Both outpatient and inpatient volumes increased during 2Q26, while the overall operational outlook remained broadly in line with expectations despite fewer working days in May due to the holiday period.** The international health tourism segment delivered a relatively weaker performance during the quarter, mainly due to FX dynamics and a high base effect. We expect low single-digit real revenue growth and double-digit real EBITDA growth on a yearly basis in 2Q26.

The transition process requiring all physicians to be employed on payroll by July 1, 2026 was completed in June. We expect the operational effects of this regulatory change to become more visible in the second half of the year. Accordingly, we anticipate some margin pressure in 3Q26, followed by a more stable margin profile in 4Q26.

Regarding the land sale announced on May 12, 2026, the company had disclosed a TRY166 million asset disposal loss. Following the impact of inflation accounting, taxes and other adjustments, this transaction is expected to have a negative impact on 2Q26 financial results. In addition, the TRY182 million deferred tax income recognized in 1Q26 due to changes in tax legislation is expected to normalize in 2Q26.

**1Q26 Financials:** MLP Sağlık reported revenue of TRY16,252 million in 1Q26, up 6% YoY. Domestic patient revenue increased by 5.6%, supported by a 4.4% rise in inpatient revenue and a 6.9% increase in outpatient revenue. International health tourism revenue also contributed positively, rising 4.0% YoY. Meanwhile, other business lines, including management consultancy services provided to university hospitals, grew by 12.2%. EBITDA increased by 25% YoY to TRY4,810 million, with the EBITDA margin improving by 4.6 percentage points. The company reported TRY1,668 million in net profit during 1Q26.

We believe the company maintained its operational momentum during 2Q26. Continued growth in outpatient and inpatient volumes, together with the expected real improvement in revenue and EBITDA, should support operating performance. However, net profit growth is likely to remain more limited relative to operating performance due to the normalization of deferred tax income. Looking ahead, the positive impact of the SUT (Health Implementation Communique) revisions implemented earlier this year, together with the stronger-than-expected second-period 2026 TTB (Turkish Medical Association) coefficient increase, is expected to become more visible in the second half of the year. In addition, the completion of the physician payroll transition ensures full regulatory compliance and supports the company's longer-term operating outlook. We maintain our BUY recommendation with a 12-month target price of TRY640.00.

## CCOLA

**We recently held a meeting with Coca Cola İçecek on July 7 to discuss recent developments and expectations for 2Q26. Key takeaways from the meeting are provided below.**

A slight year-on-year decline in sales volume is expected in the Türkiye operations during 2Q26, while product mix and profitability-supporting segments continue to be prioritized.

Double-digit sales volume growth in Uzbekistan and Kazakhstan was indicated to have continued, supported by a strong demand environment.

Positive developments were reported in Pakistan, one of the Company's most important markets, with double-digit sales volume growth continuing during the quarter.

In Iraq, where sales volumes declined in the first quarter, sales volumes were indicated to have remained flat in 2Q26 despite the adverse impact of the ongoing conflict.

**1Q26 Financials:** Coca Cola İçecek reported revenue of TRY 52,369 million, EBITDA of TRY 8,992 million, and net income of TRY 5,237 million in 1Q26. The Company also recorded a positive monetary gain of TRY 3,130 million under the monetary gain/loss line.

**We continue to like Coca Cola İçecek's operational and financial outlook. Based on the trends observed during 2Q26, we expect the strong performance in international markets to support the Company's financial results, leading to improvements in both gross margin and EBITDA margin. In addition, as the second quarter is historically one of the Company's strongest quarters, we believe these positive developments could provide further support for the share price. We maintain our BUY recommendation with a 12-month target price of TRY 108.57.**

## AGHOL

**We recently held a meeting with Anadolu Grubu Holding on July 8 to discuss recent developments and expectations for 2Q26. Key takeaways from the meeting are provided below.**

- **Beverages:** We understand that sales volume continued to grow in the Turkish market with slightly contraction, while strong demand persisted in international markets. As we stated in our brief note for CCOLA, we expect an improvement in the EBITDA margin.
- **Beer:** While a contraction in sales volume is expected in the Turkish market, it was noted that the focus is on new launches in the Turkish market, and therefore, customer habits need to mature. We believe that foreign markets are following a stable trend in terms of both volume and margins. Financially, the beer segment focuses on improving cash flow and controlling and reducing the net debt/EBITDA ratio.
- **Retail:** It appears that promotions and price competition will continue depending on purchasing power. Consequently, we anticipate pressure on the gross profit margin, but we expect the EBITDA margin to be at similar levels to last year thanks to the management of underlying operational costs. With contributions from Capex and working capital management, this quarter is expected to support cash flow.
- **Other:** We understand that ASUZU experienced a gradual recovery and ADEL saw a positive operational trend compared to last year in this quarter.

**We expect CCOLA's strong contribution to be supportive of AGHOL's share performance, while we believe MGROS's contribution may be more limited compared to CCOLA. We also think that the positive/negative contributions of the beer group, ASUZU, and ADEL will be limited due to their smaller share in the Holding NAD.** The share has underperformed the BIST 100 index by 8% since the beginning of the year. According to the latest closing data, the Holding NAD is trading at a discount of 34%.

## KOTON

We recently held a meeting with Koton on July 8 to discuss recent developments and expectations for 2Q26. Key takeaways from the meeting are provided below.

- **We expect domestic demand to remain weaker in 2Q26 compared to the first quarter.** Sales growth was broadly in line with inflation in April, while May delivered a strong performance due to the timing of the Eid holiday. However, we expect domestic sales to slow in June as the holiday-related boost faded.
- **Based on our initial observations, we expect domestic retail revenues to remain below inflation in 2Q26.** Supported by e-commerce and wholesale operations, we forecast consolidated revenue growth to be broadly in line with inflation or to imply a real contraction of around 1-2%. Overseas operations are expected to provide a limited positive contribution to the quarterly results.
- **Due to the high base from last year, we expect the gross margin to remain below the level recorded in 2Q25.** While we expect the positive impact of inventory procured below inflation to continue, we do not expect it to be as strong as last year. Meanwhile, rising operating costs are likely to put pressure on margins. We also expect FX gain income to remain below last year's level.
- **Despite geopolitical tensions in the Gulf region, store openings have continued and we expect strong USD-based growth in the region.** However, given the relatively small share of GCC operations in total revenue, we believe the overall financial impact will remain limited.

**1Q26 Financials:** Koton reported revenue of TRY8,282 million in 1Q26, down 1% YoY. EBITDA increased by 221% YoY to TRY1,509 million, while the EBITDA margin improved by 12.6 percentage points. The company reported a net loss of TRY278 million in 1Q26.

We expect a volatile operating environment throughout 2Q26 due to calendar and seasonal effects. Although we expect domestic retail sales growth to remain below inflation, we forecast consolidated revenue growth to stay broadly in line with inflation, supported by e-commerce and wholesale operations. We also expect gross margin normalization on a yearly basis, reflecting last year's high base and higher operating costs. Overall, we believe 2Q26 results will be weaker than the strong base of last year but will still indicate a relatively resilient performance compared to the broader sector. The shares have underperformed the BIST 100 Index by 17% year-to-date. The Company is not under our research coverage; therefore, we do not have a recommendation or a target price for the stock.

## HEKTS

**We recently held a meeting with Hektaş on July 8 to discuss recent developments and expectations for 2Q26. Key takeaways from the meeting are provided below.**

It was noted that the second quarter of 2026 was generally favorable for the agricultural sector, with increased rainfall supporting the use of agricultural products.

Additionally, Plant Prescription (B-Reçete) system was implemented nationwide as of July 1, enabling the digital tracking of the sale and application of agricultural pesticides. This development led to demand being brought forward.

It was stated that OYAK's share sale process has been completed and that the cash proceeds from the sale will be reflected in 2Q26 financials as a capital advance.

It was noted that the investment in Uzbekistan is proceeding according to plan.

Our preliminary, indefinite estimates for 6M results suggest that revenue may approach TRY 4.5 billion and EBITDA may realize at levels close to those of the first quarter.

On the other hand, recall that a communiqué published in the Official Gazette reduced the corporate tax rate from 25% to 12.5% for certain companies, effective from 2027. We believe that this situation could create a "one-off expense impact" for companies that have recorded losses over the years and carry deferred tax assets on their balance sheets, potentially placing significant pressure on net profit. However, we would like to emphasize that the implications of this measure will be determined and finalized through the independent audit process.

**1Q26 financials.** In 1Q26, Hektaş reported revenue of TRY 2,222 million (down by 19% YoY), EBITDA of TRY 57 million and a net loss of TRY 252 million (1Q25: net loss of TRY 750 million). Due to inflation accounting, a positive impact of TRY 925 million was recorded under the monetary gain/loss item in 1Q26 financials.

**Our 12-month target price for Hektaş stands at TRY 4.30 and our recommendation is HOLD.**

## TCELL

We held a meeting with Turkcell on July 10 to discuss recent developments and the 2Q26 period. The key takeaways we compiled from the meeting are presented below.

While we project the revenue growth trend above inflation to continue, we estimate that growth will realize close to the lower band of the 2026 guidance due to the lagged effect of the weak pricing caused by the highly competitive environment in 2025. In parallel, we can state that the growth on the mobile ARPU side will follow a similar course to the first quarter. We expect to see the positive contribution of the price adjustments made during the January–April period as of the final quarter of the year.

On the EBITDA side, we observed pressure in the first quarter driven by intense device sales. While we anticipate this effect to diminish in this quarter, we think that 5G advertising expenses will impact margins. Despite this, we do not expect the EBITDA margin to deviate from the 40–42% band indicated for the full year.

Following the inclusion of 5G licenses in the balance sheet, we observed a positive impact under the monetary gain/loss item in the first quarter; however, the depreciation effect had not yet reflected on the financials. We project that the depreciation expenses, which we expect to come into play this quarter, will create pressure on the income statement, which will consequently be reflected in the net profit.

Driven by the 5G auction payments, net debt, which stood at TRY 16,383 million at the end of 2025, rose to TRY 48,827 million at the end of the 1Q26 period, while the net debt/EBITDA ratio realized at 0.42x. We do not foresee a distinct increase in the net debt/EBITDA ratio during the second quarter of the year.

In the conference call held following the 1Q26 financials, Management stated that a net profit of TRY 306 million was recorded on the TOGG side in the first quarter, driven by the sales momentum of the new T10F model and the impact of existing incentive mechanisms, and that this momentum was expected to continue in the upcoming periods. In parallel, we do not expect to encounter a negative picture stemming from TOGG in the current quarter.

**1Q26 financials.** Turkcell's sales revenues increased by 8.9% to realize at TRY 68,377 million in the 1Q26 period. While Turkcell Turkey revenues, which constitute 90% of the Group revenues, increased by 8.6%, Techfin revenues, constituting 5%, increased by 4%, and other segment revenues, constituting 4%, increased by 24.6%. During this period, the EBITDA margin decreased by 2.3 percentage points to realize at 41.4%, while EBITDA rose by 3.2% to reach TRY 28,300 million. The Company's net profit realized at TRY 4,634 million in this period, marking a 15% increase.

**Our 12-month target price for Turkcell stands at TRY 174.40, and our recommendation is BUY.**

## KORDS

**We recently held a meeting with Kordsa on July 13 to discuss recent developments and expectations for 2Q26. Key takeaways from the meeting are provided below.**

**Tire Reinforcement Segment:** While a full recovery in sales volumes has not yet been observed due to global competition, we believe that the dynamics created by geopolitical developments will positively impact product prices, supporting both growth and operational profitability.

**Composite Technologies Segment:** With the rise of artificial intelligence, demand for ceramic yarn products is particularly prominent. This appears to be positively contributing to sales revenue and overall profitability. While other composite product groups are also said to be supporting growth, it should be noted that composite products account for approximately 25% of revenue according to the latest data.

**One-off Effect:** The sale of land will provide a cash inflow to the company. Furthermore, this transaction is expected to have a positive impact on the net income for the period.

**Kordsa Teknik Tekstil** reported sales revenue of TRY 8,756 million, EBITDA of TRY 637 million, and net profit of TRY 33 million in 1Q26.

**Based on evaluation of the possible developments of 2Q26, we believe it will support the company both operationally and financially. On the other hand, we would like to point out that while the data shaped around our assessments may also support share performance, the high net debt/EBITDA metric may put pressure on the valuation. Our 12-month target price for Kordsa is TRY 77.80 and our recommendation is HOLD.**

## Valuations

|                                                   | Mcap<br>(TRY mn) | Mcap<br>(USD mn) | Share in<br>BIST 30 Index | Share in<br>BIST 100 Index | Nominal<br>Performance - YTD | Relative<br>Performance - YTD | Target<br>Price (TRY) | Recommendation | Close<br>Price | Upside / Downside<br>Potential |

### Rating

Deniz Yatırım analysts calculate 12-monthly target values (prices) and their associated potential return by using one or more valuation method for each stock. Our 12-monthly rating system includes 3 different general investment recommendations which are **BUY, HOLD** and **SELL**.

**BUY:** This refers to a valuation where a stock is expected to yield a total potential return of minimum 20% and above in the next 12 months.

**HOLD:** This refers to a valuation where a stock is expected to yield a total potential return between 0-20% in the next 12 months.

**SELL:** This refers to a valuation where a stock is expected to yield a total potential return lower than 0% in the next 12 months.

| Recommendation | Potential Return (PR), 12-month |
|----------------|---------------------------------|
| BUY            | ≥%20                            |
| HOLD           | %0-20                           |
| SELL           | ≤%0                             |

Deniz Yatırım analysts evaluate stocks in light of potential catalysts, triggering developments, and risks, as well as market, sector, and competitor developments. After publicly disclosing general investment recommendations, our analysts closely monitor stocks. However, if stock price fluctuations cause values to exceed the limits of our rating system, our analysts may choose not to change their recommendation regarding the stock and/or place it Under Review (UR). There is absolutely no time constraint for our analysts in terms of rating and/or recommendation updates in the event of a potential UR. From a valuation perspective, if there is mathematical potential for an increase or risk of decline, our analysts may make recommendations outside the BUY-HOLD-SELL framework. They consider the general trend and recent developments in the sector and company beyond potential return levels that form the basis of the rating. In such cases, the evaluation may consider various factors, such as general sector conditions, potential risk and return, parameters in the latest financial statements, and political and geopolitical factors. Our analysts do not use a mechanical process that only considers mathematical values when making BUY-HOLD-SELL recommendations.
