Capital Adequacy

Highlights

- In the second quarter of the year, T1R and CAR kept its strong level of 12.3% and 14.5%, well above the legal limits. In addition to high profit figures, the bank also supports its CET1 and T1 capital to a more robust position with increasing the paid in capital. T1R and CAR changed by +118 and -13 basis points respectively, compared to the first quarter. On y-o-y basis, the change was realized as +114 bps for T1R and -124 bps for CAR. The decrease in CAR on y-o-y basis is mainly due to BRSA's forbearance rule change regarding the FX rate used in CRWA calculation and annual update of operational risk amount.
- BRSA forbearances supported the capital adequacy: has respective positive impacts of 126 bps and 133 bps on T1R and CAR as of June 24.
