

Sustainable Fund Basket Fund from Deniz Portfolio focusing on a habitable future

Deniz Portfolio now offers the Sustainable Fund Basket Fund that focuses on sustainability in asset preferences. The fund aims to boost sensitivity towards environmental, social and corporate governance (ESG) issues and encourage investments in these areas.

While making new fund investment choices, stock investment funds based on domestic and international sustainability theme indices along with ESG criteria are taken into account besides high financial performance.

Investment areas of the Sustainability Fund Basket fund include ADR and GDR certificates; mutual funds issued in line with ESG criteria and money and capital market instruments issued by companies adopting sustainability indices.

‘The most valuable heritage is a clean world

Deniz Portfolio General Manager Dr. Cem Öneç said, “We believe that a sustainable perspective focused on the future is very valuable in the investment world. It is important for us to create a positive impact and encourage our stakeholders to make preferences that regard the environment and natural resources. Portfolio of our Sustainability Fund Basket fund will comprise a minimum of 80% local and foreign sustainability themed stocks. We know that the most valuable heritage for future generations is a habitable planet. Aware of our corporate, environmental and social responsibilities, we will continue to manage our customers savings with environmentally friendly investments.”
