#### **TABGD: Our 4Q24 estimates**

Especially for this period, as in previous quarters, we would like to remind you once again that since the inflation accounting has come into force in the majority of companies listed on BIST, we cannot publish earning preview for the companies within our coverage in the order and scope we are used to.

Firstly, we underline that our estimates include the effects of inflation accounting. After the strongest season in 3Q24, we believe that the Company completed 4Q24 in line with its targets, thanks to the successful results of the effective marketing on products.

We expect the Company to record sales revenue of TRY7,513 million, EBITDA of TRY1,597 million and net income of TRY460 million.

While our 12-month target price for TAB Gida is TRY320.00, our recommendation is BUY. The stock outperformed the index by 11% YTD. According to last 12-months data, the stock is trading at 24.7x P/E and 6.9x EV/EBITDA multiples.

#### ANHYT: Premium production in January / positive

Anadolu Hayat Emeklilik (ANHYT) announced monthly premium production data. Accordingly, the Company's total gross premium production of the Company for the January was realized as TRY 1,251,099,903. While the month-on-month change was -4% and the year-on-year change was 84%.

When we look at the breakdown of the data announced by the Company for the January, the life branch was realized at TRY1.250.857.641, while the non-life side was realized at TRY242,261.

In the preliminary data for 2025, we evaluate the 84% increase in premium production on an annual basis as positive for ANHYT shares. As a reminder, we are carrying Anadolu Hayat Emeklilik in our Cyclical Portfolio as of 6 Feb 2025.

#### TABGD: About the RBI and TFI agreement / neutral

Restaurant Brands International Inc.(RBI) announced that it has acquired all of the outstanding shares in Burger King China from TFI Asia Holdings BV and Pangaea Two Acquisition Holdings for nearly USD 158 million in a cash transaction, Foreks reported.

According to a statement from the company, RBI now owns almost 100% of the business and will retain advisors to help the company identify a new local partner to inject primary capital into the business and become a controlling shareholder.

"TFI has been a valuable partner in Burger King's growth in China, helping the brand grow from approximately 60 restaurants in 2012 to nearly 1,500 restaurants today, and will continue to expand its operations in Turkey as one of RBI's largest business partners worldwide," the statement said.

Although we think that this development will have positive operational repercussions for TAB Gida, which is under the roof of TFI, in the long term, at this stage, we assess that it will have a neutral impact on share performance.

#### **TAVHL: Review of Financial Results / positive**

TAV Havalimanları booked EUR428.5 mn revenues (Consensus: EUR385 mn / Deniz Invest: EUR259 mn), EUR78.1 mn EBITDA (Consensus: EUR78 mn / Deniz Invest: EUR76 mn) and EUR1.9 mn net loss (Consensus: EUR3 mn net profit / Deniz Invest: EUR4 mn net profit) in 4Q24.

#### Positive balance sheet details

✓ Higher than expected revenue realised in line with increased passenger numbers, EBITDA margin to show improvement, slightly.

#### Negative balance sheet details

× Net profit below our expectations, increase in net debt position.

#### Our brief assessment of the balance sheet

→ Tav Havalimanları completed 2024 with strong operational and financial results. In line with the expectations in our 2025 Strategy Report, we expect the strong results to have a positive impact on share performance while keeping our model unchanged.

Overview: Following the announcement of the Company's 2025 guidance, which is very parallel to our expectations, we keep our 12-month target price of TRY460.00 and our recommendation as BUY for TAV Airports. While the increase in net debt points to a limited decrease of 3% in our model, we reserve our right to revise at this point. The stock underperformed the index by 4% YTD. According to the 12-month trailing data, the stock trades with 14,7x P/E and 8,7x EV/EBITDA. We would also like to remind you that we have been carrying TAV Airports in our Model Portfolio since 10 May 2021. Since that date, the stock has performed by 1012% on a nominal basis and 63% relative to the BIST 100 index.

#### KCHOL: Review of financial results / neutral

Koç Holding booked TRY3,300 mn net income (Consensus: TRY821 mn net loss / Deniz Invest: TRY485 mn net loss) in 4Q24. Due to inflation accounting, there was a positive impact of TRY2,626 million under the monetary gain/loss item in 4Q24 financials.

#### Positive balance sheet details

✓ Ongoing increase in solo net cash position and booked net income contrary to consensus

#### Negative balance sheet details

Financial results down y-o-y base due to continued pressure from inflation accounting.

#### Our brief assessment of the balance sheet

→ In 4Q24 financials, despite the increasing solo net cash position and positive outlook in net income, the results showed a year-on-year decline, which may have a partially negative impact on the share performance. However, we consider the results as neutral at this stage, as we have started to think that the current price and performance of the stock has been pointing to this situation for a while.

<u>Overview:</u> We like Koç Holding thanks to its diversified portfolio and strong balance sheet. Also, NAV discount remains slightly above its long-term average.

Following the financials, we currently maintain our 12-month target price of TRY298.80 for Koç Holding and our recommendation as BUY. However, we would like to state that we reserve the right to revise our target price as a result of our target price changes for TTRAK, TOASO and ARCLK. The stock has underperformed the BIST 100 index by 13% since the beginning of the year. According to 12-month retrospective data, the stock is traded with a PD/DD multiple of 0.7x.
